Fénelon in the Enlightenment: Traditions, Adaptations, and Variations Christoph Schmitt-Maaß,Stefanie Stockhorst,Doohwan Ahn,2014-10-25 Fran ois Salignac de la Mothe Fénelon Archbishop of Cambrai 1651 1715 exerted a considerable influence on the development and spread of the Enlightenment His most famous work the Homeric novel Les Aventures de Télémaque Fils d Ulysse 1699 composed for the education of his pupil Duc de Bourgogne was after the Bible the most widely read literary work in France throughout the eighteenth century It was also translated and adapted into many other European languages And yet oddly enough the question as to why Fénelon s ideas resonated over such a wide span of space and time has as yet found no coherent and comprehensive answer By taking Fénelon s intellectual influence as a matter of cultural translation this anthology traces the reception of Fénelon and his multifaceted writings outside of France and in doing so aims to enrich not only our understanding of the Enlightenment but also of the thinker himself **Classified**

Catalogue of the Books, Except Fiction, French and German, in the Carnegie Free Library, of Allegheny, Pa Carnegie Free Library of Allegheny (Pittsburgh, Pa.),1898 Metaphor Identification in Multiple Languages Susan Nacey,Aletta G. Dorst,Tina Krennmayr,W. Gudrun Reijnierse,2019-11-28 This volume explores linguistic metaphor identification in a wide variety of languages and language families The book is an essential read for anyone interested in researching language and metaphor from students to experienced scholars Its primary goals are to discuss the challenges involved in applying the Metaphor Identification Procedure Vrije Universiteit MIPVU to a range of languages across the globe and to offer theoretically grounded advice and guidelines enabling researchers to identify metaphors in multiple languages in a valid and replicable way The volume is intended as a practical guidebook that identifies and discusses procedural challenges of metaphor identification across languages thus better enabling researchers to reliably identify metaphor in a

multitude of languages Although able to be read independently this volume written by metaphor researchers from around the world is the ideal companion volume for the 2010 Benjamins book *A Method for Linguistic Metaphor Identification From MIP to MIPVU* The New International Year Book ,1919 **New International Yearbook** ,1919 *Transnationalism and Translation in Modern Chinese, English, French and Japanese Literatures* Ryan Johnson,2020-12-15 The theory of literary worlds has become increasingly important in comparative and world literatures But how are the often contradictory elements of Eastern and Western literatures to cohere in the new worlds such contact creates Drawing on the latest work in philosophical logic and analytic Asian philosophy this monograph proposes a new model of literary worlds that is best suited to comparative literature dealing with Western and East Asian traditions Unlike much discussion of world literature anchored in North American traditions featured here is the transnational work of artists philosophers and poets writing in English French Japanese and Mandarin in the twentieth century Rather than imposing sharp borders this book suggests that vague boundaries link Eastern and Western literary works and traditions and that degrees of distance can better help us to see the multiple dimensions that both distinguish and join together literary worlds East and West As such it enables us to grasp not only how East Asian and Western writers translate one another's works into their own languages and traditions but also how modern writers East and West modify their own traditions in order to make them fit in the new constellation of literary worlds brought about by the complex flow of literary information across twentieth century Eurasia Space and Time in Language and Literature Lovorka Gručić Grmuša, Marija Brala Vukanović,2009-10-02 Space and time their infiniteness and or their limitation's their coding conceptualization and the relationship between the two have been intriguing people for millennia Linguistics and literature are no exceptions in this sense This book brings together eight essays which all deal with the expression of space and or time in language and or literature The book explores the issues of space time and their interrelation from two different perspectives the linguistic and the literary The first section Time and Space in Language contains four papers which focus on linguistics i.e. explore issues relative to the expression of time and space in natural languages The topics under consideration include typology regarding the expression of spatial information in languages around the world Ch 1 space as expressed and conceptualized in neutral postural and verbs of fictive motion Ch 2 prepositional semantics Ch 3 aspectuality in Tamil Ch 4 All articles propose innovative topics and or approaches crossreferring when possible between space and time Given that all seem to propose at least some elements of language universality vs language variability the strong cognitivist nature of the approach even when the paper is not written within a cognitive linguistic framework represents a particularly strong feature of the section with a strong appeal to experts from fields that need not necessarily be linguistic The second section of this volume Space and Time in Literature brings together four essays dealing with literary topics Inherent in each narrative are both temporal and spatial implications because a literary text testifies of a certain time it is from and about a certain period as well as about a certain space even if virtual A

particularly strong feature of these papers is that they envision space and time as complementary parameters of experience and not as conceptual opposites following the transfer of perspective through the whole century Departing from the late nineteenth century England's and Croatia's fictive spaces Ch 5 the topic moves via the American Southern Gothic focusing on Faulkner from the thirties to the early sixties Ch 6 via the post WWII perspectives on history probing the postmodern context of temporality Ch 7 to finally reach the contemporary era of post 9 11 space time Ch 8 The voyage from chapter five to eight is thus a journey through space and time that allows for some answers to the nature of reality of a variety of space times as conceived by both the authors of these essays as well as by the authors that these essays discuss The main goal of the editors has been to bring together different scientific traditions which can contribute complementary concerns and methodologies to the issues under exam from the literary and descriptive via the diachronic and typological explorations all the way to cognitive linguistic analyses bordering psycholinguistics and neuroscience One of the strengths of this volume thus lies in the diversity of perspectives articulated within it where the agreements but also the controversies and divergences demonstrate constant changes in society which in turn shapes our views of space time reality All this also suggests that science and literature are not above or apart from their culture but embedded within it and that there exists a strong relativistic interrelation between spatio temporal reality and culture The only hope to objectively envisage any if not all of the above is by learning how to move our thought through space time or to put it in simpler terms how to shift perspectives **The**
