

## The Information Age

### Introduction

The Information Age is considered historic period in the 21<sup>st</sup> century. Characterized by the rapid shift from traditional industry, it is also called **Computer Age**, **Digital Age**, and the **New Media Age** because it was associated with the development of computers. It is marked by a very fast growth in communication and information technology. This age holds a significant influence as educators and learners.

a

The invention of the computer which gave people access to information with the touch of a button. The internet has tuned society into homebodies and individuals who do everything from the comfort of their homes. People do their tasks only such as shopping, paying bills, working, education, entertainment and ordering food.

As man evolved, information and its dissemination has also evolved in many ways. Eventually, we no longer kept them to ourselves; instead, we share them and manage them in different ways.

Information got ahead of us. It started to grow at a rate we were unprepared to handle. Because of the abundance of information, it was difficult to collect and manage them starting in the 1960s and 1970s.

### Historical Development
