Fish,Paul R. Fish,M. Elisa Villalpando,2018-07-02 The intriguing hilltop archaeological sites known as cerros de trincheras span almost three millennia from 1250 BC to AD 1450 Archaeologists have long viewed them as a unitary phenomenon because they all have masonry architecture and occur mostly on low volcanic peaks Scattered across the southwestern United States and northwestern Mexico these sites received little comprehensive research until the 1980s This first volume in the Amerind Studies in Archaeology series from the Amerind Foundation documents considerable variability among trincheras sites with respect to age geographic location and cultural affiliation This multi author volume integrates a remarkable body of new data representing a textbook like array of current research issues and methodologies in the archaeology of the region Scholars from the United States and Mexico offer original research on trincheras sites in Chihuahua Sonora Arizona and New Mexico Scales of focus range from intensive intrasite sampling to the largest contiguous survey in the region Authors incorporate

spatial analyses artifact studies environmental and subsistence data ethnographic analogs ethnohistorical records cross cultural comparisons archaeology and archival resources The volume s discussions contribute innovative approaches to worldwide interpretations of landscapes marked by hilltop sites Contributors present meticulous research arguing that many trincheras sites were primarily used for habitation and ceremonial rites in addition to previously predominant views of them as defensive refuges Because trincheras occupations date from the late preceramic era to shortly before Spanish contact authors relate them to early forms of agriculture the emergence of village life the appearance of differentiated settlement systems and tendencies toward political and ritual centralization Detailed maps and figures illustrate the text and close up aerial photographs capture the visual essence of the sites highlighted by a section that includes color photographs and an essay by renowned photographer Adriel Heisey Contributors Christian E Downum Paul R Fish Suzanne K Fish Robert J Hard Adriel Heisey Stephen A Kowalewski Randall H McGuire Ben A Nelson John R Roney Judith Taylor M Elisa Villalpando Joseph Vogel Henry Wallace David R Wilcox J Scott Wood

The Legacy of Conquest: The Unbroken Past of the American West Patricia Nelson Limerick, 2011-02-07 Limerick is one of the most engaging historians writing today Richard White The settling of the American West has been perceived throughout the world as a series of quaint violent and romantic adventures But in fact Patricia Nelson Limerick argues the West has a history grounded primarily in economic reality in hardheaded questions of profit loss competition and consolidation Here she interprets the stories and the characters in a new way the trappers traders Indians farmers oilmen cowboys and sheriffs of the Old West meant business in more ways than one and their descendents mean business today

A History of Inspiration through Metaphors of Learning Robert Nelson, 2022-06-23 In this book Robert Nelson reminds us that one of the most important elements of teaching and learning is to inspire and to be inspired Given that inspiration itself has evolved through metaphor the inquiry distinguishes inspirational learning by its peculiarly metaphoric character We acknowledge that students respond to passion and enthusiasm that they seek stimulation purpose motivation and inspiration But because these triggers operate through mysterious language and arrive at their modern usage through metaphor we have no means of penetrating their structure or gaining access to their powers We mishandle educational practice through a focus on technical process and machinery rather than the imaginary animating vision that propagates inspired study through metaphor This book corrects the imbalance and argues that metaphors are intrinsic to all our educational ambitions It

reveals the wide metaphorical backdrop of learning and teaching that works on an unconscious level and is only revealed through analysing the language that describes what matters most Inviting readers to explore learning in a non traditional way this book will be of interest to researchers and students in education seeking to understand better the nature of inspiration The Peoples of Pennsylvania David E. Washburn,1981
