French Social Theory Mike Gane, 2003-03-06 This accomplished book provides a peerless account of the French tradition. It provides an overview of French social theory, divides French social theory into three coherent cycles: positivist, anthropological, and Marxist, and situates the discussions of individuals and schools in the relevant social and political contexts.

**French Social Theory** Veronique Mottier, 2022-06-27 French theory has been the subject of intense interest in the Anglo American world for the last fifty years, and its influence is prominent in many fields in the humanities and social sciences. In this engaging work, Veronique Mottier explores the ideas of key authors in postwar French social theory, from de Beauvoir, Foucault, and Bourdieu to Boltanski and Kaufmann, and demonstrates their relevance today. The author shows how French social theorists characteristically frame their works as dialogues with or polemical attacks on each other. This underlying dimension of French social theory has often gone unacknowledged in the Anglo American world, and Mottier redresses the balance by examining the disagreements, controversies, and debates surrounding each thinker. This erudite and informative book offers a systematic and up-to-date discussion of the central ideas of key French theorists and their critical rethinking of power and politics, identity and agency, language and meaning, gender, race, and sexuality, outlining both the theoretical and the political implications of their work. It will be of great interest to all students and scholars in the arts and humanities, and in particular to social and political scientists.

French Social Theory Mike Gane, 2003-03-06 No national tradition of social theory has been more seductive to Anglo American readers than the French. There has been a long standing fascination with French ideas and debates. This extraordinarily accomplished book, written by one of Britain's leading commentators on social theory, provides a peerless account of the French tradition. The book provides a systematic account of French social theory from the aftermath of the French Revolution (St Simon, Bazard, and Comte) to the contemporary scene dominated by Kristeva, Deleuze, Bourdieu, and Baudrillard. It divides French social theory into three logically coherent cycles: 1800-80 positivist, 1880-1940 anthropological, 1940-2000 Marxist. It provides a detailed guide to the three phases of postwar French social theory: existential, structural, and post-structural, and situates the discussions of individuals and schools in the relevant social and political contexts. The book is a masterpiece of erudition and scholarship, but is written throughout in an engaging and informative style. It will be required reading for anyone interested in social theory and sociology.

The coverage is wide-ranging; the information provided is authoritative; complex ideas are presented in an accessible language; key controversies are explained in an eloquent and thought-provoking fashion; and perhaps most importantly, seemingly abstract tensions between intellectual positions are put into historical context. Radicalism in French Culture Niilo Kauppi, 2016-10-17 An invisible pattern draws together most studies dealing with French cultural radicalism in the 1960s with intellectual creation reduced to individual creation and the role of semiotic and social factors that influence intellectual innovation minimized Sociological approaches often see a more or less external link between social location and intellectual production but because of their structural approach they are incapable of taking into account unique historical circumstances the crucial role of personal impulses and more importantly the semiotic logic of ideas as conditions of innovative thinking This ground breaking book will further an internal sociological analysis of ideas and styles of thought It will show that the defining but largely neglected feature of what has become French theory was a collective mind and style of thought an explosive but fragile mixture of scientific and political radicalism that rather quickly watered down to academic orthodoxy For some time radical intellectuals succeeded in producing ideas that were perfectly in tune with the demands of the consumers mostly the young university audience Ideas were used as part of radical posture that was set in opposition to the establishment and those in power Ideas could not be too empirical or verifiable and they had to shock It is not surprising that a slew of new sciences and concepts were invented to indicate this radical posture The central argument of this study is that ideas become power ideas only if they succeed in uniting individual and collective psychic investment in powerful social networks with significant institutional and political backing These conditions were met in the French context for a certain specific period of time From roughly the mid 1960s to the beginning of the 1970s radical intellectuals such as Roland Barthes Pierre Bourdieu Jacques Derrida Michel Foucault Julia Kristeva developed a host of new ideas concepts and theories a number of which have subsequently been labelled as French theory
