Spehlmann's EEG Primer Bruce J. Fisch,1991 **MEG-EEG Primer** Riitta Hari,Aina Puce,2023 Neuronal communication in the brain is associated with minute electrical currents that give rise to both electrical potentials on the scalp measurable by means of electroencephalography EEG and magnetic fields outside the head measurable by means of magnetoencephalography MEG Both MEG and EEG are noninvasive neurophysiological methods used to study brain dynamics temporal changes in the activation patterns and sequences Their differences between MEG and EEG mainly reflect differences in the spread of electric potentials and magnetic fields generated by the same electric currents in the human brain In this chapter we give an overall description of the main principles of MEG and EEG going deeper into details in the following chapters *Rowan's Primer of EEG* Lara V. Marcuse,Madeline C.
