Going Trans European:

Strategy and Policy for Trans-European Networks D. Johnson, C. Turner, 2007-05-10 Through an integrative framework developed by the authors and drawn from international political economy and corporate strategy literature this book examines the interface between public policy and corporate strategy in network development within the context of the European Union's trans-European network TENs initiative Integrating Europe's Infrastructure Networks Turner, Colin, 2021-11-09 This timely book explores the long standing process of infrastructural integration across Europe with a particular focus on the EU member states It illuminates the main economic infrastructure sectors including transport energy and information examining how the process of infrastructural integration reflects an alignment of the needs of the states that are the main drivers behind this process **Megaregions** Catherine Ross, 2012-06-22 The concept of the city as well as the state and the nation state is passé agree contributors to this insightful book The new scale for considering economic strength and growth opportunities is the megaregion a network of metropolitan centers and their surrounding areas that are spatially and functionally linked through environmental economic and infrastructure interactions Recently a great deal of attention has been focused on the emergence of the European Union and on European spatial planning which has boosted the region's competitiveness Megaregions applies these emerging concepts in an American context It addresses critical questions for our future What are the spatial implications of local regional national and global trends within the context of sustainability economic competitiveness and social equity How can we address housing transportation and infrastructure needs in growing megaregions How can we develop and implement the policy changes necessary to make viable livable megaregions By the year 2050 megaregions will contain two thirds of the U S population Given the projected growth of the U S population and the accompanying geographic changes this forward looking book argues that U S planners and policymakers must examine and implement the megaregion as a new and appropriate framework Contributors all of whom are leaders in their academic and professional specialties address the most critical issues confronting the U S over the next fifty years At the same time they examine ways in which the idea of megaregions might help address our concerns about equity the economy and the environment Together these essays define the theoretical analytical and operational underpinnings of a new structure that could respond to the anticipated upheavals in U S population and living patterns **Go North!** Carsten Schymik, Valeska Henze, Jochen Hille, 2011-01-01 Hauptbeschreibung Go North was the programmatic title of an international conference on Baltic Sea Region Studies that took place at Humboldt University of Berlin from April 4-6 2005 It was hosted by the BalticStudyNet project which is part of the European Union's Erasmus Mundus programme for the global promotion of European higher education In order to discuss the past present and future of Baltic Sea Region Studies the Berlin conference brought together about fifty government representatives and scholars from all Baltic Sea Region countries including Russia as well as from the United Kingdom Switzerland the USA Canada Ukraine and Kyrgyzstan The basic idea of the Go North

conference was to encourage a fundamental change of perspective away from intra regional and towards extra regional and truly global approaches to the Baltic Sea Region How is the Baltic Sea region perceived when viewed let s say from Australia What if anything would a Chinese student find typical extraordinary or even unique when looking at the region Why should a scholar from Mexico South Africa or India wish to do research in and or about the Baltic Sea Region Consequently third country views on Europe s North and the Baltic Sea Region were a feature of many of the presentations and panel discussions during the conference which are documented in this volume

The Political Economy of Europe's Incomplete Single Market David Howarth,Tal Sadeh,2014-04-10 Progress in European market integration over the past two decades has come at the expense of growing flexibility or differentiation in the laws that govern the Single Market SM as well as the way that these laws are implemented This volume examines how the completion of the SM has been held back in the varied implementation of European Union competition policy variation in national policies on services corporate law telecommunications energy taxation and gambling and the EU s uneven transportation network These sectors and issue areas form the frontier at which the main political struggles over the future shape of the SM have taken place in the past decade Broadly progress in economic integration in the EU has been complicated by the need to reconcile perfections to the SM with the global competitiveness of European producers and efficiency gains with ideational and normative concerns In services there is a clash between deregulation and social policy Financial integration has had to reconcile different institutionalized views among the member states about the place of finance in the economy and society The SM notion supposedly entails a concrete set of substantive policy commitments that form the basis of the ever closer union However increasing differentiation in the SM undermines the identification of the EU s core constitutional commitments This book was published as a special issue of the Journal of European Public Policy

