The Elusive Synthesis A. I. Tauber, 2014-01-15

**The Elusive Synthesis: Aesthetics and Science** A.I.

Tauber, 1996-10-31 The tension between art and science may be traced back to the Greeks What became natural philosophy and later science has traditionally been posed as a fundamental alternative to poetry and art It is a theme that has commanded central attention in Western thought as it captures the ancient conflict of Apollo and Dionysus over what deserves to order our thought and serve as the aspiration of our cultural efforts The modern schism between art and science was again clearly articulated in the Romantic period and seemingly grew to a crescendo fifty years ago as a result of the debate concerning atomic power The discussion has not abated in the physical sciences and in fact has dramatically expanded most prominently into the domains of ecology and medicine Issues concerning the role of science in modern society although heavily political must be regarded at heart as deeply embedded in our cultural values Although each generation addresses them anew the philosophical problems which lay at the foundation of these fundamental concerns always appear fresh and difficult This anthology of original essays considers how science might have a greater commonality with art than was perhaps realized in a more positivist era The contributors are concerned with how the aesthetic participates in science both as a factor in constructing theory and influencing practice The collection is thus no less than a spectrum of how Beauty and Science might be regarded through the same prism

**Endless Forms Most Beautiful: The New Science of Evo**

**Devo** Sean B. Carroll, 2006-04-17 A beautiful and very important book Lewis Wolpert American Scientist For over a century opening the black box of embryonic development was the holy grail of biology Evo Devo Evolutionary Developmental Biology is the new science that has finally cracked open the box Within the pages of his rich and riveting book Sean B Carroll explains how we are discovering that complex life is ironically much simpler than anyone ever expected

Wonder-Full Education Kieran Egan, Annabella I. Cant, Gillian Judson, 2013-07-24 For many children much of the time their experience in classrooms can be rather dull and yet the world the school is supposed to initiate children into is full of wonder This book offers a rich understanding of the nature and roles of wonder in general and provides multiple suggestions for to how to revive wonder in adults teachers and curriculum makers and how to keep it alive in children Its aim is to show that adequate education needs to take seriously the task of evoking wonder about the content of the curriculum and to show how this can routinely be done in everyday classrooms The authors do not wax flowery they present strong arguments based on either research or precisely described experience and demonstrate how this argument can be seen to work itself out in daily practice The emphasis is not on ways of evoking wonder that might require virtuoso teaching but rather on how wonder can be evoked about the everyday features of the math or science or social studies curriculum in regular classrooms

**Thomas Kuhn: The Structure of Aesthetic Revolutions** Oana Șerban, 2022-11-07 This book reflects the most recent research devoted to a systematized perspective and a critical reconstruction of previous theoretical attempts of explaining

justifying and continuing Kuhn's ingenious hypothesis in arts Hofstadter Clignet and Habermas revealed to be the most engaged scholars in solving this aesthetic puzzled problem In this context the structural similarities between science and arts are attentively evaluated thus satisfying an older concern attributed to the historical Kuhn Kubler dispute extensively commented along the pages of this book How can we track the matter of rationality and truth in art and aesthetics inspired by scientific perspectives Are artistic styles similar to scientific paradigms Are we entitled to pursue paradigms and masterpieces as rational models in science respectively in arts On what possible grounds can we borrow from science notions such as progress and predictability in the study of the evolution of art and its aesthetic backgrounds Are the historical dynamics of science and art affected by political factors in the same manner This book will be of interest to philosophers but also to historians of science and historians of art alike in the reassessment it provides of recent debates on reshaping the art world using Kuhn's paradigm shift

