*Education and the Economy in a Changing Society*, 1989      **Education and the Economy in a Changing Society**  
Organisation for Economic Co-operation and Development, 1989 Reports on the discussions and conclusions of an OECD conference on the need to adjust educational systems to reflect economic and social changes A political consensus was reached internationally in identifying problems and approaches to their solutions      **Education, Economic Change and Society in England 1780-1870** Michael Sanderson, 1995-09-14 Moving from a specialist interest in recent years the study of the history of education has flourished and expanded Focusing on literacy this study reviews the history of education in the nineteenth century and the academic debates surrounding it      *Liberal Arts Education in a Changing Society* You Guo Jiang, 2014-12-16 In *Liberal Arts Education in a Changing Society* A New Perspective on Chinese Higher Education You Guo Jiang S J provides a unique focus on the re emergence of liberal arts education in China This is the first book that explores in depth the development of liberal arts education in China Through the extensive use of first hand materials relating to the liberal arts and current viewpoints of Chinese scholars and higher education leaders Jiang concludes that China must implement a good liberal arts education program to form responsible global citizens      **Can Education Change Society?** Michael W. Apple, 2013 Despite the vast differences between the Right and the Left over the role of education in the production of inequality one common element both sides share is a sense that education can and should do something about society to either restore what is being lost or radically alter what is there now The question was perhaps put most succinctly by the radical educator George Counts in 1932 when he asked Dare the School Build a New Social Order challenging entire generations of educators to participate in actually to lead the reconstruction of society Over 70 years later celebrated educator author and activist Michael Apple revisits Counts now iconic works compares them to the equally powerful voices of minoritized people and again asks the seemingly simply question of whether education truly has the power to change society In this groundbreaking work Apple pushes educators toward a more substantial understanding of what schools do and what we can do to challenge the relations of dominance and subordination in the larger society This touchstone volume is both provocative and honest about the ideological and economic conditions that groups in society are facing and is certain to become another classic in the canon of Apple s work and the literature on education more generally      *Education Strategy in a Changing Society* Martin Slattery, 2024-03-04 Placing the UK in a global context this book engages with the emerging international debate on the future of education in the 21st century It examines the post pandemic paradigm shift in educational practice in countries around the world and presents international case studies of emerging future practice However while it embraces the global context and the mega forces therein it is specifically focused on the challenges for education in England today and the potential strategies for moving forward to the all inclusive personalised smarter and lifelong learning needed for tomorrow In doing so it explores how the new curriculum models new approaches to pedagogy