So You're Going to England! Clara Elizabeth Laughlin,1928

Rethinking European Spatial Policy as a Hologram Valeria Fedeli,2017-03-02 Bringing together case studies from several European countries this book provides an in depth examination of the evolution of European spatial policy Contributors focus on changes to the design and implementation of European policies at both national and local levels and examine institutional change particularly Europeanization European governance and EU enlargement Rhetorical discursive and representational dimensions are also interlinked to explore synergies and conflicts The volume offers an experimentation of new interpretative approaches to spatial planning which will prove essential to the international debate

European Business Debra Johnson,Colin Turner,2000 This textbook examines the increasing impact of the European Union on the European business environment addressing the core challenges facing enterprises in the formative years of the new millennium

U.S.-European Relations United States. Congress. House. Committee on Foreign Affairs. Subcommittee on Europe and the Middle East,1992

History, Memory, and Trans-European Identity Aline Sierp,2014-06-20 This book questions the presupposition voiced by many historians and political scientists that political

experiences in Europe continue to be interpreted in terms of national history and that a European community of remembrance still does not exist By tracing the evolution of specific memory cultures in two successor countries of the Fascist Nazi regime Italy and Germany and the impact of structural changes upon them the book investigates wider democratic processes particularly concerning the conservation and transmission of values and the definition of identity on different levels It argues that the creation of a transnational European memory culture does not necessarily imply the erasure of national and local forms of remembrance It rather means the creation of a further supranational arena where diverging memories can find their expression and can be dealt with in a different way Through the triangulation of agents of memory construction constraints and opportunities and actual portrayals of the past this volume explores the difficulties faced by a multinational entity like the EU in reaching some kind of consensus on such a sensitive subject as history

Mapping the Spatial Divisions of Europe Guy Baudelle,Emmanuelle Boulineau,2025-08-26 **Eating as I Go** Doris Friedensohn,2006-07-21 In an engaging series of memoir essays the author traverses countries and friendships examining the relationship between culture and food Library Journal What do we learn from eating About ourselves Others In this unique memoir of a life shaped by the pleasures of the table Doris Friedensohn uses eating as an occasion for inquiry Munching on quesadillas and kimchi in her suburban New Jersey neighborhood she reflects on her exploration of food over fifty years and across four continents Relishing couscous in Tunisia and khachapuri in the Republic of Georgia she explores the ways strangers come together and maintain their differences through food As a young woman Friedensohn was determined not to be a provincial American Chinese French Mexican and Mediterranean cuisines beckoned to her like mysterious suitors and each rendezvous with an unfamiliar food was a celebration of cosmopolitan living Friedensohn s memories range from Thanksgiving at a Middle Eastern restaurant to the taste of fried grasshoppers in Oaxaca Her wry dramas of the dining room restaurant market and kitchen ripple with tensions political religious psychological and spiritual Eating as I Go is one woman s distinctive m lange of memoir traveler s tale and cultural commentary Cost_Benefit Analysis and Incentives in Evaluation Massimo Florio,2007-10-26 This book provides an authoritative contribution to applied cost_benefit analysis CBA and other evaluation methods in the context of the regional policy of the European Union Through the use of Structural Funds and other financial and regulatory mec Subsidiarity and Economic Reform in Europe George Gelauff,Isabel Grilo,Arjan Lejour,2008-04-03 Subsidiarity in the European Union as the guiding principle of decision making close to the people is often motivated and discussed from a predominantly political perspective In this book experts draw the demarcation between national and European policies from an economic viewpoint Insights from economic theory and empirical research are used both to analyse the assignment of policies between the EU and its member states and to identify appropriate levels of decision making **Regulating Transport in Europe** Matthias Finger,Torben Holvad,2013-09-30 This book concerns the regulation of transport within a European context covering air inland waterways rail road passenger

and freight urban public transport and short sea shipping All these sectors have experienced substantial changes over the

