Forged in the crucible of tragedy, Batman quickly grew into one of the most popular and enduring characters in modern fiction. With his teenage partner, Robin, at his side, Batman has dedicated his life to fighting crime in whatever form it takes. In these thrilling adventures, the Dynamic Duo defends Gotham City from iconic villains like the Joker, Catwoman and the Penguin, and uncovers the identity of Thomas and Martha Wayne's killer! And when everyday crime-fighting just isn't enough, the Caped Crusaders' adventures take them back in time to meet Marco Polo and Leonardo Da Vinci, and even into the Viking Age! All this, plus the first appearances of the Riddler and the Mad Hatter.

This expansive collection gathers together for the first time the groundbreaking, classic Batman stories from the tail end of the 1940s, by legendary talents Bob Kane, Bill Finger, Dick Sprang, Jim Mooney and more!

*A Bridge to the Sky* Glair D. Anderson, 2024 A Caliphal Daedalus examines connections between science and visual culture during the early Islamic scientific revolution of the caliphal age 650 1250 CE It takes as its point of departure the figure of Abbas Ibn Firnas d 887 the most famous scientist and polymath of early Islamic Spain The book considers his scientific activities as these intersected with design and craft culminating in the aeronautics experiment for which he is best known today as these are recounted in the Muqtabis the chronicle compiled by the Cordoban court historian Ibn Hayyan d 1076 It calls into question notions that medieval Islamic artisans and designers were anonymous individuals working outside elite social and intellectual circles The key passages from the chronicle are presented in English translation including the oldest and most authoritative source for the aeronautics experiment The Arabic texts are examined in tandem with the earliest Islamic scientific instruments especially astrolabes and illustrated Arabic treatises of astronomy and engineering preserved in museums and libraries around the globe The book argues for a medieval Islamic court culture in which design and making were central to scientific intellectual pursuits and which may have shaped the culture of the Italian Renaissance

*The Industrial Revolution - Lost in Antiquity - Found in the Renaissance* Cort MacLean Johns, Ph.D.-HSG, 2021-02-18 Ever increasing research evidence continues to mount Having started my research on the connection of the Hydraulis to the roots of the more recent Industrial Revolution at the University of St Gallen in 1989 over 30 years ago I continue to identify additional

support for it We do not know whether the beginnings of an Industrial Revolution in Hellenistic Greece would have continued if not cut off by the Roman Empire's conquests Neither do we know whether the more recent latent Industrial Revolution could have risen up again in the 17th century without Vitruvius or Hero of Alexandria's preserved writings The point of this book is to emphasize with new findings that had the Romans not stopped the growth of science and technology in the Hellenistic Period that it would have likely continued to develop into a full fledged Industrial Revolution Secondly the more recent Industrial Revolution borrowed heavily on the technology and science of the Hellenistic Period In the true sense of the Renaissance 17th century industrial progress largely picked up the written remnants of Antiquity to be able to continue on after a centuries long caesura

**Piety in Pieces** Kathryn M. Rudy, 2016-09-26 Medieval manuscripts resisted obsolescence Made by highly specialised craftspeople scribes illuminators book binders with labour intensive processes using exclusive and sometimes exotic materials parchment made from dozens or hundreds of skins

