The Case Study as Research Method Yves-Chantal Gagnon, 2011-01-27 T00:00:00-05:00 The main advantages of case research are that it can produce an in depth analysis of phenomena in context support the development of historical perspectives and guarantee high internal validity which is to say that the observed phenomena are authentic representations of reality In short the case study is adaptable to both the context and the researcher

Completing a Professional Practice Dissertation Jerry W. Willis, Ron Valenti, Deborah Inman, 2010-06-01 A growing number of both established and newly developed doctoral programs are focusing on the preparation of practitioners rather than career researchers Professional doctorates such as the Doctor of Nursing Practice DNP Doctor of Education EdD Doctor of Pharmacy PharmD Doctor of Professional Studies DProf or DPS and the Doctor of Psychology PsyD are in fact just a few of the professional doctorates being offered today Professional doctorates are the fastest growing segment of doctoral education The nature of the dissertation and the process of completing a dissertation can be quite different in a professional practice doctoral program but there are few resources for both students and faculty involved in completing and mentoring such dissertations

This book was written specifically for students and faculty involved in professional practice dissertation work. It addresses both the tasks and procedures that professional practice dissertations have in common with dissertations in research doctoral programs as well as the tasks and issues that are more common in professional practice doctoral programs. For example, negotiating entry into applied settings and securing the cooperation of practicing professionals is covered, as are alternative models for the dissertation, e.g., the three article dissertation or TAD. The book also covers tasks such as getting IRB approval for applied dissertation research conducted in the field and how to propose and carry out studies based on applied and professional models of research. This book, written by three experienced mentors of professional practice dissertation students, is the comprehensive guide for both students and faculty.

Sustainable Universities and Colleges Mark Starik, Paul Shrivastava, 2024-06-06. This book provides a set of decision and organizational models for the advancement of sustainability in higher education. International authors present how universities and colleges have attempted to advance sustainability both within and outside of their institutions and how institutions of higher education can continue to upgrade those efforts to help lead societies toward greater sustainability in the future.

Transdisciplinary Thinking and Acting Mathias Schüz, 2025-03-22. Complex problems can only be overcome with complex solutions. This dictum by Albert Einstein also applies to current world problems such as climate change, species extinction, the littering of our planet, and the growing gap between rich and poor. They overwhelm individual scientific disciplines. Therefore, they can only be solved through transdisciplinarity, i.e., beyond the individual disciplines in interaction with empirical knowledge of different provenance and philosophical reflection. This first volume of the book series Transdisciplinary Management of Social and Ecological Crises explains how transdisciplinarity is to be understood in general, what approaches exist, and how they contribute to solving the various world problems. In this context, the book addresses, among other things, the replacement of man's claim to dominion over nature, the overcoming of culturally determined

boundaries in human communities and integrative and agile management methods in business politics art and society It deals with a sustainable circular economy new forms of politics in the interest of all instead of a few learning from artists healthy and environmentally sound nutrition and spiritual mindfulness in dealing with oneself and other ways of life Thus the book is aimed at a broad audience from different disciplines interested in the perspective of and interaction with other disciplines to solve global problems Chapter Methodology of Transdisciplinarity Levels of Reality Logic of the Included Middle and Complexity is available open access under a Creative Commons Attribution 4.0 International License via link [springer.com](https://www.springer.com)

Institutional and Social Innovation for Sustainable Urban Development Harald Alard Mieg, Klaus Töpfer, 2013 Which new institutions do we need to trigger local and global sustainable urban development Are cities the right starting points for implementing sustainability policies If so what are the implications for city management This book reflects the situation of cities in the context of global change and increasing demands for sustainable development Global environmental change is forcing cities to think about their possible futures Common approaches to city governance from top down planning to participation are no longer sufficient *Using Social and Information Technologies for Disaster and Crisis Management* Jennex, Murray E., 2013-01-31 Using Social and Information Technologies for Disaster and Crisis Management highlights examples of disaster situations in recent years in which social and information technologies were useful in distributing and receiving information updates This comprehensive collection brings together research for practitioners and researchers interested in the uses of information technology in crisis management **Sustainability Science** Harald Heinrichs, Pim Martens, Gerd Michelsen, Arnim Wiek, 2015-11-26 This textbook provides a comprehensive compilation of conceptual perspectives methodological approaches and empirical insights of inter and transdisciplinary sustainability science Written by an international team of authors from leading sustainability institutions the textbook covers key perspectives and topics of the scientific discourse on sustainable development More than two decades after conceptualizing sustainability as societal guiding vision and regulative idea the necessity of concretizing and realizing sustainability in societal praxis is bigger than ever Sharply improved individual and societal sustainable decision making and action is necessary for a better future of humankind and the planet On that account problem and solution oriented perspectives and competencies are crucial The different chapters assemble an encompassing view of essential foundations and specific areas of research and action in sustainability science and practice The textbook aims at fostering the further establishment of sustainability science in higher education and to enable the next generation of sustainability experts to tackle the challenging and exciting topic of sustainable development *Differentiated Instruction, Equity, and Inclusion in Language Education* Tran, Thao Quoc, Duong, Tham My, 2024-12-06 Embracing differentiated instruction equity and inclusion is pivotal for fostering a dynamic and enriching learning environment in language education Differentiated instruction acknowledges the diverse needs abilities and learning styles of students while advocating for equitable learning opportunities and approaches Ensuring

