*How to Use Technology in the Classroom?* Mohamed A. Ansary, In this short e book I shed light on the top tech tools that I rely on in my classes on a daily basis I encourage you to try them and you will notice in a short period of time how effective these tools are They will change your vision and philosophy of how you teach and how you trace the development of your students in a very interactive and engaging way Do we really need to use technology based tools in our language classrooms Absolutely It's because students of this age are digital natives while we teachers and parents are digital immigrants That's why we have to know how to deal with those digital natives who are being raised acquiring technology as they acquire a language However technology based tools change over time or become obsolete What we use now may be replaced by a new tool next year Who still remembers the chatting software icq Why did aol lost its fame Do you still remember the Hotmail messenger It was number 1 years ago but now no one even remembers it The bottom line here is that although tech tools change or disappear pedagogical goals and principles hardly change That's why we need to choose the tools that fit the context and serve our goals and principles We also need to adapt to changing technology to fulfill our pedagogical needs With that being said let me raise a question that may be in your minds right now What technology based tools do you use for

increasing your students engagement collaboration interaction multiple literacies in your classroom Tools are abundant but the ever increasing number of tools and free multimedia software can be confusing and even daunting for teachers Choosing an appropriate technology based tool to use in and out of the classroom should not be random Every tool that the teacher uses should serve a specific and clear goal Let me name some of the tools that I basically rely on in my classes These tools can be used by k 16 teachers to engage their students in and out of the classroom They can also use these tools to integrate culture into the classroom Some other tools will serve how to increase students multiple literacies to support their intercultural competence It is worth mentioning that all these tools and strategies address the 21st century skills and ACTFL standards Learning First, Technology Second Liz Kolb, 2017-03-30 Learning First Technology Second offers teachers a classroom tested easy to use framework to help them move from arbitrary uses of technology to thoughtful ways of adding value to student learning Learning with technology doesn't happen because a specific tool revolutionizes education It happens when proven teaching strategies intersect with technology tools and yet it's not uncommon for teachers to use a tool because it's fun or because the developer promises it will help students learn This book includes An introduction to the Triple E Framework that helps teachers engage students in time on task learning enhance learning experiences beyond traditional means and extend learning opportunities to bridge classroom learning with students everyday lives Effective strategies for using technology to create authentic learning experiences for their students Case studies to guide appropriate tech integration A lesson planning template to show teachers how to effectively frame technology choices and apply them in instruction The companion jump start guide based on this book is Engage Enhance Extend Start Creating Authentic Lessons With the Triple E Framework Audience K 12 classroom teachers *A Teacher's Guide to Online Learning* Lindy Hockenbary, 2021-06 Are you a K 12 educator who is teaching students over the internet with no face to face interaction Online learning presents new challenges Author Lindy Hockenbary does not sugarcoat the fact that online learning is different than face to face learning She tackles the most common questions of new online instructors including How do you engage learners in a virtual environment How do you develop relationships with students whom you never see in person What does classroom management even look like in an online class How do you assess students when there is no way to know if they are looking up all the answers How do you ensure clear communication since you cannot stand over a learner's shoulder and ensure a task is accomplished How do you communicate with and support the families of online learners How do you ensure equity when students are never in the same physical space This book addresses each of these questions head on by presenting key takeaways to guide online learning design Lindy brings her experience as a classroom teacher and instructional technologist to create a clear picture of online learning strategies Other classroom teachers school leaders and instructional technologists have contributed to the book to provide a well rounded perspective on the topic of online learning This book was designed with K 12 teachers in mind but the majority of information can be applied to higher education

postsecondary learning environments as well
