Third Series** Library of Congress. Copyright Office, 1976      **Freedom and the Cage** Leslie Topp, 2017-03-28 Spurred by ideals of individual liberty that took hold in the Western world in the late nineteenth century psychiatrists and public officials sought to reinvent asylums as large scale totally designed institutions that offered a level of freedom and normality impossible in the outside world This volume explores the caged freedom that this new psychiatric ethos represented by analyzing seven such buildings established in the Austro Hungarian monarchy between the late 1890s and World War I In the last two decades of the Habsburg Empire architects of asylums began to abandon traditional corridor based plans in favor of looser formations of connected villas echoing through design the urban and freedom oriented impulse of the progressive architecture of the time Leslie Topp considers the paradoxical position of designs that promoted an illusion of freedom even as they exercised careful social and spatial control over patients In addition to discussing the physical and social aspects of these institutions Topp shows how the commissioned buildings were symptomatic of larger cultural changes and of the modern asylum s straining against its ideological anchorage in a premodern past of unenlightened restraint on human liberty Working at the intersection of the history of architecture and the history of psychiatry *Freedom and the Cage* broadens our understanding of the complexity and fluidity of modern architecture s engagement with the state with social and medical projects and with mental health psychiatry and psychology      **Research in Education**, 1974      **Freedom in Resistance and Creative Transformation** Michael St. A. Miller, 2013-04-11 In *Freedom in Resistance and Creative Transformation* Michael Miller addresses the concept of freedom that is central to the grammar of Christian faith and important in a wide range of religious and nonreligious settings across the globe He confronts the fact that despite the claimed importance of freedom there continues to be interpersonal socio political and religious power hierarchies that keep some people dominant and others subjugated The book suggests that often these hierarchies are informed by Christian teachings that deny freedom to human beings on the basis of their humanity per se Having classified humanity as fallen we are instructed that freedom is experienced by disparaging our humanity as we actually experience it seeing ourselves as our own worst enemies and accepting bondage to God the bondage reflected in the character of relations

with those seen as God's special representatives in the world Miller presents a case against this understanding of the human situation and in the process he critically engages the Old and New Testaments along with ideas of significant representatives of Christian orthodoxy As an alternative he promotes freedom that is finite realistically libertarian and relational as most compatible with the character of human beings that are partially self creating and self determining Contributing to this position is the view that an infinitely temporal God by character and desire participates in human life in a way that ensures the requisite space for authentic decision making from which emerges genuinely novel possibilities for human life This dynamic has implications for the continued development of the human species and the quality of life in the cosmos as a whole
