Egyptian Economy A Modeling Approach:

The Egyptian Economy Mahmoud A. Elkhafif, 1996-08-16 Egypt experienced an economic shift from a managed economic strategy to one of market oriented resource allocation starting in the 1970s and in 1987 signed a stabilization program agreement with the International Monetary Fund This is an overview of these structural changes experienced by the Egyptian economy in the 70s and 80s The main tool to assess the effectiveness of the policies and to evaluate growth prospects under different policy scenarios is an integrated macroeconomic energy demand input output model Four different policy scenarios are explored **Linking the economics of water, energy, and food: A nexus modeling approach**

Al-Riffai, Perrihan, Breisinger, Clemens, Mondal, Md. Hossain Alam, Ringler, Claudia, Wiebelt, Manfred, Zhu, Tingju, 2017-04-28 We use an innovative methodology to model the socioeconomic linkages between water energy and food in the East Nile Basin Based upon a theoretical nexus framework the methodology is expanded into a quantifiable modeling suite that underlies the analysis of each of three country case studies The advantages are that despite resource shortages being a challenge the modeling suite aids in devising policies and strategies that formulate these sectoral interdependencies and provide the evidence based research results necessary for their design in a way that exploits synergies existing across sectors countries and regions Al Zubari n d This paper lays out the methodology and gives an example of an application and scenarios by focusing on three countries in the East Nile Basin This methodology paper will be followed by three individual country case studies that highlight the water energy and food nexus for each **The Holistic Egyptian Quality Management**

Approach "HEQMA" Osama A. Kamal, 2014-10-17 While industrial organizations in developed countries around the world passed and benefited from numerous quality control phases industrial organizations in Egypt often bypassed the quality control stage moving straight to practicing quality management systems QMS without first verifying product quality This has created a significant gap that must be overcome in order to allow Egyptian industrial organizations to compete on a global level This book takes into account the business models most suitable for industrial practice in Egypt resulting in the formulation of the Holistic Egyptian Quality Management Approach HEQMA As the western management style focuses on and is characterized by a result oriented approach Japanese management is process oriented and focuses on small continuous improvements As such HEQMA focuses on the characters and actions of the people who perform tasks to ensure results HEQMA consists of 88 criteria gathered in four bundles to express the main business success factors the management commitment and corporate ethics factor the human capital factor the internal capability factor and the outcome factor HEQMA dispenses with management consultants as it measures how to achieve results within business organizations in a robust manner HEQMA will contribute to solving many problems currently facing Egyptian industrial organizations particularly by clarifying from where these problems originate The model draws the attention of the concerned parties to the proper channels for diagnosing industrial problems in Egypt and explores new integrative management ideas that will suit

Egyptian industrial culture Throughout the research project that culminated in this book many industry leaders and consultants were interviewed in order to provide an in depth discussion of the benefits of HEQMA and to help the project meet its ultimate goal of finding ways to strengthen Egyptian industrial quality in order to eventually support the integration of the Egyptian economy into developed industrial alliances Hosni Mubarak and the Future of Democracy in Egypt A.,2011-11-07 As Mubarak s regimeneering its end becomes a strong possibility many pressures both foreign and domestic are coming to bear on Egypt to bring democratic reforms to this struggling country In The Mubarak Leadership and Future of Democracy in Egypt Alaa Al Din Arafat studies this new era and the obstacles that must be overcome **From the 1919 Revolution to the 2011 Arab Spring** Uzi Rabi,Mira Tzoreff,2024-05-08 Focused on three Egyptian revolutions in 1919 1952 and 2011 this edited book argues that each of these revolutions is a milestone which represents a meaningful turning point in modern Egyptian history Revolutions are typically characterized by a fundamental change in political and social infrastructures as well as in the establishment of new values and norms However it should be noted that this may not be entirely applicable when examining the context of the three Egyptian revolutions the 1919 revolution failed to liberate Egypt from British colonial hegemony the 1952 revolution failed to rework the country s social and economic systems and unify the Arab world and the Arab Spring revolution of 2011 culminated in a chaotic economic and social catastrophe thus failing to solve the young generation s crisis Nevertheless by revisiting and re defining these revolutions through diverse theoretical frameworks the book proposes that each of them played a significant role in shaping Egypt s political social and cultural identity This book is specifically of interest for students historians and social scientists with a keen interest in Egyptian history and the Middle East offering fresh perspectives and insights into these transformative moments in Egypt s history

