Marketing Agricultural Products and Services Brian Walsh, 2015-07-17 Times are changing Until fairly recently many farmers were simply producers Their energies were focused on growing crops and producing livestock Selling was often just a matter of sending produce to the local saleyards or silo or contacting their stock and station agent Producers were price takers rather than price managers Now many farmers have become marketers rather than just producers and in the near future many more will make the fundamental shift from an on farm focus as price takers to a wider approach that includes price risk management and marketing Official marketing authorities are playing less of a role in marketing Australian agricultural produce As part of this deregulation farmers have many more choices marketing tools and options that they can use to their advantage provided they know how to use them At the same time consumer expectations have become more complex Farmers find themselves required to respond to concerns about animal welfare practices health and food safety aspects of their products and the environmental and ethical impact of their production methods The marketing landscape has therefore become more complex and producers need good marketing skills to navigate their way through the pros and cons of the many alternatives they face This is the challenge for producers to apply a balance of production finance people and marketing skills to run their farm businesses successfully This book gives farmers the tools to become a marketer rather than just a producer It details market specifications product promotion quality control and how to respond to consumer demands for animal welfare practices health food safety environmental and ethical issues

Organic Poultry Production Susanne Padel, 1997 The aim of this study is to provide an assessment of the potential for organic poultry production in England and Wales and in particular to

identify likely technical financial and market constraints for the development of organic chicken egg and table meat production enterprises The focus of this study is on businesses that might choose to adopt organic poultry production as well as free range producers who might wish to convert to full organic standards It is assumed that organic poultry production systems are unlikely to result from the conversion of intensive conventional poultry units
