It also relies on our strong history as therapists and introduces a need for integration of all aspects of care: a true holistic approach that characterizes the nursing perspective. The second edition is thoroughly updated to reflect current research, new classifications in DSM 5, genetic testing, and increased use of telemental health delivery. It builds upon its lifespan focus and updates quick access pediatric pointers and aging alerts. Additionally, the resource incorporates the 2014 publication of the ANA Scope and Standards of Practice for Psychiatric Nurses, offers a new focus on QSEN requirements, and responds to the need to reduce health disparities and address cultural considerations. Organized around psychiatric syndromes, the text covers neurobiology, theory, and research evidence related to psychopharmacology, psychotherapy, and CAM interventions. It provides a virtual buffet of clear treatment options in the form of well-designed decision trees and accompanying explanatory narratives.
