The Fall of Sleep Jean-Luc Nancy,2009-10-01 Philosophers have largely ignored sleep treating it as a useless negativity mere repose for the body or at best a source for the production of unconscious signs out of the night of the soul In an extraordinary theoretical investigation written with lyric intensity The Fall of Sleep puts an end to this neglect by providing a deft yet rigorous philosophy of sleep What does it mean to fall asleep Might there exist something like a reason of sleep a reason at work in its own form or modality a modality of being in oneself of return to oneself without the waking self that distinguishes I from you and from the world What reason might exist in that absence of ego appearance and intention in an abandon thanks to which one is emptied out into a non place shared by everyone Sleep attests to something like an equality of all that exists in the rhythm of the world With sleep victory is constantly renewed over the fear of night an a confidence that we will wake with the return of day in a return to self to us though to a self an us that is each day different unforeseen without any warning given in advance To seek anew the meaning stirring in the supposed loss of meaning of consciousness and of control that occurs in sleep is not to reclaim some meaning already familiar in philosophy religion progressivism or any other ism It is instead to open anew a source that is not the source of a meaning but that makes up the nature proper to meaning its truth opening gushing forth infinity This beautiful profound meditation on sleep is a unique work in the history of phenomenology a lyrical phenomenology of what can have no phenomenology since sleep shows itself to the waking observer the subject of phenomenology only as disappearance and concealment
