Recent scholarship has challenged the assumption that military commanders during the First World War were inflexible backward looking and unwilling to exploit new technologies Instead a very different picture is now emerging of armies desperately looking to a wide range of often untested and immature scientific and technological innovations to help break the deadlock of the Western Front Nowhere is this better

illustrated than in the development of tank warfare which both the British and the French hoped would give them a decisive edge in their offensives of 1917 and 1918 Whilst the British efforts to develop armoured warfare have been well chronicled there has been no academic study in English on the French tank force the Artillerie Sp ciale during the Great War As such this book provides a welcome new perspective on an important but much misunderstood area of the war Such was the scale of the French tanks failure in their first engagement in 1917 it was rumoured that the Artillerie Sp ciale was in danger of being disbanded yet by the end of the war it was the world s largest and most technologically advanced tank force This work examines this important facet of the French army s performance in the First World War arguing that the AS fought the war in as intelligent and sensible a manner as was possible given the immature state of the technology available No amount of sound tank doctrine could compensate for the fragility of the material for the paucity of battlefield communication equipment and for the lack of tank infantry training opportunities Only by 1918 was the French army equipped with enough reliable tanks as well as aircraft and heavy artillery to begin to exercise a mastery of the new form of combined arms warfare The successful French armoured effort outlined in this study including a listing of all the combat engagements of the French tank service in the Great War highlights a level of military effectiveness within **House Beautiful** ,1928 *Historicizing the French Revolution* Antonino De Francesco,2022-03-24 This book provides a critical examination of over 300 historical works about the French Revolution published in Europe in particular in France Great Britain Germany Italy and Russia as well as in the United States between 1789 and 1989 It also goes on to examine recent trends in French Revolution historiography and consider where histories of this landmark event may go in the future By emphasizing the elements which have been valued or hidden exalted or silenced *Historicizing the French Revolution* shows how reflections on 1789 are always fundamentally tied to the times in which they are formulated Antonino De Francesco looks at the ways in which these historical accounts can be seen to support and at times contrast with the formation of political modernity both in national and international contexts as it has taken shape in the hundreds of years that have followed this key moment in world history *The Ancient History of the Egyptians, Assyrians ... Translated from the French of M. Rollin* Charles Rollin,1838 *History of Europe from the commencement of the French Revolution, etc* Sir Archibald ALISON,1841 *The Life of Napoleon Buonaparte, Emperor of the French* Walter Scott,1853 **The Life of Napoleon Buonaparte, Emperor of the French** Walter Scott,2024-11-15 Reprint of the original first published in 1836 Lectures on the French Revolution John Emerich Edward Dalberg, The two volumes of his lectures on modern history and on the French Revolution give us in their full ripeness the sum of Acton s historical judgments History was not to Acton a mere academic pursuit With that view of history which considers it beneath the dry light of science as a series of phenomena capable of detachment from the present susceptible to separate analysis he had no sympathy Still less did he consider history a mere form of literary exposition The one justification for the study of history was to Acton its value as a guide in the affairs of the every day world The present is what it is because of what the

past has been Human development has been a continuous chain of cause and effect Any course of action in the present must be based upon a knowledge of the way in which things we now do are hedged in limited by what men have done before us History thus becomes a great mentor a schoolmaster of action **A Complete History of Drugs. Written in French by Monsieur Pomet, Chief Druggist to the Late French King Lewis 14. to which is Added what is Farther Observable on the Same Subject ... Done Into English from the Originals** Pierre Pomet,1748
