Comparative Politics Jeffrey Kopstein,Mark Lichbach,2005-09-05 Now in a completely updated second edition this textbook has become a

favorite for the introductory undergraduate course in comparative politics. It features ten theoretically and historically grounded country studies that show how the three major concepts of comparative analysis—interests, identities, and institutions—shape the politics of nations. Throughout the presentation, countries appear in the context of a changing global order that creates challenges to each country's path of development. These challenges frequently alter domestic interests and identities and force countries to find new institutional solutions to the problems of modern politics. Written in a style free of heavy-handed jargon and organized to address the concerns of contemporary comparativists, this textbook provides students with the conceptual tools and historical background they need to understand the politics of our complex world.

Politics and Religion in France and the United States Alec G. Hargreaves, John Kelsay, Sumner B. Twiss, 2007-01-01 Religion and Politics in France and the United States compares the current status and views of Jews, Christians, and Muslims regarding political life in two states. Longstanding traditions of laïcité and of constitutional law frame discussions of political speech, voting patterns, and attempts to deal with demographic and cultural shifts characteristic of French and American societies. Papers by leading scholars demonstrate the ways that historical experience sheds light on current events; how, for example, that previous efforts to deal with religious difference affect current approaches to the display of religious symbols in state schools or how the struggles of minority groups for recognition affect voting patterns. One question running throughout the volume is what can French and American policymakers and citizens learn from one another as they seek to deal with the challenges presented by contemporary life. This book is suitable for advanced undergraduate and graduate students.

The End of the French Exception? T. Chafer, E. Godin, 2010-06-01 Analyzes the notion of the French exception and the ways in which it has informed both academic analysis and political commentary on France today. Adopting a comparative and interdisciplinary approach, it examines the resilience of the notion of French exceptionalism and evaluates its relevance in a changing domestic and global context.

Economic Management and French Business M. Maclean, 2002-10-02 How is it that the modest pace of change which typified the French economy a century ago gave way after 1945 to a new, revived capitalism and a superior economic performance? Maclean traces the development of French economic and business life in the context of the European and international economy over the past fifty years. She examines the main economic trends and events from nationalization to privatization, from war with Germany to reconciliation and ever greater union, from the franc to the euro and from national champions to mega mergers with foreign companies. Maclean argues that the new French capitalism of the twenty-first century is the product of an ideological struggle in which the forces of modernization triumphed over the old guard of French nationalism.

New French Thought Mark Lilla, 2014-07-14 The past fifteen years in France have seen a remarkable flourishing of new work in political philosophy. This anthology brings into English for the first time essays by some of the best young French political thinkers writing today, including Marcel Gauchet, Pierre Manent, Luc Ferry, and Alain Renaut. The central theme of these essays is liberal democracy: its nature, its development, its problems, its fundamental

legitimacy Although these themes are familiar to American and British readers the French approach to them which is profoundly historical and rooted in the tradition of continental philosophy is quite different from our customary one Included in this collection is a series of reconsiderations of French critics of liberal society L vi Strauss Foucault Bourdieu and of classical European liberals Kant Constant Tocqueville The continuing controversies over the nature of the modern era and the place of religion within it play a central role throughout the collection The book includes a debate on the foundations of human rights and on the nature of a liberal political order The concluding section presents some of the new sociological writing on modern individualism its pleasures and its discontents An introduction by Mark Lilla provides the historical background to the revival of French political thought about liberalism and offers an analysis of what American and English readers might learn from it Originally published in 1994 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *World News* ,1926
