American Sociological Society,1915 **Challenges to EU Values in Hungary** Beáta Bakó,2022-12-30 The national conservative government of Hungary has been heavily criticised for its violation of EU values primarily the rule of law in recent years This book looks to the bigger picture in examining the rule of law debate between Hungary and the EU It explores how certain elements of various Hungarian constitutional reforms are interrelated and how the EU has failed to address the situation properly It is argued here that the reason the EU has been unable to enforce its values effectively in

Hungary stems from the misunderstanding that Hungary kept the institutional design of liberal democracy but made it dysfunctional. The debate with the EU is characterised as a dialogue of the deaf as the EU insists on advancing the rule of law agenda while the Hungarian government defends itself by alluding to its democratic legitimacy. The author contends that the Hungarian government is in fact playing a charade while the actions of the EU maintain this drama. The book will be of interest to students, academics and policymakers working in the areas of constitutional law and politics, EU law and populism.

European Union which has established itself as one of the leading works of reference on European law for practitioners and academics alike. Indeed, whether advising clients or preparing for teaching, there is no European lawyer who can afford not to have a copy of this book close to hand. Concise, precise and lucid, the book has become the first port of call for anyone seeking answers to questions about the foundations of free movement of goods in the EU. With specialist chapters written by leading academic and practising lawyers including Peter Oliver himself, this edition has been extensively rewritten to take into account recent judgments from the ECJ including important cases such as C 110/05 *Commission v Italy* trailers and C 142/05 *Mickelsson* jet skis, both of which relate to restrictions on the use of goods. Committee on Government Operations. National Historical Publications and Records Commission, 1982 **Contemporary Governance Challenges in the Horn of Africa** Charles

Manga Fombad, Assefa Fiseha, Nico Steytler, 2022-09-06 This book argues that a leading cause of the political instability in the Horn of Africa is a crisis of governance caused by extreme centralization of power, weak institutions and the failure to institutionalise the responsible use of authority. In recent years many attempts have been made to resolve the ongoing conflicts in Somalia and South Sudan but problems remain and in 2019 the instability spread to Ethiopia. This book critically examines how many of the governance problems in the region can be addressed through institutional design. The central argument is that an inclusive system of governance through federalism, devolution and inclusive political institutions as well as ensuring the institutionalization of power through strengthening the rule of law has the potential to make governments more accountable, inclusive and be able to deliver critical services. Such systems ensure relative stability and peace and

reduce the risks of state fragmentation a major concern in the region Demonstrating that the threats of further fragmentation and conflict due to the crisis of governance are likely to continue unless serious steps are taken to deal with the situation the book will be an important read for researchers and policy makers with an interest in peacemaking politics constitutional law and federalism in the region Media Freedom and the Law András Koltay, 2024-08-01 The main objectives of media regulation in Europe are to protect media freedom to ensure the social responsibility of the media and to prevent harm caused by speech published through the media This book examines the way in which these are reflected in European legal regimes and jurisprudence at the supranational regional and national levels It addresses the theoretical considerations behind the protection and restriction of media freedom It starts from the assumption that there is a common European ideal of media freedom as a human right Apart from EU law and in many cases similar national regulations many common points can be identified across Europe in the theoretical underpinnings of this right and the history of struggles for this freedom in different European countries also shows common features While the focus is on media freedom in Europe the work also discusses the uniquely distinct concept of freedom of expression and of the media that is prevalent in the US the principles of which have a significant impact in Europe The book uses a comparative method in part as it attempts to outline the common regulatory framework for the idea of media freedom on a European scale The reference to national laws and court decisions is intended to illustrate this picture looking primarily at what binds European states together The work will be a valuable resource for those working in the areas of public law media law media studies comparative law international human rights law and legal philosophy
