Freedom And Terror In The Donbas A Ukrainian Russian Borderland 1870s 1990s:

Freedom and Terror in the Donbas Hiroaki Kuromiya, 1998 This book discusses both the freedom of the Ukrainian Russian borderland of the Donbas and the terror it has suffered because of that freedom In a detailed panorama the book presents the tumultuous history of the steppe frontier land from its foundation as a modern coal and steel industrial center to the post Soviet present Wild and unmanageable this haven for fugitives posed a constant political challenge to Moscow and Kiev In light of new information gained from years of work in previously closed Soviet archives including the former KGB archives in the Donbas the book presents from a regional perspective new interpretations of critical events in modern Ukrainian and Russian history the Russian Revolution the famine of 1932 33 the Great Terror World War II collaboration the Holocaust and de Stalinization

Reinventing Eastern Europe: Imaginaries, Identities and Transformations Evine Doğan, 2019-01-22 This edited collection brings together a wide range of topics that shed light on the social cultural economic political and spatio temporal changes influencing post socialist cities of Eastern Europe Different case studies are presented through papers that were presented at the Euroacademia International Conference series Imaginaries identities and transformations represent three blocks for understanding the ways in which visual narratives memory and identity and processes of alterity shape the symbolic meanings articulated and inscribed upon post socialist cities As such this book stimulates a debate in order to provide alternative views on the dynamics persistence and change broadly shaping mental mappings of Eastern Europe The volume offers an opportunity for scholars activists and practitioners to identify discuss and debate the multiple dimensions in which specific narratives of alterity making towards Eastern Europe preserve their salience today in refurbished and refashioned manners

The Donbas Conflict in Ukraine Daria Platonova, 2021-09-28 This book examines why when the conflict in eastern Ukraine began in 2014 fighting broke out in the Donetsk region whereas it did not in Kharkiv city despite the city like the Donetsk region being geographically proximate to Russia and similar in ethnic and linguistic make up Based on extensive original research the book argues that a key factor was the nature and behaviour of local elites with those in Kharkiv having diffuse ties to the centre and therefore being more capable of adapting to sudden profound regime change at the centre whereas the elites in the Donetsk region had much more concentrated ties to the centre were dependent on one network and therefore were much less able to cope with change The book thereby demonstrates how crucial for Ukraine are patronal politics patronage networks and informal centre region relations and that it was these local political circumstances rather than Russia which brought about the conflict

Centre-Local Relations in the Stalinist State, 1928-1941 E. A. Rees, 2002-10-22 This book analyzes the development of the Stalinist state of the 1930s from the perspective of the changing nature of centre local relations It examines the trend toward greater central state control over the formation and implementation of economic policy and the shift towards increased state repression through a series of archive based case studies of the centre's interactions with its republican and regional bodies

The book provides the basis for a new conceptualization of the Stalinist state Ukraine's Many Faces Olena Palko, Manuel Férez Gil, 2023-08-22 Russia's large scale invasion on the 24th of February 2022 once again made Ukraine the focus of world media. Behind those headlines remain the complex developments in Ukraine's history, national identity, culture, and society. Addressing readers from diverse backgrounds, this volume approaches the history of Ukraine and its people through primary sources from the early modern period to the present. Each document is followed by an essay written by an expert on the period and a conversational piece touching on the ongoing Russian aggression against Ukraine. In this ground-breaking collection, Ukraine's history is sensitively accounted for by scholars, inviting the readers to revisit the country's history and culture. With a foreword by Olesya Khromeychuk **The Nature of Stalin's Dictatorship** E. A. Rees, 2003-11-14 This is the first attempt to systematically study the nature of the political leadership system under Stalin. It focuses both on the formal institutions of power such as the Politburo and on the informal networks of decision making that were a central feature of his system of rule. It draws on a wealth of new archival material to highlight Stalin's relations with his co-leaders and wider elite groups and offers different perspectives on the nature and degree of Stalin's system of personal power Grand Theater Larry E. Holmes, 2009-06-16 Grand Theater examines bureaucracy not as a readily identifiable structure but rather as a process of day-to-day operation. Thus it is concerned with how agencies of both the communist party and the state apparatus not only implemented directives from above but also responded to perceived successes and failures, chose to produce, share, and conceal information, and reacted when common citizens injected themselves into governance by making demands and complaints. It concentrates on the 1930s as a seminal period when Stalin's regime established a hypercentralized system that dominated the Soviet Union until its collapse and the Russian Federation since then. It also focuses on the administration of schools as the primary window through which to examine governance because of the importance of education to Soviet authorities, most notably Stalin himself, and the accessibility of archival documents in this field, one not classified as particularly sensitive. Grand Theater provides novel insights into the functioning of Stalinist bureaucracy, bringing to the forefront a new understanding of center-periphery relations and reveals the important role of individuals in what has heretofore been largely regarded when beyond the Kremlin's inner circle as a highly impersonal system. It also examines in unprecedented ways the reciprocal relationship between ideology and policy formation on the one hand and actual administrative practices on the other, a relationship that more often than not had negative and dysfunctional consequences for both the governed and governing. Holmes argues that the Soviet administrative system during the 1930s was much like grand theater. The documents produced for and by that system were the script for a discursive theatrical reality that inspired neither a careful appraisal of problems nor a dispassionate search for workable solutions *Instrumentalizing the Past* Jan Rydel, Stefan Troebst, 2022-09-20 In today's world, we can point to many international disputes and interstate conflicts fueled by past events. Historical resentments or memories of past suffering or fame are often used to justify political, economic, and