Applied Economics for Development: Empirical Approaches to Selected Social and Economic Issues in Transition Economies Mahmut Zortuk,2018-01-15 Transition economies experience transformation of their economic system Following the disintegration of the Soviet Union a number of former socialist countries underwent transitions from central planning to a market economy More generally many rapidly growing economies undergo no less profound transformations of their economic systems Contrary to common misconception the transition process cannot be simply reduced to eliminating state intervention and liberalizing the economy Economies under transition exhibit a unique set of policy challenges Unlike developed market economies missing markets or market failures abound Economic transformation takes the form of rapidly evolving patterns of international trade and investment industrial structure and consumption These changes call for appropriate public policies A continuing flow of investment hinges on suitable institutions the provision of public infrastructure and other public goods Adequate regulation can be central in ensuring that environmental resources are sustainably managed And sophisticated production systems call for corresponding social institutions in terms of education health and welfare provisions In all these cases accurate empirical assessments are central to the design of effective policy

This book presents a selection of pressing economic and social issues in transition economies. Selected issues include the development of particular industrial sectors, the drivers and consequences of foreign direct investment, public finances, urbanization, social indicators, environmental policy, and energy diversification. In each case, an original empirical analysis is performed using a variety of advanced quantitative methods applied to recent data. The book will be of interest to economists studying transition economies, economic development, or having a general interest in applied economics. It will be of particular interest to applied economists, policy analysts, and policy makers in transition economies concerned with the shape and direction of appropriate economic reforms.

The Grand Ethiopian Renaissance Dam and the Nile Basin Zera Yihdego, Alistair Rieu-Clarke, Ana Elisa Cascão, 2017-10-31. The Grand Ethiopian Renaissance Dam (GERD) will not only be Africa's largest dam but it is also essential for future cooperation and development in the Nile River Basin and East African region. This book, after setting out basin-level legal and policy successes and failures of managing and sharing Nile waters, articulates the opportunities and challenges surrounding the GERD through multiple disciplinary lenses. It sets out its possibilities as a basis for a new era of cooperation, its regional and global implications, the benefits of cooperation and coordination in dam filling, and the need for participatory and transparent decision making. By applying law, political science, and hydrology to sharing water resources in general and to large-scale dam building, filling, and operating in particular, it offers concrete qualitative and quantitative options that are essential to promote cooperation and coordination in utilising and preserving Nile waters. The book incorporates the economic dimension and draws on recent developments, including the signing of a legally binding contract by Egypt, Ethiopia, and Sudan to carry out an impact assessment study, the possibility that the GERD might be partially operational very soon, the completion of transmission lines from GERD to Addis Ababa, and the announcement of Sudan to commence construction of transmission lines from GERD to its main cities. The implications of these are assessed, and lessons learned for transboundary water cooperation and conflict management.

Financing Human Development in Africa, Asia and the Middle East United Nations Publications, 2013-08-01. This book is available as open access through the Bloomsbury Open Access programme and is available on bloomsburycollections.com. How much would poor nations need to invest to eliminate poverty, get all children in school, and provide adequate basic health care for all? Can they afford it? *Financing Human Development in Africa, Asia and the Middle East* provides some clear answers to these questions. The contributors assess feasible financing strategies underpinning actions to enhance human development in pursuance of the United Nations Millennium Development Goals (MDGs). The contributors analyse these strategies in the context of broader concerns of economic development in nine countries in Africa, Asia, and the Middle East. The assessments stress the importance of redesigning macroeconomic policies so as to make these more supportive of long-term economic growth and employment creation while ensuring sufficient investments in human development in order to end poverty and overcome deep-rooted inequalities.

