Giroux,2003-05-12 Henry Giroux continues his critique of American culture and the way it impinges on the lives of our children This time Henry goes further looking at the Bush Restoration years the attacks of September 11th and the way the world has been transformed for our children and young adults *The United Nations and Higher Education* Kevin

Kester,2020-04-01 In this book Kevin Kester details how the United Nations promotion of higher education for peace and international understanding sometimes unintentionally contributes to the reproduction of conflict and violence across diverse cultures He shows this through an indepth examination of peace curricula pedagogy and policy in one United Nations higher education institution where he indicates how dominant philosophical and pedagogical models that signify acceptable peace education ultimately undermine the very goals of educational peacebuilding Kester contends that theoretical and pedagogical training must develop beyond the dominant psycho social rational and state centric assumptions that permeate the field today if higher education is to better contribute to personal and societal peacebuilding Drawing from the fields of educational philosophy and sociology he argues for new concepts of poststructural violence and second order reflexivity that can assist scholars in reducing conflict and building peace in lasting ways He complements his fieldwork findings with personal reflections throughout the book to reimagine the transformative possibilities of peacebuilding education for the 21st century

Greece Turkey Poland and Hungary **International Handbook of Educational Change** Andy Hargreaves,A. Lieberman,M. Fullan,D.W. Hopkins,1998-05-31 The International Handbook of Educational Change is a state of the art collection of the most important ideas and evidence of educational change The book brings together some of the most influential thinkers and writers on educational change It deals with issues like educational innovation reform restructuring culture building inspection school review and change management It asks why some people resist change and what their resistance means It looks at how men and women older teachers and younger teachers experience change differently It looks at the positive aspects of change but does not hesitate to raise uncomfortable questions about many aspects of educational change either It looks critically and controversially at the social economic cultural and political forces that are driving educational change School leaders system administration teacher leaders consultants facilitators educational researchers staff developers and change agents of all kinds will find this book an indispensable resource for guiding them to both classic and cutting edge understandings of educational change no other work provides as comprehensive coverage of the field of educational change Power and Moral Education in China Wangbei Ye,2014-04-15 Chinese moral education reform in the last three decades represents the most significant decentralization of decision making power since the foundation of People s Republic of China in 1949 On one hand it shows how de politicized China s moral education curriculum has become following the introduction of China s Open door policy and economic reforms and the resultant social transformations On the other hand it reveals persistent problems in moral education caused by political stresses and tight state control To explain these tensions Power and Moral Education in China analyzes the characteristics of power relationships in school moral education curriculum goal setting content and pedagogy selection and implementation The ultimate purpose is to identify not only what factors impact Chinese moral education curriculum decision making at the school level but also how and why Through a multiple case study conducted during 2008 in three schools in Shenzhen City and based on four major data collection instruments observation interview questionnaire and document review Wangbei Ye analyzes how power relationships have evolved in school moral education and how and why school power affects school moral education Contrary to the common belief that Chinese schools are passively impacted by external forces in moral education curriculum development this book suggests that school power is a semi emancipatory relationship that acts as a major force shaping moral education This means that although both the Chinese Communist Party and the state are positioned to control schools and moral education schools nonetheless have the power to either negotiate for more influence or partly emancipate themselves by collaborating with other external forces responding to grass root needs empowering school teachers and adjusting internal school management style This helps to explain the influence of Chinese schools in moral education and suggests a broader theory of power relationships in curriculum **Seeking Integrity in Teacher Education** Ann Katherine Schulte,2008-11-01 In this book a teacher educator examines her practice as a way of learning about teaching as well as challenging teacher education

It is about how one teacher educator sought to transform the perspectives of her student teachers in order to better prepare them to teach diverse populations of students while challenging her own beliefs about how best to do that The author seeks integrity in her practice defined as her ability to enact what she teaches preservice teachers to do In particular this book is a self study that contributes to understanding the broader question How much can one affect and change the discourse within education when one also inhabits the characteristics that are privileged by the institution The teacher education literature supports the need to study this type of self reflection Other researchers have pointed out that the role of teacher educators cultural identities in reforming education has been largely ignored in the literature This book offers a unique perspective on the analogous relationship involved when a teacher educator teaches teachers how to examine the impact of their own identities on their teaching while examining that herself *The Quest for Equity in Higher Education* Beverly Lindsay, Manuel J. Justiz, 2001-08-16 A critical examination of current sociopolitical issues surrounding equity and diversity and their impact on higher education *The Handbook of Dewey's Educational Theory and Practice* Charles L. Lowery, Patrick M. Jenlink, 2019-08-05 In the last twenty five years there has been a great deal of scholarship about John Dewey s work as well as continued appraisal of his relevance for our time especially in his contributions to pragmatism and progressivism in teaching learning and school learning The Handbook of Dewey s Educational Theory and Practice provides a comprehensive accessible richly theoretical yet practical guide to the educational theories ideals and pragmatic implications of the work of John Dewey America s preeminent philosopher of education Edited by a multidisciplinary team with a wide range of perspectives and experience this volume will serve as a state of the art reference to the hugely consequential implications of Dewey s work for education and schooling in the 21st century Organized around a series of concentric circles ranging from the purposes of education to appropriate policies principles of schooling at the organizational and administrative level and pedagogical practice in Deweyan classrooms the chapters will connect Dewey s theoretical ideas to their pragmatic implications **Handbook of Research on Transnational Higher Education** Mukerji, Siran, 2013-08-31 The integration of new technology and global collaboration has undoubtedly transformed learning in higher education from the traditional classroom setting into a domain of support services academic programs and educational products which are made available to learners The Handbook of Research on Transnational Higher Education is a unique compilation of the most recent research done by higher education professionals in the areas of policy governance technology marketing and leadership development This publication succeeds in highlighting the most important strategies and policies for professionals policymakers administrators and researchers interested in higher education management **Stealing Innocence** NA NA, 2016-04-30 Continuing his ongoing social critique Henry Giroux now looks at the way corporate culture is encroaching on the lives of children by exploring three myths prevalent in our society that the triumph of democracy is related to the triumph of the market that children are unaffected by power and politics that teaching and learning are no longer linked to improving

the world Looking at childhood beauty pageants school shootings and the omnipresent nihilistic chic of advertising Giroux paints a disturbing picture of the world surrounding our children Ultimately he turns to the work of Antonio Gramsci Paulo Freire and Stuart Hall for lessons about how we can reinstitute a realistic childhood for our children **Understanding Curriculum** William F. Pinar, 1995 Perhaps not since Ralph Tyler's 1949 Basic Principles of Curriculum and Instruction has a book communicated the field as completely as Understanding Curriculum From historical discourses to breaking developments in feminist poststructuralist and racial theory including chapters on political theory phenomenology aesthetics theology international developments and a lengthy chapter on institutional concerns the American curriculum field is here It will be an indispensable textbook for undergraduate and graduate courses alike **The Praeger Handbook of Urban Education** Philip M. Anderson, Kecia Hayes, Joe Kincheloe, Karel Rose, 2006-03-30 Maintaining that urban teaching and learning is characterized by many contradictions this work proposes that there is a wide range of social cultural psychological and pedagogical knowledge urban educators must possess in order to engage in effective and transformative practice It is necessary for those teaching in urban schools to be scholar practitioners rather than bureaucrats who can only follow rather than analyze understand and create Ten major sections cover the myriad issues of urban education as it exists today