*Representation in Scientific Practice Revisited* Catelijne Coopmans, Janet Vertesi, Michael E. Lynch, Steve Woolgar, 2014-01-03 A fresh approach to visualization practices in the sciences that considers novel forms of imaging technology and draws on recent theoretical perspectives on representation *Representation in Scientific Practice* published by the MIT Press in 1990 helped coalesce a long standing interest in scientific visualization among historians philosophers and sociologists of science and remains a touchstone for current investigations in science and technology studies This volume revisits the topic taking into account both the changing conceptual landscape of STS and the emergence of new imaging technologies in scientific practice It offers cutting edge research on a broad array of fields that study information as well as short reflections on the evolution of the field by leading scholars including some of the contributors to the 1990 volume The essays consider the ways in which viewing experiences are crafted in the digital era the embodied nature of work with digital technologies the constitutive role of materials and technologies from chalkboards to brain scans in the production of new scientific knowledge the metaphors and images mobilized by communities of practice and the status and significance of scientific imagery in professional and popular culture Contributors Morana Ala Michael Barany Anne Beaulieu Annamaria Carusi Catelijne Coopmans Lorraine Daston Sarah de Rijcke Joseph Dumit Emma Frow Yann Giraud Aud Sissel Hoel Martin Kemp Bruno Latour John Law Michael Lynch Donald MacKenzie Cyrus Mody Natasha Myers Rachel Prentice Arie Rip Martin Ruivenkamp Lucy Suchman Janet Vertesi Steve Woolgar

The Image in Mind Charles Taliaferro, Jil Evans, 2013-06-06 A philosophical inquiry into the strengths and weaknesses of theism and naturalism in accounting for the emergence of consciousness the visual imagination and aesthetic values The authors begin by offering an account of modern scientific practice which gives a central place to the visual imagination and aesthetic values They then move to test the explanatory power of naturalism and theism in accounting for consciousness and the very visual imagination and aesthetic values that lie behind and define modern science Taliaferro and Evans argue that evolutionary biology alone is insufficient to account for consciousness the visual imagination and aesthetic values Insofar as naturalism is compelled to go beyond evolutionary biology it does not fare as well as theism in terms of explanatory power

century     Nietzsche, Theories of Knowledge, and Critical Theory Babette Babich, Robert S. Cohen, 1999-08-31 Nietzsche Theories of Knowledge and Critical Theory the first volume of a two volume book collection on Nietzsche and the Sciences ranges from reviews of Nietzsche and the wide variety of epistemic traditions not only pre Socratic but Cartesian Leibnizian Kantian and post Kantian through essays on Nietzsche s critique of knowledge via his critique of grammar and modern culture and culminates in an extended section on the dynamic of Nietzsche s critical philosophy seen from the perspective of Habermas and critical theory This volume features a first time English translation of Habermas s afterword to his own German language collection of Nietzsche s Epistemological Writings     Nietzsche, Theories of Knowledge, and Critical Theory B.E. Babich, 2013-03-09 Nietzsche Theories of Knowledge and Critical Theory the first volume of a two volume book collection on Nietzsche and the Sciences ranges from reviews of Nietzsche and the wide variety of epistemic traditions not only pre Socratic but Cartesian Leibnizian Kantian and post Kantian through essays on Nietzsche s critique of knowledge via his critique of grammar and modern culture and culminates in an extended section on the dynamic of Nietzsche s critical philosophy seen from the perspective of Habermas and critical theory This volume features a first time English translation of Habermas s afterword to his own German language collection of Nietzsche s Epistemological Writings     **Power and Progress on the Prairie** Thomas Biolsi, 2018-05-22 A critical exploration of how modernity and progress were imposed on the people and land of rural South Dakota The Rosebud Country comprising four counties in rural South Dakota was first established as the Rosebud Indian Reservation in 1889 to settle the Sicangu Lakota During the first two decades of the twentieth century white homesteaders arrived in the area and became the majority population Today the population of Rosebud Country is nearly evenly divided between Indians and whites In Power and Progress on the Prairie Thomas Biolsi traces how a variety of governmental actors including public officials bureaucrats and experts in civil society invented and applied ideas about modernity and progress to the people and the land Through a series of case studies programs to settle surplus Indian lands to civilize the Indians to modernize white farmers to find strategic sites for nuclear missile silos and to extend voting rights to Lakota people Biolsi examines how these various problems came into focus for government experts and how remedies were devised and implemented Drawing on theories of governmentality derived from Michel Foucault Biolsi challenges the idea that the problems identified by state agents and the solutions they implemented were inevitable or rational Rather through fine grained analysis of the impact of these programs on both the Lakota and white residents he reveals that their underlying logic was too often arbitrary and devastating     **Evolution and Victorian Culture** Bernard V. Lightman, Bennett Zon, 2014-05-29 These essays examine the dynamic interplay between evolution and Victorian culture mapping new relationships between the arts and sciences     **Metaphysics or Modernity?** Simon Baumgartner, Thimo Heisenberg, Sebastian Krebs, 2014-03-19     **Darwin the Writer** George Levine, 2011-06-30 Charles Darwin s On the Origin of Species arguably the most important book written in English in the nineteenth century transformed the way we looked at

