Freedom 7 The Nasa Mibion Reports:

Freedom 7 Robert Godwin, 2001 CD ROM and Book Project Mercury America's first manned space flight program was orchestrated by NASA's Space Task Group and included suborbital and then orbital flights using the Redstone and Atlas boosters. The period from NASA's inception in late 1958 until Shepard's flight in the spring of 1961 was a time of concentrated activity, much of it breaking new ground both technologically and medically. From concept to concrete results in a mere two and a half years, a truly remarkable achievement. Alan Shepard was chosen from the Mercury Seven, the seven original astronauts selected from all applicants to fly Freedom 7 into history. The professionalism and apparent confidence with which he performed made him an early astronaut role model. This book gathers together in one place the rare documents and drawings of the Mercury Redstone 3 mission, the flight of Freedom 7. Presented herein are transcripts and documents from the NASA archives from a time before the assimilation and reporting of mission data was a developed process. The CD ROM features The NASA video documentary Freedom 7, video from the Freedom 7 earth sky camera, video of the Freedom 7 instrument panel, videos of post flight press activities and more. **Freedom 7** Robert Godwin, 2001-05 NULL

Freedom 7, 2001 **NASA CORE, Central Operation of Resources for Educators** United States. National Aeronautics and Space Administration, 2002 **The Complete Book of Spaceflight** David Darling, 2008-04-21 A commanding encyclopedia of the history and principles of spaceflight from earliest conceptions to faster than light galaxy hopping. Here is the first truly comprehensive guide to space exploration and propulsion from the first musings of the Greeks to current scientific speculation about interstellar travel using warp drives and wormholes. Space buffs will delight in its in-depth coverage of all key manned and unmanned missions and space vehicles past, present and projected, and its clear explanations of the technologies involved. Over the course of more than 2,000 extensively cross-referenced entries, astronomer David Darling also provides fascinating insights into the cultural development of spaceflight. In vivid accounts of the major characters and historical events involved, he provides fascinating tales of early innovators, the cross-pollination that has long existed between science fiction and science fact, and the sometimes obscure links between geopolitics, warfare, and advances in rocketry. **Moondust** Andrew Smith, 2006-04-04 In 1999, Andrew Smith was interviewing Charlie Duke, astronaut and moon walker, for the Sunday Times. During the course of the interview, which took place at Duke's Texan home, the telephone rang and Charlie left the room to answer it. When he returned some twenty minutes later, he seemed visibly upset. It seemed that he'd just heard that the previous day, one of his fellow moon walkers, the astronaut Pete Conrad, had died. The more Charlie spoke, the more Andrew realised that his grief was something more than the mere fact of losing a friend. Now there's only nine of us, he said. Only nine. Which meant that one day, not long from now, there would be none, and when that day came, no one on earth would have known the giddy thrill of gazing back at us from the surface of the moon. The thought shocked Andrew and still does. **Moondust** is his attempt to understand why The Apollo moon programme has been

called the last optimistic act of the 20th Century Over a strange three year period between 1969 and 1972 twelve men made the longest and most eccentric of all journeys and all were indelibly marked by it In *Moondust* Andrew sets out to interview all the remaining astronauts who walked on the moon and to find out how their lives were changed for ever by what had happened Where do you go after you ve been to the moon In addition to this question that would prove hugely troubling to many of the returned astronauts they also had to deal with the fantasies of faceless millions at their backs for this was the first truly global media event The walkers would forever be caught between the gravitational pull of the moon and the earth s collective dreaming *Krafft Ehricke's Extraterrestrial Imperative* Marsha Freeman,Krafft A. Ehricke,2009 From this book the reader will gain an insight into one of the most creative minds in the history of space exploration Krafft Ehricke s contribution to space exploration encompasses details of new innovative ideas but also how to think about the importance and value of space exploration for society The reader will gain an understanding of the early history of the space pioneers what they have helped accomplish and how Ehricke s vision of where we should be going can shape the future At this time when there are questions about the path of the space program for the next decades Krafft Ehricke has laid out the philosophical framework for why space exploration must be pursued through his concept of the Extraterrestrial Imperative and the fight that he waged over many years for a long range vision for the program Readers will find it a very imaginative work and a very up lifting story Krafft Ehricke s Extraterrestrial Imperative is the summation of his work on encouraging the exploration and development of space The book contains all of his reasons why we need to get off the planet and explore space **Light This Candle** Neal Thompson,2007-12-18 The definitive biography of Alan Shepard America s first man in space with a new Foreword by Chris Kraft One of the finest books ever written about the space program Homer Hickam author of *Rocket Boys* A wonderful and gripping biography meticulously reported in the best tradition of David Halberstam Buzz Bissinger New York Times bestselling author of *Friday Night Lights* Alan Shepard was the brashest cockiest and most flamboyant of America s original Mercury Seven but he was also regarded as the best Intense colorful and dramatic he was among the most private of America s public figures and until his death in 1998 he guarded the story of his life zealously *Light This Candle* based on Neal Thompson s exclusive access to private papers and interviews with Shepard s family and closest friends including John Glenn Wally Schirra and Gordon Cooper offers a riveting action packed account of Shepard s life NASA Technical Memorandum ,1989 *NASA Activities* ,1971 **N A S A Activities** U.S. National Aeronautics and Space Administration,1971 **Space Exploration and Humanity** American Astronautical Society,2010-08-23 A complete history of human endeavors in space this book also moves beyond the traditional topics of human spaceflight space technology and space science to include political social cultural and economic issues and also commercial civilian and military applications In two expertly written volumes *Space Exploration and Humanity A Historical Encyclopedia* covers all aspects of space flight in all participating nations ranging from the Cold War era beginnings of the space race to the lunar

landings and the Apollo Soyuz mission from the Shuttle disasters and the Hubble telescope to Galileo the Mars Rover and the International Space Station The book moves beyond the traditional topics of human spaceflight space technology and space science to include political social cultural and economic issues and also commercial civilian and military applications Produced in conjunction with the History Committee of the American Astronautical Society this work divides its coverage into six sections each beginning with an overview essay followed by an alphabetically organized series of entries on topics such as astrophysics and planetary science civilian and commercial space applications human spaceflight and microgravity science space and society and space technology and engineering Whether investigating a specific issue or event or tracing an overarching historic trend students and general readers will find this an invaluable resource for launching their study of one of humanity's most extraordinary endeavors *Scientific and Technical Aerospace Reports* ,1995 *Choice* ,2003
