**Globalism in the Middle Ages and the Early Modern Age** Albrecht Classen, 2023-09-05 Although it is fashionable among modernists to claim that globalism emerged only since ca 1800 the opposite can well be documented through careful comparative and transdisciplinary studies as this volume

demonstrates offering a wide range of innovative perspectives on often neglected literary philosophical historical or medical documents Texts images ideas knowledge and objects migrated throughout the world already in the pre modern world even if the quantitative level compared to the modern world might have been different In fact by means of translations and trade for instance global connections were established and maintained over the centuries Archetypal motifs developed in many literatures indicate how much pre modern people actually shared But we also discover hard core facts of global economic exchange import of exotic medicine and on another level intensive intellectual debates on religious issues Literary evidence serves best to expose the extent to which contacts with people in foreign countries were imaginable often desirable and at times feared of course The pre modern world was much more on the move and reached out to distant lands out of curiosity economic interests and political and military concerns Diplomats crisscrossed the continents and artists poets and craftsmen traveled widely We can identify for instance both the Vikings and the Arabs as global players long before the rise of modern globalism so this volume promises to rewrite many of our traditional notions about pre modern worldviews economic conditions and the literary sharing on a global level as perhaps best expressed by the genre of the fable     Strategic Workforce Reskilling in Service Marketing J Nair, Arjun, Manohar, Sridhar, B. Limbu, Yam, A. Huhmann, Bruce, 2025-04-17 In the contemporary landscape there is a critical nexus of service marketing innovation workforce upskilling and ethical business paradigms The domain where marketing innovation intersects sustainability and corporate ethics is underexplored Enterprises can adopt avant garde strategies such as voice search technology to enhance service provision while advancing sustainability and corporate social responsibility CSR However voice search technology remains an under researched area particularly its ramifications for workforce reskilling and its capacity to transform service marketing dynamics Strategic Workforce Reskilling in Service Marketing paves the way for novel academic inquiry and theoretical elaboration in an era of rapidly evolving technological paradigms Through a synthesis of theoretical frameworks and empirical case studies it offers profound insights into the confluence of technology reskilling and responsible corporate practices Covering topics such as employee retention gamified training and environmental awareness this book is an excellent resource for business leaders marketing practitioners human resources professionals policymakers researchers academicians and more
