soldiers women civic duty and the military in the USA the Hindu Right in India power agency and representation in Zimbabwe political identity and heterosexism This timely volume is a highly valuable resource for students and scholars of Nationalism Internationalism Studies and Women s Studies *From Eve to Dawn: A History of Women in the World Volume II* Marilyn French, 2008-04-01 Filled with fascinating detail this second volume of French s massive and valuable work is an example of scholarship and clear vision Publishers Weekly This volume of New York Times bestselling author Marilyn French s monumental history analyzes and evaluates the lives of women in societies around the world between feudal times and the French Revolution Drawing upon fifteen years of collaboration with a team of researchers and prominent historians the volume opens with fascinating chapters comparing medieval Europe and Japan disparate cultures which nevertheless shared traditions of male dominated aggression and competitiveness French then shows how in Europe this tradition led to colonialism and imperialism and the horrific subjugation of indigenous societies just as women were subjugated in the conquerors home countries As French makes clear in this impassioned women s history only with the French Revolution did the political force women exerted powerfully change the course of history French gives us grand theory at its best wading through copious amounts of scholarly data on the histories of civilizations and offering up in readable prose an important synthesis Library Journal *The Welfare State Generation* Eve Worth, 2021-12-16 Women born in mid twentieth century Britain were the welfare state generation not only were their lives fundamentally shaped by the welfare state they helped to transform it In this ground breaking work Eve Worth examines the impact of the welfare state on the life course of women whose opportunities and social experiences were formed by it in the post 1945 period Centred around an oral history study this book argues that the welfare state was so central to the lives of women born in Britain between the late 1930s and early 1950s that they should be considered the welfare state generation The post war expansion of the welfare state was one of the most transformative political changes of the twentieth century yet we know little about its development in practice nor its long term impact on those who grew up within it Using a ground breaking life history methodology to examine women from their birth in the long 1940s to retirement in the mid 2010s it includes thirty six original life history interviews alongside social surveys and the Census for wider context By deploying a cross class approach this book moves the discussion on from just looking at university educated women to include women often overlooked in gender and social studies Reconceptualising the causes of social mobility in post war Britain exploring a new understanding of work and an updated periodisation of welfare state development *The Welfare State Generation* offers a new approach to the history of class and gender arguing that we need to move beyond the focus on women s emotions and personal identity to consider their experiences and relationships with the state as employer educator and provider **Women & Aging** Helen Ripplier Wheeler, 1997 Guide with more than two thousand bibliographic entries and cross references It includes journal articles book chapters essays and doctoral dissertations as well as complete books **A London Bibliography of the Social Sciences**

It is built around a representative cohort of 750 men who were recorded in the 1851 census as practising a profession in eight British provincial towns with distinctive economic and social profiles Brighton Bristol Dundee Greenock Leeds Merthyr Tydfil Winchester and the twin county town of Northumberland Alnwick Morpeth The book provides a collective account of the cohort's lives and the lives of their families across four generations starting with their parents and ending with their grandchildren It touches on the history of 16 000 individuals The book aims to throw light on the extent to which nineteenth century professionals had a distinctive socio cultural profile as sociologists and some historians have claimed or were largely indistinguishable from other members of propertied society as most historians today assume without further investigation In exploring this question particular attention is paid to the cohort families wealth household size education occupational history geographical mobility and broader involvement in society measured by their members choice of marriage partner their kinship and friendship circles their political allegiance and their leisure activities The book demonstrates that male professionals in the Victorian era were far from being a homogenous group but were divided in many ways The most important was wealth which played a key role in the social and occupational fortunes of their descendants These divisions largely explain why some professionals and some individual professions were much more likely to display endogenous characteristics than others The book also demonstrates that even the most successful professional families got poorer over time and reveals how easily in the age of industrialisation branches of families and sometimes complete families could drop out of the elite