Pottery and Economy in Old Kingdom Egypt Leslie Anne Warden, 2013-10-10 In Pottery and Economy in Old Kingdom Egypt Leslie Anne Warden investigates the economic importance of utilitarian ceramics particularly beer jars and bread moulds in third millennium BC Egypt The Egyptian economy at this period is frequently presented as state centric or state defined This study forwards new methodology for a bottom up approach to Egyptian economy analyzing economic relationships through careful analysis of variation within the utilitarian wares which formed the basis of much economic exchange in the period Beer jars and bread moulds together with their archaeological textual and iconographic contexts thus yield a framework for the economy which is fluid agent based and defined by small scale face to face relationships rather than the state

Lumbering State, Restless Society Nathan J. Brown, Shimaa Hatab, Amr Adly, 2021-10-12 Lumbering State Restless Society offers a comprehensive and compelling understanding of modern Egypt Nathan J Brown Shimaa Hatab and Amr Adly guide readers through crucial developments in Egyptian politics society and economics from the middle of the twentieth century through the present Integrating diverse perspectives and areas of expertise including the tools of comparative politics the book provides an accessible and clear introduction to the Egypt of today alongside an innovative and rigorous analysis of the country's history and governance Brown Hatab and Adly highlight

ways in which Egypt resembles other societies around the world drawing from and contributing to broader debates in political science They trace the emergence of a powerful and intrusive state alongside a society that is increasingly politicized and they emphasize how the rulers and regimes who have built and steered the state apparatus have also had to retreat and recalibrate The authors also examine why authoritarianism corporatism and socialism have decayed without resulting in a liberal democratic order and they show why Egyptian politics should not be understood in terms of a single dominant force but rather an interplay among many actors At once current insightful and engaging *Lumbering State Restless Society* delivers a powerful and distinctive account of modern Egypt in the modern world **Food Subsidies in Egypt**

Grant MacDonald Scobie, 1983 Research report on the impact of food subsidies on foreign exchange and the industrial sector in Egypt based on an econometric model of the balance of payments examines the effect of food policy on exchange rates inflation and trade structure discusses price control food imports and food consumption Bibliography graphs and statistical tables *Managing Water Resources* Slobodan P. Simonovic, 2012-05-23 This book bridges disciplines previously confined to specialist journal publications by providing a comprehensive overview of the systems analysis application to water resources It is ideal for Masters level courses in Water Resources Engineering where modern management techniques of optimization and modelling are highly important in the strategic management of a vital resource Derek Clarke University of Southampton UK The great novelty of this book is that it presents in detail how fuzzy set theory can be used in water resource system management The author was one of the pioneers who opened up this new field and is considered to be one of the greatest experts in it Rodolfo Soncini Sessa Politecnico di Milano Italy Water resources management is increasingly interdisciplinary and must take into account complex socioeconomic factors and environmental variables This book describes the systems approach and its application to contemporary water resources management focusing on three main sets of tools simulation optimization and multi objective analysis This approach is presented within the context of sustainable planning and development under conditions of uncertainty *Managing Water Resources Methods and Tools for a Systems Approach* introduces system dynamic simulation as a tool for integrated modelling and contains coverage of the use of fuzzy sets for incorporating objective and subjective uncertainties The book combines theory with many practical examples as well as including programs and exercises on downloadable resources It comprises both an advanced text for students of water resources and civil or environmental engineering and a practical guide for professionals Published jointly with UNESCO and International Hydrological Programme *Journal of Palestine Studies*, 1999 A quarterly on Palestinian affairs and the Arab Israeli conflict **US Economic Aid in Egypt** Dina Jadallah, 2016-01-27 Economic aid is one of the cornerstones of the Egyptian American relationship and plays a significant role in promoting US policy objectives in the Middle East Focusing on the latter half of Hosni Mubarak's rule Dina Jadallah argues that through its aid policy the US has attempted to use a reforming and democratising narrative to transform Egypt into a stable market democracy that would be aligned with US

interests in the region This aim has been pursued in conjunction with one that promoted a comprehensive warm peace with Israel By highlighting the opposition within Egypt to US aid Jadallah analyses the key issues that came to the fore during the 2010 11 protests in the country and led to the downfall of Mubarak Extending her analysis into the post revolutionary period the author provides interviews with regime insiders and prominent critics inside state institutions and outside who actively challenged the regime This enables her to assess the different perceptions of US aid both under Mubarak and in the current political situation contributing to an incisive analysis of modern Egypt and its relations with its superpower ally in the region