inks and paints made from prized minerals animals and plants books were expensive and built to last They usually outlived their owners Rather than discard them when they were superseded book owners found ways to update amend and upcycle books or book parts These activities accelerated in the fifteenth century Most manuscripts made before 1390 were bespoke and made for a particular client but those made after 1390 especially books of hours were increasingly made for an open market in which the producer was not in direct contact with the buyer Increased efficiency led to more generic products which owners were motivated to personalise It also led to more blank parchment in the book for example the backs of inserted miniatures and the blank ends of textual components Book buyers of the late fourteenth and throughout the fifteenth century still held onto the old connotations of manuscripts that they were custom made luxury items even when the production had become impersonal Owners consequently purchased books made for an open market and then personalised them filling in the blank spaces and even adding more components later This would give them an affordable product but one that still smacked of luxury and met their individual needs They kept older books in circulation by amending them attached items to generic books to make them more relevant and valuable and added new prayers with escalating indulgences as the culture of salvation shifted Rudy considers ways in which book owners adjusted the contents of their books from the simplest add a marginal note sew in a curtain to the most complex take the book apart embellish the components with painted decoration add more quires of parchment By making sometimes extreme adjustments book owners kept their books fashionable and emotionally relevant This study explores the intersection of codicology and human desire Rudy shows how increased modularisation of book making led to more standardisation but also to more opportunities for personalisation She asks What properties did parchment manuscripts have that printed books lacked What are the interrelationships among technology efficiency skill loss and standardisation

**The Rise and Fall of Social Cohesion** Christian Albrekt Larsen, 2013-06-20 The book explores the ways in which social cohesion measured as trust in unknown fellow citizens can be established and undermined It examines the US and UK where social cohesion declined in the latter part of the twentieth century and Sweden and Denmark where social cohesion increased and aims to put forward a social constructivist explanation for this shift Demonstrating the importance of public perceptions about living in a meritocratic middle class society the book argues that trust declined because the Americans and British came to believe that most other citizens belong to an untrustworthy undeserving and even dangerous bottom of society rather than to the trustworthy middle classes In contrast trust increased amongst Swedes and Danes as they believed that most citizens belong to the middle of society rather than to the bottom Furthermore the Swedes and Danes came to view the perceived narrow bottom of their society as trustworthy deserving and peaceful The book argues that social cohesion is primarily a cognitive phenomenon in contrast to previous research which has emphasized the presence of shared moral norms fair institutions networks engagement in civil society etc The book is based on unique empirical data material where

American survey items have been replicated in the British Social Attitude survey and the Danish and Swedish ISSP surveys exclusively for this book It also includes a unique cross national study of media content covering a five year period in UK Sweden and Denmark It demonstrates how the bottom and the middle is differently constructed across countries

**Bosch and Bruegel** Joseph Leo Koerner,2023-10-17 A bold new interpretation of two northern Renaissance masters In this visually stunning and much anticipated book acclaimed art historian Joseph Koerner casts the paintings of Hieronymus Bosch and Pieter Bruegel in a completely new light revealing how the painting of everyday life was born from what seems its polar opposite the depiction of an enemy hell bent on destroying us Supreme virtuoso of the bizarre diabolic and outlandish

Bosch embodies the phantasmagorical force of painting while Bruegel through his true to life landscapes and frank depictions of peasants is the artistic avatar of the familiar and ordinary But despite their differences the works of these two artists are closely intertwined Bruegel began his career imitating Bosch s fantasies and it was Bosch who launched almost the whole repertoire of later genre painting But Bosch depicts everyday life in order to reveal it as an alluring trap set by a metaphysical enemy at war with God whereas Bruegel shows this enemy to be nothing but a humanly fabricated mask Attending closely to the visual cunning of these two towering masters Koerner uncovers art history s unexplored underside the image itself as an enemy An absorbing study of the dark paradoxes of human creativity Bosch and Bruegel is also a timely account of how hatred can be converted into tolerance through the agency of art It takes readers through all the major paintings drawings and prints of these two unforgettable artists including Bosch s notoriously elusive Garden of Earthly Delights which forms the core of this historical tour de force Elegantly written and abundantly illustrated the book is based on Koerner s A W Mellon Lectures in the Fine Arts a series given annually at the National Gallery of Art Washington Published in association with the Center for Advanced Study in the Visual Arts National Gallery of Art Washington DC Please note All images in this ebook are presented in black and white and have been reduced in size **Jesus** Tricia McCannon,2009-11-01 An account of Jesus life during his first thirty years where he was and what he learned before beginning his public ministry in Palestine Provided by publisher
