of transnational media texts Perhaps more than any other genre horror is characterized by its ability to be simultaneously aware of the local while able to permeate national boundaries to function on both regional and international registers The essays here explore political models and allegories questions of cult or subcultural media and their distribution practices the relationship between regional or cultural networks and the legibility of international horror iconography across distinct media The book underscores how a discussion of contemporary international horror is not only about genre but about how genre can inform theories of visual cultures and the increasing permeability of their borders

global cities in their own right The striking similarity of the skylines of Dubai Miami and Singapore is no coincidence despite following different historical paths all three have achieved newfound prominence through parallel trends In this groundbreaking book Alejandro Portes and Ariel C Armony demonstrate how the rapid and unexpected rise of these three cities recasts global urban studies They identify the constellation of factors that allow certain urban places to become emerging global cities centers of commerce finance art and culture for entire regions The book traces the transformations of Dubai Miami and Singapore identifying key features common to these emerging global cities It contrasts them with global hopefuls cities that at one point or another aspired to become global and analyzes how Hong Kong is threatened with the loss of this status Portes and Armony highlight the importance of climate change to the prospects of emerging global cities showing how the same economic system that propelled their rise now imperils their future Emerging Global Cities provides a powerful new framework for understanding the role of peripheral cities in the world economy and how they compete for and sometimes achieve global standing
