**The Aesthetic Dimensions of Educational Administration & Leadership** Eugenie A. Samier, Richard Bates, 2006-11-22 The question of aesthetics as a theoretical framework for thinking about modern leadership issues in educational settings is an emergent area of inquiry that is receiving considerable attention There is a growing sense that the mechanistic approach to leadership which has been widely encouraged over the last ten years is sterile and that a more philosophical approach is now required This approach is covered here taking into account the importance of aesthetics on all aspects of the administrative and leadership world the ways ideas and ideals are created how their expression is conveyed the impact they have on interpersonal relationships and the organisational environment that carries and reinforces them and the moral boundaries or limits that can be established or exceeded While presenting a significant departure from conventional studies in the field the international contributors reflect a continuity of thought on administrative and

leadership authority from the writings of Plato through to current theory      **APAIS 1991: Australian public affairs information service** ,      **APAIS 1992: Australian public affairs information service** ,      Political Approaches to Educational Administration and Leadership Eugenie A. redistribution of decision making authority to stimulate and sustain improvements in a school For this purpose varying degrees of formal authority to make decisions in the domains of school's mission goals priorities and school policies relating to financial material and human resources are not simply delegated but transferred by legislation to a representative governing body called the school council or board Accordingly it is the position of the principal or the head teacher previously at the apex of the hierarchical structure of the school which undergoes the most radical reform Under the new concept authority is shifted to the corporate body that is to the council or board while the principal becomes an ex officio member of that body and the chief executive officer CEO of the school Traditionally and legally the principal or the head teacher was vested with the full authority for the total management of the school But in terms of SGS or SBM the principal becomes a partner with the representatives of other relevant stakeholders in a democratic structure When the bureaucratic model of a school gets modified with the school governing body occupying the apex of the school hierarchy it becomes the key power centre with legal authority
