Books in Print Supplement ,1985 **Books in Print** ,1987 Electric Propulsion and Its Applications to Space Missions Robert C. Finke,1981 *Electric Propulsion Applications and Impacts* National Aeronautics and Space Administration,2018-12-31 Most space missions require on board propulsion systems and these systems are often dominant spacecraft mass drivers Presently on board systems account for more than half the injected mass for commercial communications systems and even greater mass fractions for ambitious planetary missions Anticipated trends toward the use of both smaller spacecraft and launch vehicles will likely increase pressure on the performance of on board propulsion systems The acceptance of arcjet thrusters for operational use on commercial communications satellites ushered in a new era in on board propulsion and exponential growth of electric propulsion across a broad spectrum of missions is anticipated NASA recognizes the benefits of advanced propulsion and NASA's Office of Space Access and Technology supports an aggressive On Board Propulsion program including a strong electric propulsion element to assure the availability of high performance propulsion systems to meet the goals of the ambitious missions envisioned in the next two decades The program scope ranges from fundamental research for future generation systems through specific insertion efforts aimed at near term technology transfer The On Board propulsion program is committed to carrying technologies to levels required for customer acceptance and emphasizes direct interactions with the user community and the development of commercial sources This paper provides a discussion of anticipated missions propulsion functions and electric propulsion impacts followed by an overview of the electric propulsion element of the NASA On Board Propulsion program Curran Frank M and Wickenheiser Timothy J Glenn Research Center NASA TM 107246 E 10295 NAS 1 15 107246 IAF 95 S 3 02 RTOP 242 70 02 **Enhancing Space Transportation : the NASA Program to Develop Electric Propulsion** ,1990 *Enhancing Space Transportation: The NASA Program to Develop Electric Propulsion* ,1990 Electric Propulsion Concepts Enabled by High Power Systems for Space Exploration National Aeronautics and Space Administration (NASA),2018-06-24 This paper describes the latest development in electric propulsion systems being planned for the new Space Exploration initiative Missions to the Moon and Mars will require these new thrusters to deliver the large quantities of supplies that would be needed to support permanent bases on other worlds The new thrusters are also being used for unmanned exploration missions that will go to the far reaches of the solar system This paper is intended to give the reader some insight into several electric propulsion concepts their operating principles and capabilities as well as an overview of some mission applications that would benefit from these propulsion systems and their accompanying advanced power systems Gilland James and Fiehler Douglas and Lyons Valerie Glenn Research Center NASA TM 2005 213371 AIAA Paper 2004 5690 E 14840 **The NASA Electric Propulsion Program** ,1996 **Enhancing Space Transportation** National Aeronautics and Space Administration (NASA),2018-07-02 The NASA Office of Aeronautics Exploration and Technology OAET supports a research and technology R and T program in
