Public Opinion and the Political Economy of Education Policy around the World Martin R. West, Ludger Woessmann, 2021-04-27 Comparative analyses of the influence of public opinion on education policy in developed countries Although research has suggested a variety of changes to education policy that have the potential to improve educational outcomes politicians are often reluctant to implement such evidence based reforms Public opinion and pressure by interest groups would seem to have a greater role in shaping education policy than insights drawn from empirical data The construction of a comparative political economy of education that seeks to explain policy differences among nations is long overdue This book offers the first comparative inventory and analysis of public opinion and education in developed countries drawing on data primarily from Europe and the United States *Education, Policy and Ethics* Mike Bottery, 2001-01-01 Across the world a number of long term trends globalization marketization managerialism are now impacting on national education policies Here Mike Bottery shows how paradoxically these forces are making education both more centralized and more fragmented In this magisterial study of educational policy and practice he shows the dangers this creates and in response how to create a more humane and democratic education system **Contemporary Issues in Educational Policy and School Outcomes** Wayne K. Hoy, Cecil Miskel, 2006-03-01 This book is the fifth in a series on research and theory dedicated to advancing our understanding of schools through empirical study and theoretical analysis Scholars both young and established are invited to publish original analyses but we especially encourage young scholars to contribute to this series The current volume is similar to its predecessors in that it provides a mix of beginning and established scholars and a broad range of theoretical perspectives in all 14 authors contributed to 9 separate but related analyses which were selected for publication this year **Today's Guide to Educational Policy** Joel Spring, 2021-04-12 In his latest book Joel Spring covers major political economic and social issues affecting US and global education policy today Crafted to evoke classroom discussion this book explores contemporary issues such as the pandemic institutional racism religious controversies nationalism and immigration increased reliance on online instruction climate change economics of education and the deep state in education Giving students the opportunity to engage in critical thinking and explore the growing sense that US and global education is in distress and in need of fundamental transformation this book forces readers to examine their own values and how they might apply this thinking to their own education policy and practice *Research of Vs Research for Education Policy* Richard Desjardins, 2009-02-01 As national governments reform their educational systems to meet the challenges of living in a globalised world the agenda setting power of transnational organizations like the OECD and the EU have become more transparent in the last decade The phenomenon of globalization has a number of implications for education policy making processes and not least it has had an impact on who conducts policy studies and how This book brings together a variety of contributions which explore recent political economic changes affecting education policy making

processes including the ascension of neo liberalism and the transnationalization of education policy making as well as the tension between research of policy and research for policy Working from different perspectives the authors help to provide a better understanding of these two important sets of issues which the field of education must contend with today

Higher Education Policy: An International Comparative Perspective F. Kaiser, P. Maassen, L. Meek, F. van Vught, E.

de Weert, L. Goedegebuure, 2014-06-28 Tremendous changes are affecting the structure and funding of higher education in many countries. This volume attempts to identify and analyze the principles, structural features and modes of work of the different higher education policies operating in eleven countries as well as their commonalities and differences in the light of both general international trends and country specific factors. In order to gather the relevant information for the project, national correspondents were provided with an overarching framework to guide them in their work and to ensure maximum comparability of the resulting reports. Each country report is broken down into four sections: the structure and goals of higher education systems; authority in the system; higher education policy; and the impact of each on institutional governance and management. The final chapter draws together the general trends which have emerged: a move towards less state control; a strengthening of institutional autonomy; and increased governance competition between institutions; privatization of funding; greater market orientation; and growing institutional accountability for quality and service. **Education and the Public Interest**

Edward P. St. John, 2007-05-28 Economic globalization has been accompanied by implementation of education reforms linked to accountability and public finance schemes that emphasize student choice in schools and student loans in higher education. In the U.S. these reforms are rationalized based on intermediate variables like the number of math credits completed in high school and net prices. However, the reforms rationalized based on this research are seldom evaluated in relation to outcomes, i.e. measures of student achievement and equal opportunity to attain an education. In *Education and the Public Interest*, the editor re-examines the political rationales for these reforms. John Rawls's theory of justice is reconstructed to develop a framework for assessing the effects of public policy on these outcomes. This volume undertakes a comparative study of the states in the U.S. to examine how education reforms influence student achievement, high school graduation and college access, and finance schemes influence college access. Policies implemented by states in the 1990s were associated with improved achievement as measured by test scores for high school students. These policies also correlate with increased high school drop-out rates and the widening gap in college enrolment rates across income groups. This volume considers how privatization and accountability policies can be reconstructed to reduce inequality while continuing to improve student achievement and college enrolment. I enjoyed reading the book and benefited from it, and I feel confident others will as well. I am particularly taken by its sweep and by the skill and persuasiveness with which the author ties together the broad trends and themes of privatization, globalization, school reform, preparation, equity, equality and college access. Prof. James C. Hearn, Vanderbilt University, USA. What I especially like about this book is the framing of the importance of the topic in terms of the global political and economic changes and the notion of access to quality education as a basic right. Prof. Laura W. Perna, College of Education, University of Maryland, USA. **Shaping Education Policy** Douglas E. Mitchell, Dorothy Shipps, Robert L.
