in Japan discourse on culture turned sharply inward after generations of openness to Western ideas The characterizations that arose that Japanese culture is unique essential and enduring came to be accepted both inside and outside Japan Leslie Pincus focuses on the work of Kuki Shuzo a philosopher and the author of the classic *Iki no Kozo* to explore culture and theory in Japan during the interwar years She shows how Japanese intellectual culture ultimately became complicit even instrumental in an increasingly repressive and militaristic regime that ultimately brought the world to war Pincus provides an extensive critical study of Kuki's intellectual lineage and shows how it intersects with a number of central figures in both European and Japanese philosophy The discussion moves between Germany France and Japan providing a guide to the development of culture in a number of national settings from the turn of the century to the 1930s Inspired by the work of Foucault the Marxist culturalists and the Frankfurt School Pincus reads against the grain of traditional interpretation Her theoretically informed approach situates culture in a historical perspective and charts the ideological dimensions of cultural aesthetics in Japan *Authenticating Culture in Imperial Japan* makes an important contribution to our understanding of modernity nationalism and fascism in the early twentieth century During the interwar years in Japan discourse on culture turned sharply inward after generations of openness to Western ideas The characterizations that arose that Japanese culture is unique essential and enduring came to be accepted both inside and out

The Culture of Copying in Japan Rupert Cox,2007-09-12 This book challenges the perception of Japan as a copying culture through a series of detailed ethnographic and historical case studies It addresses a question about why the West has had such a fascination for the adeptness with which the Japanese apparently assimilate all things foreign and at the same time such a fear of their skill at artificially remaking and automating the world around them Countering the idea of a Japan that deviously or ingenuously copies others it elucidates the history of creative exchanges with the outside world and the particular myths philosophies and concepts which are emblematic of the origins and originality of copying in Japan The volume demonstrates the diversity and creativity of copying in the Japanese context through the translation of a series of otherwise loosely related ideas and concepts into objects images texts and practices of reproduction which include shamanic theatre puppetry tea utensils Kyoto town houses architectural models genres of painting calligraphy and poetry sample food displays and the fashion and car industries

National Culture and the New Global System Frederick Buell,1994-09 The three worlds theory is perhaps still the basis for our dominant assumptions about geopolitical and geocultural order writes Frederick Buell but its hold on our imagination and faith is passing fast In its place a startlingly different model the notion that the world is somehow interconnected into a single system has emerged expressing the perception that global relationships constitute not three separate worlds but a single network In the wake of disillusionment with anticolonial nationalism and in response to a wide variety of economic political demographic and technological changes Buell argues we have come increasingly to view the world as complexly interconnected In National Culture and the New Global System he considers how the notion of national culture has been conceived and reconceived in the postwar period For much of the period the three world theory provided economic political and cultural models for mapping a world of nation states More recently new notions of interconnectedness have been developed ones that have had profound and sometimes

startling effects on cultural production and theory Surveying recent cultural history and theory Buell shows how our understanding of cultural production relates closely to transformations in models of the world order