even territorial demands Inter state disputes and historical conflicts should be understood as evidence of political and social tensions related to active serious differences in the assessment of the common past The book explains the role of such conflicts in international relations and suggests ways of classifying them It presents examples of the internationally relevant instrumentalisation of history from different regions of the world and outlines ways of overcoming them **Civil War?**

Interstate War? Hybrid War? Jakob Hauter,2021-04-20 This volume of collected papers takes stock of what has become known about the war in eastern Ukraine s Donets Basin Donbas between April 2014 and mid 2020 It provides an introduction to the conflict and illustrates the key point of contention in the academic debate surrounding it the question whether this war is primarily an internal Ukrainian phenomenon or the result of a covert Russian invasion The contributions by recognized specialists from Ukraine Russia Germany and Japan offer multifaceted views and insights into this long lasting conflict for both expert readers and those who are new to the topic The volume s contributors are Tymofii Brik Jakob Hauter Sanshiro Hosaka Yuriy Matsiyevsky Nikolay Mitrokhin Maximilian Kranich and Ulrich Schneckener **Bloodlands** Timothy

Snyder,2012-10-02 From the author of the international bestseller On Tyranny the definitive history of Hitler s and Stalin s politics of mass killing explaining why Ukraine has been at the center of Western history for the last century Americans call the Second World War the Good War But before it even began America s ally Stalin had killed millions of his own citizens and kept killing them during and after the war Before Hitler was defeated he had murdered six million Jews and nearly as many other Europeans At war s end German and Soviet killing sites fell behind the Iron Curtain leaving the history of mass killing in darkness Assiduously researched deeply humane and utterly definitive Bloodlands is a new kind of European history presenting the mass murders committed by the Nazi and Stalinist regimes as two aspects of a single story With a new afterword addressing the relevance of these events to the contemporary decline of democracy Bloodlands is required reading for anyone seeking to understand the central tragedy of modern history and its meaning today **The German-Soviet War**

Jeff Rutherford,2025-06-15 The German Soviet War revises the conflict s generally accepted understanding through case studies demonstrating the complexity of the war at the local level The contributors assembled by Jeff Rutherford and Robert von Maier examine the multiplicity of experiences of individuals caught in this savage war starting with the German war of annihilation launched against Soviet state and society in June 1941 This detailed collection shows that the particular nature of the war in the east resulted from an intertwining of military ideological and economic motives The German Soviet War puts Germany s murderous policies toward Soviet Jews and prisoners of war and the justification for these policies and actions within the ranks of the army into the larger context of battlefield events The neglected topic of the destructive German scorched earth retreats receives detailed analysis demonstrating the importance of ideology and economic thinking in the German army s war The difficulty in reconciling economic and ideological considerations also played a prominent role in Soviet attempts to rebuild after the war The German Soviet War not only brings attention to these devastating events but

also revises the general narrative of the war By internationalizing the conflict through examinations into the various Axis and Allied nations and peoples who participated in the fighting this volume provides new ways of conceptualizing their motivations actions and importance in its eventual outcome Together the contributions to *The German Soviet War* provide new ways of examining the defining conflict of the Second World War Stalin's Constitution Samantha Lomb,2017-11-09 Upon its adoption in December 1936 Soviet leaders hailed the new so called Stalin Constitution as the most democratic in the world Scholars have long scoffed at this claim noting that the mass repression of 1937 1938 that followed rendered it a hollow document This study does not address these competing claims but rather focuses on the six month long popular discussion of the draft Constitution which preceded its formal adoption in December 1936 Drawing on rich archival sources this book uses the discussion of the draft 1936 Constitution to examine discourse between the central state leadership and citizens about the new Soviet social contract which delineated the roles the state and citizens should play in developing socialism For the central leadership mobilizing its citizenry in a variety of state building campaigns was the main goal of the discussion of the draft Constitution However the goals of the central leadership at times stood in stark contrast with the people's expressed interpretation of that social contract Citizens of the USSR focused on securing rights and privileges often related to improving their daily lives from the central government The Open Access version of this book available at <https://doi.org/10.4324/9781315194004> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license **Harvest of Despair** Karel C. Berkhoff,2008-03-15 Berkhoff describes how a blend of German nationalism anti-Semitism and racist notions about the Slavs produced a reign of terror and genocide in the Third Reich's largest colony He also shows how a pervasive Soviet mentality worked against solidarity explaining why the vast majority of the population did not resist the Germans Breaking the Tongue Matthew D. Pauly,2014-11-21 In the 1920s and early 1930s the Communist Party embraced a policy to promote national consciousness among the Soviet Union's many national minorities as a means of Sovietizing them In Ukraine Ukrainian language schooling coupled with pedagogical innovation was expected to serve as the lynchpin of this social transformation for the republic's children The first detailed archival study of the local implications of Soviet nationalities policy *Breaking the Tongue* examines the implementation of the Ukrainization of schools and children's organizations Matthew D. Pauly demonstrates that Ukrainization faltered because of local resistance a lack of resources and Communist Party anxieties about nationalism and a weakening of Soviet power a process that culminated in mass arrests repression and a fundamental adjustment in policy *Red Famine* Anne Applebaum,2017-10-10 NEW YORK TIMES BESTSELLER A revelatory history of one of Stalin's greatest crimes the consequences of which still resonate today as Russia has placed Ukrainian independence in its sights once more from the author of the Pulitzer Prize winning *Gulag* and the National Book Award finalist *Iron Curtain* With searing clarity *Red Famine* demonstrates the horrific consequences of a campaign to eradicate backwardness when undertaken by a regime in a state of war with its own people