equity and inclusion may assist educators in cultivating linguistic diversity throughout language education Differentiated Instruction Equity and Inclusion in Language Education explores methods to creating an equitable and inclusive language learning environment while maximizing learners potential It presents effective solutions to issues singular individual and collective learner approaches in the English language learning process while enhancing individual competencies This book covers topics such as curriculum development digital technology and language education and is a useful resource for educators policymakers psychologists sociologists academicians researchers and industry professionals *EU Coordination in International Institutions* Peter Debaere,2015-08-11 This book examines the European Union EU coordination of the G7 G8 and G20 Gx The author comprehensively maps out the different coordination processes for each Gx forum and assesses the procedures used the actors involved as well as the evolution of the Gx forum over time *Quality Management Practices* R. P. Mohanty,2008 This book is the outcome of the efforts of many professionals working both in academia and industry who have contributed to the proceedings of the International Conference on Quality Management Practices for Organizational Excellence Organizational Excellence is a final product composed of two basic elements alloyed prudently by the members stakeholders of an organization These two basic elements are Strategy and Culture When we talk of quality management practices we have to pursue quality as a strategy and also quality as a culture Quality as strategy is a conscious and deliberate search for a plan of action that will develop an organization s distinctive competence and compound it Quality as culture is the amalgamation of behavior patterns of all the stakeholders in terms of beliefs values attitudes etc In other words quality management is the epicenter of the competitive organizations of the future in which strategy is the scientific pursuits and culture is the artistic artifacts Numerous authors have put forth their logical thoughts have articulated their concepts and have validated their hypothesis relating to quality management The papers which have found place in this book aim at creating values of quality management practices **Sustainable Phosphorus Management** Roland W. Scholz,Amit H. Roy,Fridolin S. Brand,Deborah T. Hellums,Andrea E. Ulrich,2014-03-12 This book describes a pathway for sustainable phosphorus management via the Global Transdisciplinary Processes for Sustainable Phosphorus Management project Global TraPs Global TraPs is a multi stakeholder forum in which scientists from a variety of disciplines join with key actors in practice to jointly identify critical questions and to articulate what new knowledge technologies and policy processes are needed to ensure that future phosphorus use is sustainable improves food security and environmental quality and provides benefits for the poor The book offers insight into economic scarcity and identifies options to improve efficiency and reduce environmental impacts of anthropogenic phosphorus flows at all stages of the supply and use chain **The Business of** **Densification** Gabriela Debrunner,2023-12-31 Affordable housing shortage and social exclusion have become severe societal problems across the globe Increasing numbers of people are suffering from social eviction and displacement due to urban densification modernization rising rents and intense housing commodification Vulnerable resident groups such as old aged or

households with children who often live in old housing stocks planned to be densified renovated or upgraded with higher rents are forced to leave the urban core centers because they can no longer afford to live in central locations or because they experience unstable or insecure housing conditions A scenario that is highly unsustainable So far studies on densification have mainly considered the process as technological architectural or design based problem e g Kytt et al 2013 Broitman Bibby et al 2018 However systematic knowledge on how to implement densification objectives sustainably regarding economic environmental and social aspects is still lacking This book tackles this gap by analyzing densification from a governance perspective Its point of departure is that densification per se does not necessarily lead to sustainable outcomes in terms of social inclusion cohesion or community stability Rather it politicizes densification by neglecting how the process is planned implemented and governed by the actors involved The book applies an actors centered neoinstitutionalist political ecology approach to reveal the specific objectives and strategies of actors involved as well as the socio political structures i e rules laws and policies that govern densification Four Swiss in depth empirical qualitative case studies Zurich Basel K nitz and Kloten illustrate the political and legal conditions for success or failure for un sustainable implementations of densification Ultimately this book advises stakeholders governments urban practitioners and academics on more effective community oriented collective and de commodified forms of governance to respond to the needs of the public at large rather than simply catering to private individuals and firms Such governance initiatives entail active municipal land policy approaches outside a purely market based investment logic that not only limit but also work with property rights This is an open access book

