Universities and Globalization Ravinder Kaur Sidhu, 2006-08-15. *Universities and Globalization: To Market To Market* examines the operations of power and knowledge in international education under conditions of globalization with a focus on the three biggest exporters of higher education: the United States, Australia, and the United Kingdom. An interdisciplinary approach based on the core social sciences is used to explore the power relations that shape global education networks. The role of nation states in creating the conditions for education markets and the desire for a Westernized template of international education in the postcolonial world is discussed. The volume offers a sophisticated attempt to recast international education as a series of geopolitical and geoeconomic engagements that transcend simple supply and demand dynamics. Engaging with the theoretical debates about education and globalization, this book examines global cultural flows and boundary crossings, the cultural economy of education networks, and the possibilities for supra-territorial subjectivities. International education markets are examined from the perspectives of both first world producers and postcolonial consumers. By investigating how first world universities imagine and enact the global in their marketing practices, the expressions of cultural diversity valued
