Elsevier's Electronic Bibliography Z. Deyl, J. Janák, V. Schwarz, 2000 This bibliography is the updated and revised edition of Elsevier's Electronic Bibliography Analytical Separations that was first published in 1998 Covering the years 1990 to 1999 this new edition deals with all categories of chromatographic and electromigration types of separation The basic categories of classification are techniques and applications For each of the 100 000 articles the authors names full title journal of publication and page numbers are given The complete bibliography can be fully searched on these areas as well as technique and subject Additional features Now covering the years 1989 1999 Includes ca 20 000 new articles in separation science Yearly updates to follow Search time is reduced with a new user interface Customised searches on author title journal year of publication technique and subject To facilitate searches articles have been classified by a team of experts in 150 unique categories Users can print and or save the results of database searches using the Built in Report Function The MakeRef Function allows for insertion of bibliographic information directly into documents The whole database has been structured into a format that allows for migration to a web environment *Separations Chemistry* Fedor Macášek, James D.

Navratil, 2016-06-06 Separation of chemical species is a gate to final success of synthesis and preparation of compounds in pure and defined state Variability of natural and artificial mixtures to be treated is enormous Task of chemistry is to separate components of homogeneous mixtures the gaseous and liquid solutions The book concentrates on understanding the basic philosophies of both equilibrium and nonequilibrium chemical thermodynamics and engineering performance that lay in principle of separation technique such as distillation crystallization centrifugation sorption membrane separations chromatography and liquid liquid extraction Specific phenomena connected with photochemical separation isotope composition and radioactivity are discussed as well The book is written for advanced students of chemistry having the knowledge of physical chemistry Calculation examples are based on the international system of units Unique list of over 1 300 full references covers scientific literature of the eighteenth to the twenty first centuries *A Century of Separation Science*

Haleem J. Issaq, 2001-12-19 *A Century of Separation Science* presents an extensive overview of the critical developments in separation science since 1900 covering recent advances in chromatography electrophoresis field flow fractionation countercurrent chromatography and supercritical fluid chromatography for high speed and high throughput analysis **Analytical Separation Science, 5 Volume Set** Jared Anderson, Alain Berthod, Veronica Pino, Apryll M.

Stalcup, 2016-02-29 Endlich ein Forschungsleitfaden für Wissenschaftler des Fachgebiets die neue Methoden entwickeln oder einsetzen Dieses Handbuch umfasst fünf thematische Bände und bietet damit einen umfassenden Überblick über das Fachgebiet Erläutert werden Grundlagen die Methodenentwicklung und hochkarätige Anwendungen für alle wichtigen Analyseverfahren darunter chromatische Verfahren Techniken in den Bereichen Elektromigration und Membranen Dieses Referenzwerk umfasst ein breites Spektrum und legt den Schwerpunkt auf Entwicklungen für die Zukunft Damit ist es ein Muss für Forscher

und eine wertvolle Wissensquelle für Studenten im Hauptstudium und Studienabsolventen

Handbook of Blind Source Separation Pierre Comon, Christian Jutten, 2010-02-17 Edited by the people who were forerunners in creating the field together with contributions from 34 leading international experts this handbook provides the definitive reference on Blind Source Separation giving a broad and comprehensive description of all the core principles and methods numerical algorithms and major applications in the fields of telecommunications biomedical engineering and audio acoustic and speech processing Going beyond a machine learning perspective the book reflects recent results in signal processing and numerical analysis and includes topics such as optimization criteria mathematical tools the design of numerical algorithms convolutive mixtures and time frequency approaches This Handbook is an ideal reference for university researchers R algebraic identification of under determined mixtures time frequency methods Bayesian approaches blind identification under non negativity approaches semi blind methods for communications Shows the applications of the methods to key application areas such as telecommunications biomedical engineering speech acoustic audio and music processing while also giving a general method for developing applications

Carbohydrate Analysis by Modern Liquid Phase Separation Techniques Ziad El Rassi, 2021-08-15 Carbohydrate Analysis by Modern Liquid Phase Separation Techniques Second Edition presents readers with the various principles of modern liquid phase separation techniques and their contributions to the analysis of complex carbohydrates and glycoconjugates In a selection of all new chapters this fully updated volume covers each technique in detail The book aims to help analysts solve any of the many practical problems they may face in tackling the analysis of carbohydrates In addition it addresses current difficulties that must be resolved in carbohydrate research thus inspiring further important technological developments to meet these challenges This is an essential resource for anyone seeking a broad view of the science of carbohydrates and separation techniques Covers the basic principles of modern liquid phase separation techniques along with their applications Compiles up to date information on the field of carbohydrate analysis along with updates on separation science Focuses on problems currently faced in carbohydrate analysis and the solutions necessary for further progress

