Rice, Don S. Rice, 2018-03-01 Historical and Archaeological Perspectives on the Itzas of Petén Guatemala is the first exhaustively detailed and thorough account of the Itzas, a Maya group that dominated much of the western lowland area of tropical forest swamps and grasslands in Petén, Guatemala. Examining archaeological and historical evidence, Prudence Rice and Don Rice present a theoretical perspective on the Itzas' origins and an overview of the social, political, linguistic and environmental history of the area, explain the Spanish view of the Itzas during the Conquest and explore the material culture of the Itzas as it has been revealed in recent surveys and excavations. The long but fragmented history of the Petén Itzas requires investigation across multiple periods and regions. Chapters in this six-part overview interweave varying data pertaining to this group: archaeological, artifactual, indigenous, textual, Spanish, historical, from multiple languages and academic fields such as anthropology, archaeology, linguistics, ecology and history. Part I introduces the lowland Itzas, northern and southern, with an emphasis on those of the central Petén, lakes area. Part II discusses general Itza origins and identities in the Epiclassic period, while part III reviews Spanish perceptions and misconceptions of the Petén Itzas in their Contact period writings. With these temporal anchors, parts IV and V present the archaeology and artifacts of the Petén Itzas, including pottery, architecture and arrow points from varied sites and excavations, but primarily focusing on the island capital of Tayza Nojpetén. Part VI summarizes key data and themes of the preceding chapters for a new understanding of the Petén Itzas. A companion volume to *The Kowoj*, a similar treatment of the Petén Itzas' regional neighbors, *Historical and Archaeological Perspectives on the Itzas of Petén, Guatemala* demonstrates the unique physical, cultural and social framework that was home to the Petén Itza, along with their backstory in northern Yucatán. Archaeologists, historians, art historians and geographers who specialize in the Maya and the Postclassic, Contact and Colonial periods will find this book of particular interest. Contributors: Mark Brenner, Leslie G. Cecil, Charles Andrew Hofling, Nathan J. Meissner, Timothy W. Pugh, Yuko Shiratori *Human Adaptation in Ancient Mesoamerica* Nancy Gonlin, Kirk D. French, 2015-12-01 This volume explores the dynamics of human adaptation to social, political, ideological, economic and environmental factors in Mesoamerica and includes a wide array of topics such as the hydrological engineering behind Teotihuacan's layout, the complexities of agriculture and sustainability in the Maya lowlands and the nuanced history of abandonment among different lineages and households in Maya centers. The authors aptly demonstrate how culture is the mechanism that allows people to adapt to a changing world and they address how ecological factors, particularly land and water, intersect with nonmaterial and material manifestations of cultural complexity. Contributors further illustrate the continuing utility of the cultural ecological perspective in framing research on adaptations of ancient civilizations. This book

celebrates the work of Dr David Webster an influential Penn State archaeologist and anthropologist of the Maya region and highlights human adaptation in Mesoamerica through the scientific lenses of anthropological archaeology and cultural ecology Contributors include Elliot M Abrams Christopher J Duffy Susan Toby Evans Kirk D French AnnCorinne Freter Nancy Gonlin George R Milner Zachary Nelson Deborah L Nichols David M Reed Don S Rice Prudence M Rice Rebecca Storey Kirk Damon Straight David Webster Stephen L Whittington Randolph J Widmer John D Wingard and W Scott Zeleznik **Gordon R. Willey and American Archaeology** Jeremy A. Sabloff, William Leonard Fash, 2007 Gauging the impact of one scholar's contributions to modern archaeology **Perspectives on Ancient Maya Rural Complexity** Samuel V. Connell, Gyles Iannone, 2003-12-01 Settlement archaeology in the Maya area has focused much of its attention on the polar extremes of the settlement continuum As a result of this urban rural bias a whole range of complex rural settlements remain under explored The chapters in this volume highlight the variable quality of these middle level settlements [The Ancient Maya of Mexico](#) Geoffrey E Braswell, 2014-10-14 The archaeological sites of Mexico's Yucatan peninsula are among the most visited ancient cities of the Americas Archaeologists have recently made great advances in our understanding of the social and political milieu of the northern Maya lowlands However such advances have been under represented in both scholarly and popular literature until now The Ancient Maya of Mexico presents the results of new and important archaeological epigraphic and art historical research in the Mexican states of Yucatan Campeche and Quintana Roo Ranging across the Middle Preclassic to the Modern periods the volume explores how new archaeological data has transformed our understanding of Maya history The Ancient Maya of Mexico will be invaluable to students and scholars of archaeology and anthropology and all those interested in the society rituals and economic organisation of the Maya region **Ancient Mesoamerica** Richard E. Blanton, 1993-04-30 In this revised and updated 1993 edition the authors synthesize recent research to provide a comprehensive survey of Mesoamerica **Mississippian Settlement Patterns** Bruce D. Smith, 2014-05-10 Studies in Archeology Mississippian Settlement Patterns explains the cultural organization of many of the prehistoric societies in the Eastern United States during the last 1000 years of their existence This book emphasizes the difference between the central core of Mississippian societies and those peripheral societies that preceded its development Readers are advised to begin the examination of this compilation by reading Chapter 16 first followed by Chapters 8 to 13 and 15 in order to understand the variations of patterning among societies that are commonly regarded as nascent or developed Mississippian The rest of the chapters analyze cultural groups on the West North and Northeast that are not Mississippian societies including a discussion of late prehistoric societies that are in some ways divergent but are sometimes regarded as Mississippian This publication is valuable to archeologists historians and researchers conducting work on Mississippian societies *The Terminal Classic in the Maya Lowlands* Arthur Andrew Demarest, Prudence M. Rice, Don S. Rice, 2005 The Terminal Classic in the Maya Lowlands revisits one of the great problems in Mayan archaeology the apparent collapse of Classic Maya civilization from roughly A D

830 to 950 During this period the Maya abandoned their power centers in the southern lowlands and rather abruptly ceased the distinctive cultural practices that marked their apogee in the Classic period Archaeological fieldwork during the past three decades however has uncovered enormous regional variability in the ways the Maya experienced the shift from Classic to Postclassic society revealing a period of cultural change more complex than acknowledged by traditional models Featuring an impressive roster of scholars The Terminal Classic presents the most recent data and interpretations pertaining to this perplexing period of cultural transformation in the Maya lowlands Although the research reveals clear interregional patterns the contributors resist a single overarching explanation Rather this volume s diverse and nuanced interpretations provide a new more properly grounded beginning for continued debate on the nature of lowland Terminal Classic Maya civilization
