Education And Disability In Cross Cultural Perspective:

Education and Disability in Cross-Cultural Perspective Susan Jeanne Peters, 2013-11-26 A radical departure from previous chronicles of education for people with disabilities this book views special education from a broader perspective Its central thesis is that cultural values and expectations play a dominant role in understanding the structure and function of special education While theories of the social construction of disability have been written about in a growing body of research since the 1960s no attempt has been made to create a cross cultural framework This work offers such a framework Eight chapters written by educators in each country s educational system cover the following nations China Great Britain Hungary Japan Iran Pakistan United States and Zimbabwe Historical discussions in each chapter provide a context for current practice An index and illustrations are also included **Disability, Human Rights and Education** Felicity Armstrong, Len Barton, 1999-10-16 This book recognizes the importance of an informed cross cultural understanding of the policies and practices of different societies within the field of disability human rights and education It represents an attempt to critically engage with issues arising from the historical and contemporary domination of portrayals of the western as advanced democratic and exemplary in contrast to the construction of the rest of the world as backward primitive and inferior in these fundamental areas How human rights are understood in different contexts is a key theme in this book Importantly some contributors raise questions about the value of a human rights model across all societies Other contributors see the struggle for human rights as at the heart of the struggle for an inclusive society The implications for education arising from this debate are identified and a series of questions are raised by each author for further reflection and discussion as well as providing a stimulus for developing future research **Disability Human Rights and Education** is recommended reading for students and researchers interested in Disability Studies inclusive education and social policy It is also directly relevant to professionals and policy makers in the field seeking a greater understanding of cross cultural perspectives *Education and Disability in Cross-Cultural Perspective* Susan Jeanne Peters, 2013-11-26 A radical departure from previous chronicles of education for people with disabilities this book views special education from a broader perspective Its central thesis is that cultural values and expectations play a dominant role in understanding the structure and function of special education While theories of the social construction of disability have been written about in a growing body of research since the 1960s no attempt has been made to create a cross cultural framework This work offers such a framework Eight chapters written by educators in each country s educational system cover the following nations China Great Britain Hungary Japan Iran Pakistan United States and Zimbabwe Historical discussions in each chapter provide a context for current practice An index and illustrations are also included **Policy, Experience and Change: Cross-Cultural Reflections on Inclusive Education** Len Barton, Felicity Armstrong, 2007-02-08 One of the qualities of this book is the authors engagement with personal experience This is part of the contextualising of issues within particular cultural historical

and social contexts I shall begin the Foreword in the same spirit by recounting an experience that is still a foundation for analysing and developing my own understanding This happened some twenty five years ago I was going with Vic Finkelstein a disabled academic and activist to a seminar on a hot summer's day making our way across the Open University campus in Milton Keynes The seminar was entitled The Problems of Integration Making conversation with Vic I suggested that the seminar sounded interesting His response was immediate and direct no it was not interesting the problems for disabled people were the problems of segregation not the problems of integration As he did often for me Vic turned understanding on its head and his seemingly simple observation carried ever increasing ripples of critical questioning Reading of international developments and of the specifics of education policy provision and practice across the widely differing circumstances found in different nation states from the majority as well as the minority world challenges deepens and confirms understanding There are not surprisingly considerable diversities and complexities and recurring themes that speak to both and fire critical questioning The complexities pretty quickly give food for thought and ring bells of caution The first for me is the lack of digestion the impossibility of comprehensive knowledge

of inclusion and argues that concepts of disability and inclusion are culturally constructed. Disability and inclusion are concepts which do not define a global agenda in the sense that one size fits all. Rather they should be seen as being completely context dependent and that they should be deconstructed with respect to specific cultural contexts with respects to society, ethics, religion and history. The main argument of the book is that many cultural backgrounds including Egyptians have their own long standing beliefs and practices which do not define or address disability in the same way as western culture. Such cultural differences in understanding disability may lead to different understandings, conceptualizations and practices of inclusion. The book articulates disability and inclusion within a socio ethical religious discourse based on the Islamic underpinnings of equality and differences. This discourse enhances and supports the calls for considering inclusion and disability within a cultural model that takes into account the common values about disability in any given context which consequently will affect the way educational provision is provided in that context. Finally the book challenges the psychological concept of attitude that has been represented in the literature simply as a matter of acceptance or rejection. Inclusion, Disability and Culture shows that attitude is a complex and context dependent issue that can't be understood in isolation from the wider context within which such responses were created. Specifically the role of the social views about disability, religious values, school cultures, educational system and structural and organizational constraints can't be underestimated in understanding teachers attitudes towards a complex issue like inclusion.

