Seeking Shadows in the Sky Patricia D. Hoffman,2001 This study analyzes the feasibility of guerrilla warfare as the basis for a strategy of airpower employment for a weak air force confronting an opponent with a stronger air force The analysis begins with a distillation of the theory of guerrilla warfare into five elements essential to its success superior intelligence security mobility advantage surprise and sustainment The author then compares the ground combat environment of the traditional guerrilla with the airpower environment of the potential air guerrilla and concludes that these five elements can be met in the airpower environment provided the weak force has sufficient ingenuity and the necessary resources An investigation of recent trends in technology and the prevailing strategic environment indicates that it increasingly possible

for a weak force to obtain these resources The author assesses that air guerrilla warfare is a viable warfighting strategy but points out that the likelihood of a weak force actually adopting air guerrilla warfare will depend on its regional security needs and its resolve to protract a conflict The study concludes that air guerrilla warfare is a credible threat to a stronger opponent To meet this threat the author recommends that the United States re examine its intervention strategy reinforce its policy of strategic engagement and research both airpower and non airpower means to neutralize an elusive guerrilla air force DTIC
