Representations in Physics Education David F. Treagust, Reinders Duit, Hans E. Fischer, 2017-07-24 This volume is important because despite various external representations such as analogies metaphors and visualizations being commonly used by physics teachers educators and researchers the notion of using the pedagogical functions of multiple representations to support teaching and learning is still a gap in physics education The research presented in the three sections of the book is introduced by descriptions of various psychological theories that are applied in different ways for designing physics teaching and learning in classroom settings The following chapters of the book illustrate teaching and learning with respect to applying specific physics multiple representations in different levels of the education system and in different physics topics using analogies and models different modes and in reasoning and representational competence When multiple representations are used in physics for teaching the expectation is that they should be successful To ensure this is the case the implementation of representations should consider design principles for using multiple representations Investigations regarding their effect on classroom communication as well as on the learning results in all levels of schooling and for different topics of physics are reported The book is intended for physics educators and their students at universities and for physics teachers in schools to apply multiple representations in physics in a productive way **Inclusive and Adaptive**

Teaching Peter Westwood, 2013-01-04 What does it actually mean to teach an inclusive mixed ability class From the author of the classic teacher text Commonsense Methods for Children with Special Needs this new book from Peter Westwood fully

acknowledges what is feasible and useful to teachers in today's inclusive classroom. This insightful teaching resource promotes a fully inclusive approach to teaching the common curriculum to all while acknowledging differences among learners in relation to intelligence, gender, socioeconomic background, cultural background, language skills, and disabilities. Drawing on the underlying principles of inclusive education and on curriculum and learning theories, Westwood discusses in detail the challenge of diversity in the classroom. The author presents in practical terms an adaptive approach to teaching that can respond when necessary to differences among students. Accessible chapters in this book present sound pedagogical practice linked with adapting curriculum content, helpful teaching methods, a range of resource materials, useful assessment procedures, support for learning. The writer draws appropriately on international research and current learning theories to support this approach whilst each chapter contains an up-to-date list of online and print resources easily available to teachers who wish to pursue topics in greater depth. This book will be of interest to both practising and trainee teachers and teaching assistants as well as school principals, school counsellors, and educational psychologists.
