Cultures of International Exhibitions 1840-1940 Marta Filipová, 2017-07-05 Beyond the great exhibitions expositions universelles and world fairs in London Paris or Chicago numerous smaller yet ambitious exhibitions took place in provincial cities and towns across the world Focusing on the period between 1840 and 1940 this volume takes a novel look at the exhibitionary cultures of this period and examines the motivations scope and impact of lesser known exhibitions in for example Australia Japan Brazil as well as a number of European countries The individual case studies included explore the role of these exhibitions in the global exhibitionary network and consider their marginality related to their location and omission by academic research so far The chapters also highlight a number of important issues from regional or national identities the role of modernisation and tradition to the relationship between capital cities and provincial towns present in these exhibitions They also address the key topic of colonial exhibitions as well as the displays of arts and design in the context of the so called marginal fairs

Cultures of International Exhibitions 1840 1940 Great Exhibitions in the Margins therefore opens up new angles in the way the global phenomenon of a great exhibition can be examined through the prism of the regional and will make a vital contribution to those interested in exhibition studies and related fields
