Foreign Investments and Political Regimes Oksan Bayulgen, 2010 Political democratization and economic globalization have been two of the most important global trends of the past few decades But how are they connected Do the domestic political institutions affect a country's attractiveness to foreign investors Can countries that democratize attract relatively more foreign investments Drawing on three in depth case studies of oil rich countries and statistical analyses of 132 countries over three decades Oksan Bayulgen demonstrates that the link between democratization and FDI is nonlinear Both authoritarian regimes and consolidated democracies have institutional capabilities that though different are attractive to foreign investors Democracies can provide long term stability and authoritarian regimes can offer considerable flexibility The regimes that have started on the road to democracy but have not yet completed it tend to have political institutions that provide neither flexibility nor stability These hybrid regimes then also find it relatively more difficult to construct a policy environment that is attractive to foreign investments These findings have deep implications for the link between democratization and globalization but also how globalization may affect political social and economic development Provided by publisher

Local Heroes Kathryn Stoner-Weiss, 2021-04-13 In *Local Heroes* Kathryn Stoner Weiss analyzes a crucial aspect of one of the great dramas of modern times the reconstitution of the Russian polity and economy after more than seventy years of communist rule This is the first book to look comprehensively and systematically at Russia's democratic transition at the local level Its goal is to explain why some of the new political institutions in the Russian provinces weathered the monumental changes of the early 1990s better than others Using newly available economic political and sociological data to test various theories of democratization and institutional performance Stoner Weiss finds that traditional theories are unable to explain variations in regional government performance in Russia *Local Heroes* argues that the legacy of the former economic system influenced the operation of new political institutions in important and often unexpected ways Past institutional structures specifically the concentration of the regional economy promoted the formation of political and economic coalitions within a new proto democratic institutional framework These coalitions have had positive effects on governmental performance For democratic theorists this may be a surprising conclusion However it is possible as Stoner Weiss suggests that the needs of democratic development may be different in the short run than in the long run The local heroes of today may be impediments to the further development of democracy tomorrow This provocative work solidly grounded in research and theory will interest anyone concerned with issues of economic and political transition
