The International Handbook of Educational Research in the Asia-Pacific Region J.P. Keeves, Ryo Watanabe, 2013-11-11 The aim of the Handbook is to present readily accessible but scholarly sources of information about educational research in the Asia Pacific region The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region In so doing the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of these problems and issues Moreover since new problems and issues are constantly arising the articles in the Handbook also indicate the likely directions of future developments The different articles within the Handbook seek to conceptualize the problems in each specific content area under review provide an integration of the research conducted within that area the theoretical basis of the research the practical implications of the research and the contribution of the research towards the resolution of the problems identified Thus the articles do not involve the reporting of newly conducted research but rather require a synthesis of the research undertaken in a particular area with reference to the research methods employed and the theoretical frameworks on which the research is based In general the articles do not advocate a single point of view but rather present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research Furthermore it should be noted that the Handbook is not concerned with research methodology and only considers the methods employed in inquiry in so far as the particular methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region

Educational Research by Association Trevor Gale, Bob Lingard, 2010-01-01 Educational Research by Association is an

archive of an archive It is a collection of eleven Presidential Addresses delivered over the last 40 years to the annual conference of the Australian Association for Research in Education AARE and published annually in AARE's academic journal the Australian Educational Researcher AER However it is more than an archive in that the selection and the opening essay seek to plot evaluate and contribute to definitions of education research and its functions and purposes in a changing world and to consider its impact broadly defined in both actual and desirable or normative terms In pursuing this agenda the book highlights a number of key issues that have become important in educational research over time particularly in Australia but also around the globe These include defining education research as a field including AARE's location within that field and the positioning of the presidents Addresses therein They also include questions about the purposes of education research which implies as well the issue of the readership for such research The selection also touches on matters of dissemination publication and diffusion and impact more broadly raising matters of publication and the various and competing outlets for publication of education research nationally and increasingly on an international scale Issues of quality including associated politics also come into play as do questions of the relationship of education research to education policy and practice These latter questions have become more significant in state policies framed by a new public management that call for evidence based policy The opening essay by Bob Lingard and Trevor Gale two former AARE Presidents traverses these matters generally and in respect of this archive of Presidential Addresses helping to define educational research in an increasingly globalised world

The Institutional Basis of Higher Education Research Stefanie Schwarz, Ulrich Teichler, 2007-05-08 In the US the university administration runs its own office of institutional research in order to base its decisions on systematic information Furthermore higher education research can rely on a relatively stable academic basis if study programmes on higher education exist Again this is most frequently the case in the United States Finally governments and other macro societal actors sometimes have their own offices or institutes of policy research and prepare the policies of the actors they report to In addition research on higher education can be institutionalized in a variety of ways Often research institutes on higher education are quite visible They were established as specialized research units within or outside institutions of higher education but no common institutional basis can be observed for this type of institution across the countries Third the major themes of research on higher education also differ between countries It has frequently been said that in European countries it was more prone to analyse macro societal issues of higher education whereas in the US it tended to study the inner life of higher education institutions students and the teaching and learning processes

Modern States Peter Wagner,1991-03-28 Modern social sciences have over the past forty years been committed to the improvement of public policy More recently however doubts have arisen about the possibility and desirability of a policy oriented social science In this book leading specialists in the field analyze both the development and failings of policy oriented social science In contrast to other writings on the subject this volume presents a distinctively historical and comparative approach By looking at earlier periods the contributors demonstrate how policy orientation has been central to the emergence and evolution of the social sciences as a form of professional activity Case studies of rarely examined societies such as Poland Brazil and Japan further demonstrate the various ways in which intellectual developments have been shaped by the societal contexts in which they have emerged and how they have taken part in the shaping of these societies