the world It is usually assumed that this is because the idea of evolution was so staggeringly powerful Prize winning author George Levine suggests that much of its influence was due in fact to its artistry to the way it was written Alive with metaphor vivid descriptions twists hesitations personal exclamations and humour the prose is imbued with the sorts of tensions ambivalences and feelings characteristic of great literature Although it is certainly a work of science the Origin is equally a work of literature at home in the company of celebrated Victorian novels such as Middlemarch and Bleak House books that give us a unique yet recognisable sense of what the world is really like while not being literally true Darwin s enormous cultural success Levine contends depended as much on the construction of his argument and the nature of his language as it did on the power of his ideas and his evidence By challenging the dominant reading of his work this impassioned and energetic book gives us a Darwin who is comic rather than tragic ebullient rather than austere and who takes delight in the wild and fluid entanglement of things

**Charles Darwin** Janet Browne, 2011-05-18 In 1858 Charles Darwin was forty nine years old a gentleman scientist living quietly at Down House in the Kent countryside respected by fellow biologists and well liked among his wide and distinguished circle of acquaintances He was not yet a focus of debate his big book on species still lay on his study desk in the form of a huge pile of manuscript For more than twenty years he had been accumulating material for it puzzling over questions it raised trying it seemed endlessly to bring it to a satisfactory conclusion Publication appeared to be as far away as ever delayed by his inherent cautiousness and wish to be certain that his startling theory of evolution was correct It is at this point that the concluding volume of Janet Browne s biography opens The much praised first volume Voyaging carried Darwin s story through his youth and scientific apprenticeship the adventurous Beagle voyage his marriage and the birth of his children the genesis and development of his ideas Now beginning with the extraordinary events that finally forced the Origin of Species into print we come to the years of fame and controversy For Charles Darwin the intellectual upheaval touched off by his book had deep personal as well as public consequences Always an intensely private man he suddenly found himself and his ideas being discussed and often attacked in circles far beyond those of his familiar scientific community Demonized by some defended by others including such brilliant supporters as Thomas Henry Huxley and Joseph Hooker he soon emerged as one of the leading thinkers of the Victorian era a man whose theories played a major role in shaping the modern world Yet in spite of the enormous new pressures he clung firmly sometimes painfully to the quiet things that had always meant the most to him his family his research his network of correspondents his peaceful life at Down House In her account of this second half of Darwin s life Janet Browne does dramatic justice to all aspects of the Darwinian revolution from a fascinating examination of the Victorian publishing scene to a survey of the often furious debates between scientists and churchmen over evolutionary theory At the same time she presents a wonderfully sympathetic and authoritative picture of Darwin himself right through the heart of the Darwinian revolution busily sending and receiving letters pursuing research on subjects that fascinated him climbing plants earthworms pigeons and of course the nature of

evolution writing books and contending with his mysterious intractable ill health Thanks to Browne's unparalleled command of the scientific and scholarly sources we ultimately see Darwin more clearly than we ever have before a man confirmed in greatness but endearingly human Reviewing *Voyaging* Geoffrey Moorhouse observed that if Browne's second volume is as comprehensively lucid as her first there will be no need for anyone to write another word on Darwin The Power of Place triumphantly justifies that praise Nature's Saviours Graham Huggan, 2013-08-22 Today's celebrity conservationists many of whom made their reputations through television and other visual media play a major role in drawing public attention to an increasingly threatened world This book one of the first to address this contribution focuses on five key figures the English naturalist David Attenborough the French marine adventurer Jacques Yves Cousteau the American primatologist Dian Fossey the Canadian scientist broadcaster activist David Suzuki and the Australian crocodile hunter Steve Irwin Some of the issues the author addresses include What is the changing relationship between western conservation and celebrity How has the spread of television helped shape and mediate this relationship To what extent can celebrity conservation be seen as part of a global system in which conservation like celebrity is big business The book critically examines the heroic status accorded to the five figures mentioned above taking in the various discourses around nature science nation gender through which they and their work have been presented to us In doing so it fills in the cultural historical and ideological background behind contemporary celebrity conservationism as a popular expression of a chronically endangered world