Small and Medium-Sized Enterprise (SME) Resilience Susanne Durst, Thomas Henschel, 2024-03-18 Small and medium sized enterprises SMEs are considered particularly vulnerable to crisis situations due to their limited assets and resources as well as their great dependency on local customers Holistic risk management is critical to the development of resilience in organizations This book explores this situation by addressing risk management for SMEs holistically with a focus on continuous learning and the development of dynamic capabilities to increase resilience It provides a broad overview of crisis risk situations and their possible treatment in theory and practice discussed from different resilience perspectives Featuring contributions from carefully selected experts this book explores different types of small businesses and sectors to map the diversity and complexity of small business resilience practices It not only helps SMEs facilitate rapid recovery from crises but it also helps managers and professionals look to the future of their business with success by providing them with unique comparative research

Spatial Transformation Milad Abassiharofteh, Jessica Baier, Angelina Göb, Insa Thimm, Andreas Eberth, Falco Knaps, Vilja Larjosto, Fabiana Zebner, 2022 What can be understood by spatial transformation how does it manifest itself and what are the characteristics of transformation processes This Research Report addresses these questions and presents current research projects and approaches from an academic and practical planning perspective A central point of reference is the concept of a Great Transformation which stems from an expert report by the German Advisory Council on

Global Change WBGU It outlines the profound changes in the economy and society towards sustainability that will become necessary in the future describing them as a Great Transformation Likewise social upheavals also manifest themselves in space enabling spatial changes to be understood as spatial transformations However on a detailed level it remains unclear what is to be understood by spatial transformation processes and how they manifest themselves Against the background of this need for further research this Research Report addresses concrete issues in the research and shaping of spatial transformation processes The aim is to systematise the largely unordered or disordered knowledge of spatial transformation processes and to contribute to a common understanding of the associated concepts which can form the basis for further research and for the steering of these processes The articles on the following topics show how spatial and social transformation processes are mutually dependent and what opportunities and challenges inter and transdisciplinary research designs can offer in this context Perspectives on transformation processes Social and settlement structures in change Regional development and innovation Transformation processes in the so called Global South New challenges for planning processes and stakeholders Research on transformation The contributions to theoretical methodological and practical approaches are intended to stimulate a critical discussion on spatial transformation that is open to new interdisciplinary perspectives

Handbook of Transdisciplinary Research Gertrude Hirsch Hadorn, Holger Hoffmann-Riem, Susette Biber-Klemm, Walter Grossenbacher-Mansuy, Dominique Joye, Christian Pohl, Urs Wiesmann, Elisabeth Zemp, 2007-12-15 Transdisciplinary Research TR is an emerging field in the knowledge society for relating science and policy in addressing issues such as new technologies migration and public health This handbook provides a structured overview of the manifold experiences gained in these fields In the first part 21 projects from all over the world present their research approaches In the second part cross cutting challenges of TR are discussed in reference to the same projects

Transdisciplinary Higher Education Paul Gibbs, 2017-05-23 This book is not just about thinking or acting in transdisciplinary ways but about being transdisciplinary To achieve this requires a deconstruction of our current way of acting within the definition of being that others impose upon us Transdisciplinarity is a phenomenological perspective of reality and its manifestation in the world in which we exist The volume develops a widely based transdisciplinary understanding of the issues faced by higher education institutions and those who work within and with these institutions to educate professionals It incorporates international contributions from organisational theory anthropologists historians psychologists social sciences philosophers and practitioners to create a volume that makes an important and distinct contribution to the literature on higher education and professional practice Transdisciplinarity provides one of our greatest challenges in higher education both to the way it is organized and to the nature of the curriculum This book is an important contribution to the debate about its implications Higher education is being challenged by the nature of knowledge and how it is organized the world is transdisciplinary but out institutions are constrained by the disciplines This book contributes to the important debates about the challenges
