

The diagram illustrates the greenhouse effect. At the top, a bright orange circle labeled 'Sun' emits numerous rays of light, labeled 'Incoming solar radiation'. These rays travel downwards towards a cross-section of the Earth. The Earth is shown with a blue atmosphere and a green and blue surface. On the left, some rays are shown being reflected away from the Earth's surface and atmosphere, labeled 'Reflection (some of the incoming radiation is reflected by Earth's surface and the atmosphere back out to Space)'. In the center, most rays are shown hitting the Earth's surface and being absorbed, labeled 'Absorption (most radiation is absorbed by the Earth's surface and warms it)'. On the right, some rays are shown passing through the atmosphere and out into space, labeled 'Some heat passes out into Space'. Below the main diagram, there is a separate text box on the right that says 'Most heat is absorbed and re-emitted by greenhouse gas molecules, further warming Earth'.
