what it means to be human Each author brings a different perspective but all share a common view of the reading process Together they provide a clear and surprising exposition of the reading process in which they involve readers of this book in exploring the ways they themselves read and make sense of written language while their eyes fixate on fewer than 70 percent of the words in the text In addition the authors engage in a cross disciplinary discussion about how readers use the brain eyes and language in reading The different perspectives provide depth to the authors description of reading The information presented in this book will be new to many teachers researchers teacher educators and the public alike The final chapter draws on the understandings from the book to challenge the treatment of reading and writing as school subjects and offers the basis for supporting literacy development as a natural extension of oral language development
