Grandtner,2005-04-08 This dictionary will present all currently accepted generic specific sub specific and variety names of trees excluding fossil and more recently extinct taxa hybrids and cultivars Only the indigenous trees of a continent those wild species that were natural elements of the spontaneous forest vegetation before the arrival of Europeans or other colonizers are included Each generic entry includes the family to which it is assigned the synonyms of the Latin name and the English French Spanish trade and other names For the English and French names the standard name is listed first followed by other available names with in parentheses the countries where they are used Where appropriate names in additional languages are also included Each infrageneric species subspecies variety entry includes in addition the distribution height type of foliage ecological characteristics and main uses of the tree when available In this volume only taxa indigenous on the North American continent are included considered in a geographical not in a political sense This means from Alaska and Greenland to Panama including Caribbean but excluding Hawaii *Elsevier's Dictionary of Medicine* A.