L'Annunziata, 2020-03-03 Handbook of Radioactivity Analysis Radiation Physics and Detectors Volume One and Radioanalytical Applications Volume Two Fourth Edition is an authoritative reference on the principles practical techniques and procedures for the accurate measurement of radioactivity everything from the very low levels encountered in the environment to higher levels measured in radioisotope research clinical laboratories biological sciences radionuclide standardization nuclear medicine nuclear power and fuel cycle facilities and in the implementation of nuclear forensic analysis and nuclear safeguards It includes sample preparation techniques for all types of matrices found in the environment including soil water air plant matter and animal tissue and surface swipes Users will find a detailed discussion of our current understanding of the atomic nucleus nuclear stability and decay nuclear radiation and the interaction of radiation with matter relating to the best methods for radionuclide detection and measurement Spans two volumes Radiation Physics and Detectors and Radioanalytical Applications Includes a much expanded treatment of calculations required in the measurement of radionuclide decay energy of decay nuclear reactions radiation attenuation nuclear recoil cosmic radiation and synchrotron radiation Includes the latest advances in liquid and solid scintillation analysis alpha and gamma spectrometry mass spectrometric analysis gas ionization and nuclear track analysis and neutron detection and measurement Covers high sample throughput microplate techniques and multi detector assay methods **Fundamentals of Membrane Separation Technology** Zhan Wang, 2024-01-23 Fundamentals of Membrane Separation Technology provides a comprehensive and systematic introduction to this environmentally friendly separation process Using a structured format that promotes comprehension and implementation each chapter provides overviews principles materials and preparation and industrial applications Each chapter then concludes with future prospects references and end of chapter exercises Written for students and professionals this book is an ideal reference for those who wish to better understand the fundamentals and applications of membrane technology Evaluates present and future applications of more recently developed membranes in energy conversion biomedical components controlled release devices and environmental engineering Provides a comprehensive overview of all aspects of membranes and their applications Includes numerous industrial case studies practical examples and questions **Computational Analysis of Sound Scenes and Events** Tuomas Virtanen, Mark D. Plumbley, Dan Ellis, 2017-09-21 This book presents computational methods for extracting the useful information from audio signals collecting the state of the art in the field of sound event and scene analysis The authors cover the entire procedure for developing such methods ranging from data acquisition and labeling through the design of taxonomies used in the systems to

signal processing methods for feature extraction and machine learning methods for sound recognition The book also covers advanced techniques for dealing with environmental variation and multiple overlapping sound sources and taking advantage of multiple microphones or other modalities The book gives examples of usage scenarios in large media databases acoustic monitoring bioacoustics and context aware devices Graphical illustrations of sound signals and their spectrographic representations are presented as well as block diagrams and pseudocode of algorithms

Latent Variable Analysis and Signal Separation Emmanuel Vincent, Arie Yeredor, Zbyněk Koldovský, Petr Tichavský, 2015-08-14 This book constitutes the proceedings of the 12th International Conference on Latent Variable Analysis and Signal Separation LVA ICS 2015 held in Liberec Czech Republic in August 2015 The 61 revised full papers presented 29 accepted as oral presentations and 32 accepted as poster presentations were carefully reviewed and selected from numerous submissions Five special topics are addressed tensor based methods for blind signal separation deep neural networks for supervised speech separation enhancement joint analysis of multiple datasets data fusion and related topics advances in nonlinear blind source separation sparse and low rank modeling for acoustic signal processing

Chiral Analysis Kenneth W. Busch, Marianna A. Busch, 2011-10-13 Chiral Analysis covers an important area of analytical chemistry of relevance to a wide variety of scientific professionals The target audience is scientific professionals with an undergraduate background in chemistry or a related discipline specifically organic chemists researchers in drug discovery pharmaceutical researchers involved with process analysis or combinatorial libraries and graduate students in chemistry Chapters have been written with the nonspecialist in mind so as to be self contained Broad coverage spectroscopic and separation methods covered in a single volume Up to date and detailed review of the various techniques available and or under development in this field Contributions from leading experts in the field

Fundamentals of Music Processing Meinard Müller, 2015-07-21 This textbook provides both profound technological knowledge and a comprehensive treatment of essential topics in music processing and music information retrieval Including numerous examples figures and exercises this book is suited for students lecturers and researchers working in audio engineering computer science multimedia and musicology The book consists of eight chapters The first two cover foundations of music representations and the Fourier transform concepts that are then used throughout the book In the subsequent chapters concrete music processing tasks serve as a starting point Each of these chapters is organized in a similar fashion and starts with a general description of the music processing scenario at hand before integrating it into a wider context It then discusses in a mathematically rigorous way important techniques and algorithms that are generally applicable to a wide range of analysis classification and retrieval problems At the same time the techniques are directly applied to a specific music processing task By mixing theory and practice the book's goal is to offer detailed technological insights as well as a deep understanding of music processing applications Each chapter ends with a section that includes links to the research literature suggestions for further reading a list of references and exercises The

chapters are organized in a modular fashion thus offering lecturers and readers many ways to choose rearrange or supplement the material Accordingly selected chapters or individual sections can easily be integrated into courses on general multimedia information science signal processing music informatics or the digital humanities
