Rise of the Modern Hospital Jeanne Kisacky, 2017-12-02 *Rise of the Modern Hospital* is a focused examination of hospital design in the United States from the 1870s through the 1940s This understudied period witnessed profound changes in hospitals as they shifted from last charitable resorts for the sick poor to premier locations of cutting edge medical treatment for all classes and from low rise decentralized facilities to high rise centralized structures Jeanne Kisacky reveals the changing role of the hospital within the city the competing claims of doctors and architects for expertise in hospital design and the influence of new medical theories and practices on established traditions She traces the dilemma designers faced between creating an environment that could function as a therapy in and of itself and an environment that was essentially a tool for the facilitation of increasingly technologically assisted medical

Organizations, 1881-1999 Elizabeth V. Burt, 2000-06-30 Little has been published about press organizations and even less about women's press organizations. This book is the first to document the history of women's press organizations. In addition to rich historical accounts of some of these organizations, it also provides a picture of many of the women journalists involved in these press organizations, many of whom were leaders both in journalism and in the social movements of their time. This book is a description and analysis of forty women's press organizations that have been key to the development of women writers of the press since the first established organization in 1881. Each entry describes the challenges faced by women that brought about the establishment of the organization at that particular time and place, some of the women who played key roles in the group's leadership, the group's major activities and programs, and its contributions to women of the press. The main purpose of these organizations was to provide women with a place where they could discuss professional issues and career strategies at a time when they were largely excluded from or marginalized by male-dominated media institutions. However, many also reflected the interests of some of the social and political reform movements associated with the women's movements of the 19th and 20th centuries, including the woman suffrage, peace, and ERA movements. Although some of the organizations described here no longer exist, new ones have taken on the challenge in a profession where women still do not have equity.
