differences within the economics profession and between economists and non economists so that the reader can make informed judgments about the sources of these differences and about their impact on policy analysis and policy advice The book features explanatory text boxes tables and diagrams suggestions for further reading and a listing of the economic concepts used in the chapters

Understanding Development Economics Adam Fforde, 2014-01-03 Important parts of development practice especially in key institutions such as the World Bank are dominated by economists In contrast Development Studies is largely based upon multidisciplinary work in which anthropologists human geographers sociologists and others play important roles Hence a tension has arisen between the claims made by Development Economics to be a scientific measurable discipline prone to wide usage of mathematical modelling and the more discursive practice based approach favoured by Development Studies The aim of this book is to show how the two disciplines have interacted as well as how they differ This is crucial in forming an understanding of development work and to thinking about why policy recommendations can often lead to severe and continuing problems in developing countries This book introduces Development Economics to those coming from two different but linked perspectives economists and students of development who are not economists In both explaining and critiquing Development Economics the book is able to suggest the implications of these findings for Development Studies and more broadly for development policy and its outcomes

Introduction to Development Economics Subrata Ghatak, 2003

Development Economics HL Ahuja, A result of more than four decades of teaching experience this book deals with the problems of economic growth development and eradication of poverty and unemployment The book also includes an analytical study of important issues of environment and sustainable development The book not only explains the models and theories of economic growth but also critically evaluates their relevance to developing countries A major highlight of discussion in the context is the exploration of the widely accepted Amartya Sen's Capability Approach to development

Development Economics Yūjirō Hayami, 2001 A comprehensive and systematic account of the core topics in development economics This book examines the reasons why a few countries have achieved a high level of affluence while the majority remain poor and stagnant It represents an original combination of classical political economy modern institutional theory and current development issues bound together through the East Asian development experience This fully revised second edition also analyses some recent changes and

newly emerged problems relevant to the global economy *Development Economics* Shahruxh Rafi Khan,2019-10-23

Following the 2007 2009 financial and economic crises there has been an unprecedented demand among economics students for an alternative approach which offers a historical institutional and multidisciplinary treatment of the discipline Economic development lends itself ideally to meet this demand yet most undergraduate textbooks do not reflect this This book will fill this gap presenting all the core material needed to teach development economics in a one semester course while also addressing the need for a new economics and offering flexibility to instructors Rather than taking the typical approach of organizing by topic the book uses theories and debates to guide its structure This will allow students to see different perspectives on key development questions and therefore to understand more fully the contested nature of many key areas of development economics The book can be used as a standalone textbook on development economics or to accompany a more traditional text

Frontiers of Development Economics Gerald M. Meier,Joseph E. Stiglitz,2001 With contributions from 35 leading economists this forward looking book explores the future of development economics against the background of the past half century of development thought and practice Outstanding representatives of the past two generations of development economists assess development thinking at the turn of the century and look to the unsettled questions confronting the next generation The volume offers a thorough analysis of the broad range of issues involved in development economics and it is especially timely in its critique of what is needed in development theory and policy to reduce poverty An overriding issue is whether in the future development economics is to be regarded simply as applied economics or whether the nature and scope of development economics will constitute a need for a special development theory to supplement general economic theory *Frontiers of Development Economics* is an ideal reference for all those working in the international development community

The Palgrave Handbook of Development Economics Machiko Nissanke,José Antonio Ocampo,2020-08-28 This Handbook responds to the needs and aspirations of current and future generations of development economists by providing critical reference material alongside or in relation to mainstream propositions Despite the potential of globalisation in accelerating growth and development in low and middle income countries through the spread of technology knowledge and information its current practice in many parts of the world has led to processes that are socially economically and politically and ecologically unsustainable It is critical for development economists to engage with the pivotal question of how to change the nature and course of globalisation to make it work for inclusive and sustainable development Applying a critical and pluralistic approach the chapters in this Handbook examine economics of development paths under globalisation focusing on sustainable development in social environmental institutional and political economy dimensions It aims at advancing the frontier of development economics in these key aspects and generating more refined policy perspectives It is critically reflective in examining effects of globalisation on development paths to date and in terms of methodological and analytical approaches as well as forward thinking in policy perspectives with a view to laying a

foundation for sustainable development
