Body

Utopianism Franziska Bork Petersen,2022-07-04 This book investigates how desires to transform our bodies can bring utopia to the present and how utopian practices often lead to distinctly dystopian or anti utopian outcomes It is the first comprehensive study to address the paradoxical relationship between bodies and utopianism Franziska Bork Petersen discusses doping bodybuilding and cosmetic surgery alongside practices such as retouching the body as image on social media and looks at how fashion modelling and performance estrange the body Techniques and technologies to transform our bodies are increasingly accessible and suggest an excessive identification of the body as lacking To be a body in a culturally meaningful way we incessantly improve our bodily appearance and capacity The book therefore addresses the utopianism inherent in a cultural understanding of bodies as increasingly controllable

Deborah L. Rotman, Ellen-Rose Savulis, 2003 This indispensable collection of essays is among the first to seriously link gender and landscape research two major emerging topics in historical archaeology and to explore the relationship between the two Landscapes represent unique as well as collective experiences so it is not without cultural significance that landscapes have historically been codified as female The book represents an intersection of the study of landscape archaeology and space with the study of gender By expanding the definition of landscape to include interior spaces by challenging the equivocation of gendered space with feminized space and by approaching the subject matter dialectically the book promotes an in depth understanding of the issues that arise when scholars apply gender issues to the study of space manipulation Housing and Dwelling

Unplanned Visitors Olivier Vallerand, 2022-03-30 Sexuality and gender have long been influential in understanding the construction of domestic space its meanings often revealing a binary division of private and public female and male By reconstructing the foundation of queer critiques of space and by analyzing the representation of domesticity in contemporary art and architecture Unplanned Visitors shows the blurring of private and public that can occur in any domestic space and explores the potential of queer theory for understanding and designing the built environment Olivier Vallerand investigates how queer critiques building on pioneering feminist work question the relation between identity and architecture and highlight normative constructs underlying domestic spaces He draws out a genealogy of queer space in theoretical discourse in architecture studying projects by Mark Robbins Joel Sanders J Mayer H Elmgreen Dragset Andr s Jaque and MYCKET

among others These works blur the traditional borders between architecture and art to emphasize the tensions between private and public and their impact on assumptions about domestic space and family structure The challenges in moving from experimental installations to built environments suggest how designers must acknowledge and respond to the social contexts that shape architecture rethinking how domestic spaces can be designed to allow everyone to better manage the expression of their self identification through their living environments Unplanned Visitors poses a challenge to traditional architectural theory and history but also suggests a renewed and more inclusive ethics whereby designers explicitly address social and political power structures The potential of a queer approach to architectural design history theory and education is precisely to enact a method that creates more inclusive buildings and safer neighbourhoods for everyone **Le Corbusier** Flora Samuel,2004-04-02 This is a revealing book which for the first time investigates the central influence of feminism in the work of Le Corbusier one of the most important and revered architects of all time The text covers Le Corbusier s upbringing and training and sets this in the context of the cultural atmosphere of his time covering issues of gender and religion It reveals aspects of his private life such as personal relationships which have barely been explored before as no biography currently exists Furthermore the author reveals for the first time in print a previously undiscovered and unpublished Le Corbusier building making this book an incredibly significant addition to existing literature on the great man In short the new evidence and theories contained in this volume amount to major revelations about this hugely revered and central architectural figure of the 20th Century
