Giri, Frank Sabath, Richard Hoad, 2020-03-31 This is the first book that comprehensively addresses the issues relating to the effects of radio frequency RF signals and the environment of electrical and electronic systems It covers testing methods as well as methods to analyze radio frequency The generation of high powered electromagnetic HPEM environments including moderate band damped sinusoidal radiators and hyperband radiating systems is explored HPEM effects on component circuit sub system electronics as well as system level drawing are discussed The effects of HPEM on experimental techniques and the standards which can be used to control tests are described The validity of analytical techniques and computational modeling in a HPEM effects context is also discussed Insight on HPEM effects experimental techniques and the standards which can be used to control tests is provided and the validity of analytical techniques and computational modeling in a HPEM effects context is discussed This book dispels myths clarifies good experimental practice and ultimately draws conclusions on the HPEM interaction with electronics Readers will learn to consider the importance of HPEM phenomena as a threat to modern electronic based technologies which underpin society and to therefore be pre emptive in the consideration of HPEM resilience *Sustainability and Health in Intelligent*

Buildings Riadh Habash, 2022-04-08 Sustainability and Health in Intelligent Buildings presents a comprehensive roadmap for designing and constructing high performance clean energy efficient buildings including intelligence capabilities underpinned by smart power 5G and Internet of Things technologies environmental sensors intelligent control strategies and cyber physical security This book includes a special emphasis on health pandemic resiliency that discusses strong engineering control strategies to respond and recover from infectious diseases like COVID 19 Sections cover the foundational aspects of healthy buildings with a special emphasis on assessing indoor environmental qualities In addition it introduces the necessary principles that assist engineers and researchers in understanding and designing buildings that meet health and sustainability goals Describes the basic elements of building a digital ecosystem along with informatics driven performance architecture Features various models used in the design of controllers for major systems such as HVAC and lighting Explores the notion of building bioelectromagnetics to ensure health and safety from human exposure to EM fields Formation and Control of Biofilm in Various Environments Hideyuki Kanematsu, Dana M. Barry, 2020-01-25 This book provides excellent techniques for detecting and evaluating biofilms sticky films on materials that are formed by bacterial activity and produce a range of industrial and medical problems such as corrosion sanitary problems and infections Accordingly it is essential to control biofilms and to establish appropriate countermeasures from both industrial and medical viewpoints This book offers valuable detailed information on these countermeasures It also discusses the fundamentals of biofilms relates various substrates to biofilms and presents a variety of biofilm reactors However the most important feature of this book unlike others on the market is its clear focus on addressing the practical aspects from an engineering viewpoint Therefore it offers an excellent practical guide for engineers and researchers in various fields and can also be used as a great academic textbook

Intelligent Buildings: An Introduction Derek Clements-Croome, 2013-10-08 This book introduces the concept of Intelligent Buildings to the wider construction community Edited by the Father of Intelligent Buildings Derek Clements Croome the book explains that intelligent buildings should be sustainable healthy technologically aware meet the needs of occupants and business and should be flexible and adaptable to deal with change This means the processes of planning design construction commissioning and facilities management including post occupancy evaluation are all important Buildings comprise many systems devised by many people and yet the relationship between buildings and people can only work satisfactorily if there is an integrated team with a holistic vision Creating the Productive Workplace Derek Clements-Croome, 2017-09-22 The built environment affects our physical mental and social well being Here renowned professionals from practice and academia explore the evidence from basic research as well as case studies to test this belief They show that many elements in the built environment contribute to establishing a milieu which helps people to be healthier and have the energy to concentrate while being free to be creative The health and well being agenda pervades society in many different ways but we spend much of our lives in buildings so they have an important role to play within this total picture This demands us to embrace change and

think beyond the conventional wisdom while retaining our respect for it Creating the Productive Workplace shows how we need to balance the needs of people and the ever increasing enabling technologies but also to take advantage of the healing powers of Nature and let them be part of environmental design This book aims to lead to more human centred ways of designing the built environment with deeper meaning and achieve healthier and more creative as well as more productive places to work

Intelligent Buildings Derek Clements-Croome,2004 Intelligent buildings provide stimulating environments for people to work and live in This book brings together a body of the latest knowledge about design management technology and sustainability set against the background of developments in the cultural landscapes which affect those living and working in buildings
