Gary Zhexi Zhang, 2023-10-03 A collection of essays fictions and interviews exploring the weird temporalities of finance and catastrophe Once financial practitioners plied a hybrid trade as hydrologists star gazers and weather watchers who sought to discover the natural laws of value and exchange as they did the divine order of an unchanging nature Today corporate firms hire trend forecasters and scenario planners to play out strategic fictions in virtual worlds Hurricane insurance markets simulate a turbulent climate to offer investment instruments to hedge against the risks of the stock market And for financial astrologers operating in the city of London celestial motions provide a cosmic map that orients the mood of terrestrial markets Bringing together artists researchers and interstitial practitioners Catastrophe Time pays attention to the conditions of speculative knowledge on an increasingly volatile planet Traversing a gray zone between rigorous research and operative science fictions its contributors question how practices of speculation may transform undermine and at times exceed the worlds they set out to model Edited by artist Gary Zhexi Zhang Catastrophe Time explores the power of temporal technologies whether currencies conspiracies or simulation models to shape reality through fiction By bringing together