Disability & the Politics of Education Susan Lynn Gabel, Scot Danforth, 2008. Disability and the Politics of Education: An International Reader is a rich resource that deals comprehensively with the many aspects of the complex topic of disability studies in education. For nearly two decades global attention has been given to education as a human right through global initiatives such as Education for All (EFA) and the Salamanca Statement. Yet according to UNESCO reaching the goals of EFA remains one of the most daunting challenges facing the global community. Today millions of the world's disabled children cannot obtain a basic childhood education particularly in countries with limited resources. Even in the wealthiest countries many disabled children and youth are educationally segregated from the nondisabled particularly if they are labeled with significant cognitive impairment. International agencies such as the United Nations and the World Bank have generated funds for educational development but unfortunately these funds are administered with the assumption that west is best thereby urging developing countries to mimic educational policies in the United States and the United Kingdom in order to prove their aid worthiness. This McDonaldization of education reproduces the labeling, resource allocation and social dynamics long criticized in disability studies. The authors in this volume explore these subjects and other complexities of disability and the politics of education. In doing so they demonstrate the importance and usefulness of international perspectives and comparative approaches.

The Irregular School Roger Slee, 2011-04-19. Should disabled students be in regular classrooms all of the time or some of the time? Is the regular school or the special school or both the solution for educating students with a wide range of differences?

Inclusive education has been incorporated in government education policy around the world. Key international organisations such as UNESCO and OECD declare their commitment to Education for All and the principles and practice of inclusive education. There is no doubt that despite this respectability inclusive education is hotly contested and generates intense debate amongst teachers, parents, researchers and policy makers. People continue to argue over the nature and extent of inclusion. The Irregular School explores the foundations of the current controversies and argues that continuing to think in terms of the regular school or the special school obstructs progress towards inclusive education. The book contends that we need to build a better understanding of exclusion, the foundations of the division between special and regular education and of school reform as a precondition for more inclusive schooling in the future. Schooling ought to be an apprenticeship in democracy and inclusion is a prerequisite of a democratic education. The Irregular School builds on existing research and literature to argue for a comprehensive understanding of exclusion, a more innovative and aggressive conception of inclusive education and a genuine commitment to school reform that steps aside from the troubled and troubling notions of regular schools and special schools. It will be of interest to all those working and researching in the field of inclusive education.

The SAGE Handbook of Special Education Lani Florian, 2013-12-18. The second edition of The SAGE Handbook of Special Education provides a comprehensive overview of special education offering a wide range of views on key issues from all over the world. The contributors bring together up to date theory, research and innovations in practice with an emphasis on future directions for the role of special education in a global context of inclusion. This brand new edition features new chapters on families, interagency collaboration and issues of lifelong learning. The UN Convention on the Rights of Persons with Disabilities, Policy reform proposals, Equity and social justice in education, The impact of new thinking on assessment, Issues and developments in classification, The preparation and qualifications that teachers need. The Handbook's breadth, clarity and academic rigour will make it essential reading for researchers and postgraduate students and also for practitioners, teachers, school managers and administrators.

Controversial Issues In A Disabling Society Swain, John, French, Sally, Cameron, Colin, 2003-01-01. *Controversial Issues in a Disabling Society* has been written specifically to raise questions and stimulate debate. It has been designed for use with students in group discussion and to support in depth study on a variety of professional courses. It covers a wide range of specific substantive issues within Disability Studies in a series of succinct chapters. Each chapter sets a question for debate, places the key issues in context and presents a particular argument. This is an accessible and engaging book which challenges dominant positions and ideologies from a social model viewpoint of disability.

World Yearbook of Education 1993 Peter Mittler, Ron Brouillette, Duncan Harris, 2019-08-08. First published in 2005. The goal of Education For All set by the United Nations at the 1990 Jomtien Thailand Conference and adopted by heads of state at the World Summit for Children in the same year confronts all of us with the fundamental challenge of including children with disabilities in the education system of all nations. The aim of this book is to record, analyse and celebrate

positive signs of growth and development in the field of special needs education but with particular reference to children with significant disabilities The special education theme was selected for the 1993 edition of The World Yearbook of Education in synchrony with the ending of the UN Decade of Disabled Persons 1983 to 1992 **Encyclopedia of Disability**