The Economist In 1929 Stalin launched his policy of agricultural collectivization in effect a second Russian revolution which forced millions of peasants off their land and onto collective farms The result was a catastrophic famine the most lethal in European history At least five million people died between 1931 and 1933 in the USSR But instead of sending relief the Soviet state made use of the catastrophe to rid itself of a political problem In *Red Famine* Anne Applebaum argues that more than three million of those dead were Ukrainians who perished not because they were accidental victims of a bad policy but because the state deliberately set out to kill them Devastating and definitive *Red Famine* captures the horror of ordinary people struggling to survive extraordinary evil Applebaum's compulsively readable narrative recalls one of the worst crimes of the twentieth century and shows how it may foreshadow a new threat to the political order in the twenty first [The Long Hangover](#) Shaun Walker,2018 In *The Long Hangover* Shaun Walker provides a deeply reported bottom up explanation of Putin's aggressive foreign policy and his support among Russians [1998](#) Massimo Mastrogregori,2013-05-08 Annually published since 1930 the International bibliography of Historical Sciences IBOHS is an international bibliography of the most important historical monographs and periodical articles published throughout the world which deal with history from the earliest to the most recent times The works are arranged systematically according to period region or historical discipline and within this classification alphabetically The bibliography contains a geographical index and indexes of persons and authors *Stalin* Hiroaki Kuromiya,2013-08-16 This profile looks at how Stalin despite being regarded as intellectually inferior by his rivals managed to rise to power and rule the largest country in the world achieving divine like status as a dictator Through recently uncovered research material and Stalin's archives in Moscow Kuromiya analyzes how and why Stalin was a rare even unique politician who literally lived by politics alone He analyses how Stalin understood psychology campaigns well and how he used this understanding in his political reign and terror Kuromiya provides a convincing concise and up to date analysis of Stalin's political life *Memory and Postwar Memorials* M. Silberman,F. Vatan,2013-12-04 The twentieth century witnessed genocides ethnic cleansing forced population expulsions shifting borders and other disruptions on an unprecedented scale This book examines the work of memory and the ethics of healing in post authoritarian societies that have experienced state perpetrated violence *Education and the Politics of Memory in Russia and Eastern Europe* Sergey Rumyantsev,2025-01-21 This book examines both formal and extracurricular education and the politics of memory and historical narratives in Armenia Azerbaijan Russia and Ukraine The misalignment between memory politics and history politics forms a central theme of this book Structured in three parts it focuses on school education in the post Soviet states over the 30 years between the collapse of the Soviet Union and the 2022 Russian invasion of Ukraine The chapters inquire as to how post Soviet school education politics of memory and history politics became active participants in the production of state approved ideology patriotism and a state prescribed understanding of the national past Armed conflicts in the territory of the former USSR not only saw numerous victims and refugees but also the emergence of new borders and unrecognized de

facto states and the annexation of territories They also contributed to the creation of new sites of memory generated their own traditions of commemoration for the heroes and victims of these confrontations and led to the reconstruction of historical narratives and the construction of new national myths The research in this book foregrounds how the nationalization of the public space and the reconstruction of national historical narratives in the independent states reflect a desire to monopolize the power to interpret the past with low tolerance of alternative accounts In this light the book covers issues such as the nation state Sovietization national history creation memory politics religion mass media nationalism and patriotism and analyzes the relationship of Azerbaijani and Armenian Russian and Ukrainian societies with their histories and pasts A novel study on the topic of memory and history writing this is a timely contribution to the field of Post Soviet history and Russian and Eastern European Studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