Socialism Goes Global James Mark,Paul Betts,2022 The first work to provide a broad history of the relationship between Eastern Europe and the decolonising world ranging from the nineteenth to the late twentieth century At its core is the post 1945 period when socialism s importance as a globalising force accelerated and drew together what contemporaries called the Second and Third Worlds **Transport Issues and Problems in Southeastern Europe** Caralampo Focas,2017-11-22

The collapse of previous command economic structures in Eastern Europe has led to an often chaotic reorganization of transport operations Southeastern Europe in particular not only lags behind the western EU countries in terms of transport infrastructure but also in terms of management and policy However despite this or perhaps even because there are no long standing established patterns this region is a fertile territory for innovation Based on the first major international conference dealing with transport issues in Southeastern Europe this edited volume brings together key researchers and policy makers to discuss and critically analyse these innovations Focusing on issues related to privatization and harmonization of national legislation the contributors also address the countries struggle with inadequate management structures and the challenges posed in running shipping ports and railways in a region fragmented into numerous nations and states It not only provides an up to date overview of transport operations and planning in Southeastern Europe but also provides more general insights into recent and current developments in a region that has undergone widespread upheavals in the past two decades and is now experiencing renewed growth **Project and Policy Evaluation in Transport** Liana Giorgi,Alan Pearman,Annuradha

Tandon,Dimitrios Tsamboulas,2017-11-22 This title was first published in 2002 There is a multitude of assessment methods available for analyzing and reporting on the impacts of policies all with different underlying assumptions and a wide range of criteria Since the 1950s much research has gone into creating guidelines for policy analysis yet only a small percentage of evaluation has been carried out on transport policy and none by political scientists or social policy specialists The editors of this volume recognize that European integration has seen a drive to bring policy evaluation on to the transport agenda and has increased demands for strategic assessments It has become apparent that to gain a fuller understanding of the success of a transport programme a much more complex combination of analytical methods must be used and a set of guidelines specifically for the field of transport must be developed This book achieves this by bringing together a multidisciplinary team of analysts from throughout the EU to discuss in a much broader way the various types of assessment methods and how they can best be used to evaluate transport programmes and systems both individually and in combination **Handbook on**

Public Private Partnerships in Transportation, Vol II Simon Hakim,Robert M. Clark,Erwin A. Blackstone,2022-07-30

Second in a two volume set this book discusses the role of public private partnerships PPPs in global transportation infrastructure specifically focusing on roads bridges and parking To provide vital services in an era of shrinking government budgets public private partnerships have become an increasingly important part of travel infrastructure worldwide This book

describes and analyses the structure of various models of PPPs in several countries evaluating their effectiveness and drawing policy implications for future use The chapters were written by leading international researchers and practitioners in the transportation field where each chapter is a case study on the adoption implementation and outcome of transportation services Taken together these diverse case studies provide an integrated framework for evaluating using PPPs and suggesting policy implications to both the public and the private sectors in transportation Providing rigorous empirical analysis of PPPs in transportation this volume will be of interest to researchers in public administration political science public choice and economics as well as practitioners and policymakers involved in establishing and monitoring PPPs in transportation

Regional Development Banks in the World Economy Judith Clifton, Daniel Díaz Fuentes, David J. Howarth, 2021 Regional development banks RDB have become increasingly important in the world economy but have also been relatively under researched to date This timely volume addresses this lack of attention by providing a comprehensive comparative and empirically informed analysis of their origins evolution and contemporary role in the world economy through to the second decade of the twenty first century The editors provide an analytical framework that includes a revised categorization of RDB by geographic operation and function In part one the chapter authors offer detailed analyses of the origins evolution and contemporary role of the major RDB including the Inter American Development Bank the African Development Bank the Asian Development Bank the European Investment Bank the Central American Bank the Andean Development Corporation the European Bank for Reconstruction and Development and the Asian Infrastructure Investment Bank In part two the authors engage in comparative analyses of key topics on RDB examining their initial design and their changing business models their shifting role in promoting policies supported by the United States as hegemon and the private sector The volume ends with a critical reflection on the role played by RDB to date and a strong defence of the need for these banks in an increasingly complex world economy Publisher s description
