Trade in Endangered Species focuses attention on the plight of endangered wild flora and fauna as well as the specific illegal acts committed against them that have long and largely been ignored by criminology. The author provides a fresh look at the topic by presenting it within a crime reduction framework, an approach rarely taken by those with traditional criminological or conservation backgrounds, demonstrating how an innovative strategy to reduce illegal market activities can simultaneously further the conservation of these endangered species. International treaties, national and domestic laws, and international policing efforts pertaining to crimes involving endangered species are also examined.

Elephant Tourism in Nepal

Michelle Szydlowski, 2024-02-01. A study of elephant tourism in Nepal from its origins in the 1960s to the present day, this book examines the challenges faced by captive elephants. Used as human conveyance, on anti-poaching patrol teams, as rescue vehicles, and in forestry service, elephants have worked with and for humans for hundreds of years. However, the use of elephants in tourism is a fairly new development within Nepal. Because the health and welfare of tourism elephants is vital to the conservation of wild individuals, this book offers an assessment of captive elephant needs and an examination of their existing welfare statuses. This book seeks to examine the motivations of these NGOs and INGOs and to consider their ethical approaches to elephant health and welfare. Are the motivations of these organizations similar enough to work together towards a common goal, or are their ethical norms so different that they get in one another's way? Using an ordinary language and ethics framework, this text aims to identify the norms of cultures and organisations and reframe them in ways which may allow for more successful interactions.

Indigenous Heritage and Identity of the Last Elephant Catchers in

Northeast Thailand

Alisa Santikarn, 2025-10-01. In 2019, when Mew Salangam passed away at 91, newspapers across Thailand described him as belonging to the last generation of elephant doctors. Mew was a member of the Kui Ajiang community in Thailand, an Indigenous group living in the Northeast, known for catching elephants. Sometime beginning in the 1950s, this practice gradually came to an end. Indigenous Heritage and Identity of the Last Elephant Catchers in Northeast

Thailand examines how the end of elephant catching has affected the heritage and identity of the Kui Ajiang offering an analysis that calls for close attention to the broader currents of Thai history and the development of Thai environmental and cultural heritage policies Furthermore the term Authorised Environmental Discourse AED is introduced in tandem with Laurajane Smith's Authorised Heritage Discourse AHD to portray how heritage embedded in nature and culture reflects impacts of political authority and how a community responds to threats of loss and challenges to the authenticity of its traditions

Transportation and Revolt Jacob Shell, 2015-07-10 How political regimes have responded when certain modes of transportation from carrier pigeons to canal boats have been associated with politically subversive activities During World War I German soldiers shot down carrier pigeons for fear the birds were carrying enemy communiqués in Mexico the United States and other countries

mules were used for smuggling and secret travel in mountainous areas in the British Empire in the late nineteenth and early twentieth centuries the British feared that supplies for anti imperialist rebellion were being transported by canal In this book Jacob Shell argues that many political regimes have historically associated certain modes of transportation with revolt or with subversive activities and have responded by acting to destroy or curtail those modes of transportation Constructing a conceptual framework linking physical geography with the politics of mobility Shell presents historical examples of the secret subversive mobilization of people and cargo across watery spaces and harsh terrain carried by watercraft and transport animals including pigeons mules camels elephants and sled dogs Efforts to suppress such clandestine mobilities ranged from the violent the shooting of pigeons to the indirect curtailing financial support certain kinds of social knowledge or schemes for infrastructural development To show how such efforts at immobilization could affect cities and urban transportation Shell looks at the Port of New York in the early twentieth century where potentially transformative plans for inner city freight transportation were rejected likely Shell argues due to fears of anarchist activities The innovative argument advanced by Shell in *Transportation and Revolt* challenges conventional wisdom about the supposed obsolescence of transport methods that have become marginalized in the modern era

Elephants & Kings Thomas R.

Trautmann,2015-08-03 Because of their enormous size elephants have long been irresistible for kings as symbols of their eminence In early civilizations such as Egypt Mesopotamia the Indus Civilization and China kings used elephants for royal sacrifice spectacular hunts public display of live captives or the conspicuous consumption of ivory all of them tending toward the elephant s extinction The kings of India however as Thomas R Trautmann shows in this study found a use for elephants that actually helped preserve their habitat and numbers in the wild war Trautmann traces the history of the war elephant in India and the spread of the institution to the west where elephants took part in some of the greatest wars of antiquity and Southeast Asia but not China significantly a history that spans 3 000 years and a considerable part of the globe from Spain to Java He shows that because elephants eat such massive quantities of food it was uneconomic to raise them from birth Rather in a unique form of domestication Indian kings captured wild adults and trained them one by one through millennia Kings were thus compelled to protect wild elephants from hunters and elephant forests from being cut down By taking a wide angle view of human elephant relations Trautmann throws into relief the structure of India s environmental history and the reasons for the persistence of wild elephants in its forests
