*Eliminating Racial Profiling in School Discipline* Martha R. Bireda, 2002 Referrals suspensions and expulsions of African American students especially males are at an all time high However as this book shows culturally determined assumptions and friction over communication have a role to play in this as well *Eliminating Racial Profiling in School Discipline* is designed to make readers aware of how cultural factors relate to the ways that discipline is meted out Administrators and teachers will gain an understanding of how culturally conditioned beliefs and assumptions negatively influence student teacher relationships Ultimately this book proposes a set of strategies to solve increased disciplinary referrals *Cultures in Conflict* Martha R. Bireda, 2010-01-16 The suspension and expulsion of ethnic minority students especially African American males remains a critical issue in schools today This book addresses the root causes of racial disparity in discipline Dr Bireda shows how culturally conditioned beliefs and cultural misunderstanding negatively impact teacher student relationships and interactions in the classroom In addition factors in the school climate that may precipitate and escalate disciplinary events are examined Ultimately *Cultures In Conflict* provides a framework which assists administrators and teachers in establishing a dialogue on issues related to race and culture and provides a set of strategies for reducing disciplinary events and referrals

**School Counseling for Black Male Student Success in 21st Century Urban Schools** Malik S. Henfield, Ahmad R. Washington, 2015-11-01 Discussions and research related to the salience of Black male student needs and development in relation to their general success and well being is well documented in many fields Indeed many studies have found that healthy masculine identity development is associated with a number of positive outcomes for males in general including Black males In school counseling literature however this discussion has been relatively absent particularly regarding those students living in urban contexts Indeed research devoted to the study of Black males in the school counseling literature focuses almost exclusively on race and issues associated with its social construction with only cursory if any attention given to their masculine identity development as a function of living in urban communities and attending urban schools Based on this lack of information it is probably a safe assumption that intentional systematic culturally relevant efforts to assist Black males in developing healthy achievement and masculine identities based on their unique personal social academic experiences and future career goals are not being applied by school counselors concerned

with meeting students needs School counselors are in a unique position nonetheless to lend their considerable expertise insights training and skills to improving life outcomes among Black males a population who are consistently in positions of risk according to a number of quality of life indicators Without knowledge and awareness of Black males masculine identity development in urban areas coupled with the requisite skills to influence the myriad factors that enhance and impede healthy development in such environments they are missing out on tremendous opportunities which other professions appear to understand and quite frankly seem to take more seriously As such this book proposes to accomplish two specific goals 1 Highlight the plight of Black males with specific emphasis on the ecological components of their lives in relation to current school culture and trends 2 Encourage school counselors to give more thought to Black male identity development that takes into consideration differential experiences in society as a whole and schools in particular as a function of the intersection of their race as well as their gender The first rationale for this book then is to highlight the plight of Black males with specific emphasis on the ecological components of their lives in relation to current school culture and trends e g standards based accountability practices in urban environments However I recognize the role of school counselors has never been fully integrated into educational reform programs As such their positions are often unregulated and determined by people in positions of power who do not understand their training job specific standards and thus potential impact on the lives of Black male students As a result their vast potential to develop strong interventions designed to address the myriad racial and masculine factors that serve to enhance and impede Black males academic achievement is often unrealized Therefore the second reason for this special issue is to include the scholarship of professional school counselors and counselor educators with policy change in mind Scholars will be invited to contribute manuscripts that explore race masculinity and academic achievement in relation to the role of school counselors This is designed to encourage school counselors and counselor educators to give more thought to Black male identity development that takes into consideration differential experiences in society as a whole and schools in particular as a function of the intersection of their race as well as their gender Still Not Equal M. Christopher Brown, 2007 Still Not Equal Expanding Educational Opportunity in Society addresses the successes and failures of Brown v Board of Education and the Civil Rights Act of 1964 as well as the continuing challenge of expanding educational opportunity in the United States and across the Black diaspora The educational political and social influence resulting from Brown the Civil Rights Act and their progeny have shaped the dynamics of the collective educational and social experiences of people of color Notwithstanding the obstacles barriers and enablers of educational occupational and economic status outcomes impact the formation and interpretation of public policy specifically and public perception generally about racialized notions of schooling and learning The pursuit of educational access attendance and attainment is intertwined with the implications of academic research and public policy to improve local practices in school settings Inasmuch as a diverse research agenda priorities and activities become situated to critically address status and attainment

outcomes in education from preschool through adulthood for African Americans in the United States and abroad the resulting complexities in education and other settings will continue to behave in ways that cross racial lines

*Profiling and Criminal Justice in America* Jeff Bumgarner,2014-12-16 An unbiased examination of profiling in the criminal justice system one of the most hotly contested public policy issues on the streets in the courts and in the jails and prisons of America In the post 9 11 world profiling by law enforcement has become standard operating procedure Profiling by prosecutors judges and corrections officers is pervasive in other criminal justice contexts as well Is profiling actually effective in preventing crime or identifying likely offenders and therefore justifiable This accessible single volume reference book examines profiling as it pertains to the criminal justice system in the United States providing non partisan information that illuminates the full scope of the profiling issue and discusses the possible impact of profiling on all American citizens Addressing this highly controversial topic holistically the book considers questions such as whether the criminal justice system in the United States unfairly targets minorities how the rights of minorities can be protected while enabling law enforcement to use every resource available and whether justification for profiling techniques exists This work will serve students at the high school and college level as well as general readers who are interested in criminal justice issues and issues relating to equality and fairness before the bar of justice

*The Pursuit of Racial and Ethnic Equality in American Public Schools* Kristi L. Bowman, 2014-12-19. In 1954 the Supreme Court decided *Brown v Board of Education*; ten years later Congress enacted the Civil Rights Act. These monumental changes in American law dramatically expanded educational opportunities for racial and ethnic minority children across the country. They also changed the experiences of white children who have learned in increasingly diverse classrooms. The authors of this commemorative volume include leading scholars in law, education, and public policy, as well as important historical figures. Taken together, the chapters trace the narrative arc of school desegregation in the United States, beginning in California in the 1940s, continuing through *Brown v Board*, the Civil Rights Act, and three important Supreme Court decisions about school desegregation and voluntary integration in 1974, 1995, and 2007. The authors also assess the status of racial and ethnic equality in education today and consider the viability of future legal and policy reform in pursuit of the goals of *Brown v Board*. This remarkable collection of voices in conversation with one another lays the groundwork for future discussions about the relationship between law and educational equality, and ultimately for the creation of new public policy. A valuable reference for scholars and students alike, this dynamic text is an important contribution to the literature by an outstanding group of authors.

**Common Threads** Anthony P. Barber, Jeffrey Ulmer, 2013-10-16. School safety is paramount in today's educational system. Now more than ever, the need to be proactive and systematic when it comes to handling even the most minor infractions in schools must be required, as demonstrated by the tragic events of recent school violence. An administrator's work revolves around investigating whether it involves issues with parents or students, disciplinary incidents, or teacher situations. Being able to investigate in a non-biased and systematic manner is paramount for success. Yet despite this premise, guidance for new and experienced administrators concerning how to investigate an incident is limited at best. *Common Threads* is a straightforward, practical guide for administrators in the job or professors to use as a guide for principal preparatory training.
