Education, Training and the Future of Work II Mike Flude, Sandy Sieminski, 2013-10-18 This volume focuses on the recent changes in education and training policy mainly in the UK The considerable developments of past years and the ways in which they have affected both education and training are examined The contributors analyse the methods by which we educate our workforce and look closely at the kind of training now offered to those in work The chapters in this reader cover the role of the state how economic factors influence education national education and training policy the political factor Other countries including Germany are looked at and there is reflection on the ways in which the new industry led qualifications such as NVQs have fared There is careful analysis as to how much the political climate of the time influenced developments There is thorough research to back up claims made throughout the book and many practical examples are referred to What emerges is an incisive examination of current trends in education and the workplace

Industrial Training and Technological Innovation Howard Gospel, 2010-11 Taking an international and comparative perspective this book focuses on the relationship between industrial training and technological change in three major global economies the UK USA and Japan The contributors an international group of leading researchers look at the origins and development of training in these countries and analyse the benefits resulting from the interaction of a skilled workforce and technological change This analysis of training in major industrial nations reveals the full complexity of the relationship between labour and technological change It shows the value of an approach which is both historical and comparative and highlights the importance of education and training as a necessary basis for successful innovation

The International Handbook of Educational Research in the Asia-Pacific Region J.P. Keeves, Ryo Watanabe, 2013-11-11 The aim of the Handbook is to present readily accessible but scholarly sources of information about educational research in the Asia Pacific region The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region In so doing the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of these problems and issues Moreover since new problems and issues are constantly arising the articles in the Handbook also indicate the likely directions of future developments The different articles within the Handbook seek to conceptualize the problems in each specific content area under review provide an integration of the research conducted within that area the theoretical basis of the research the practical implications of the research and the contribution of the research towards the resolution of the problems identified Thus the articles do not involve the reporting of newly conducted research but rather require a synthesis of the research undertaken in a particular area with reference to the research methods employed and the

theoretical frameworks on which the research is based In general the articles do not advocate a single point of view but rather present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research Furthermore it should be noted that the Handbook is not concerned with research methodology and only considers the methods employed in inquiry in so far as the particular methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region

Employment Policies of the United States and Japan Joint United States-Japan Employment Study,1969

Engineers in Japan and Britain Kevin McCormick,2013-02-01 Engineers are a key occupational group in the transformation of the modern world Contrasts between Japans economic miracle and Britains relative economic decline have often been linked to differences in education training and employment of engineers Yet such views have often rested on little more than colourful anecdotes and selective statistics Using careful and systematic comparisons Kevin McCormick locates the differences between rhetoric and reality to dismiss both the inflated claims of the 1980s and the excessive detracting of the 1990s with Japans prolonged recession
