Freedom Of Necessity:

The Freedom of Necessity John Desmond Bernal, 1949

Freedom and Necessity Joan Robinson, 1970-01-01

Collective Imaginings Moira Gatens, Genevieve Lloyd, 2002-01-22 Why would the work of the 17th century philosopher Benedict de Spinoza concern us today How can Spinoza shed any light on contemporary thought In this intriguing book Moira Gatens and Genevieve Lloyd show us that in spite of or rather because of Spinoza s apparent strangeness his philosophy can be a rich resource for cultural self understanding in the present *Collective Imaginings* draws on recent reassessments of the philosophy of Spinoza to develop new ways of conceptualising issues of freedom and difference This ground breaking study will be invaluable reading to anyone wishing to gain a fresh perspective on Spinoza s thought

Freedom from Necessity Bernard Berofsky, 2017-07-14 This book first published in 1987 is about the classic free will problem construed in terms of the implications of moral responsibility The principal thesis is that the core issue is metaphysical can scientific laws postulate objectively necessary connections between an action and its causal antecedents The author concludes they cannot and that therefore free will and determinism can be reconciled

Freedom and Nature Paul Ricoeur, 1966 This volume the first part of Paul Ricoeur s *Philosophy of the Will* is an eidetics carried out within carefully imposed phenomenological brackets It seeks to deal with the essential structure of man s being in the world and so it suspends the distorting dimensions of existence the bondage of passion and the vision of innocence to which Ricoeur returns in his later writings The result is a conception of man as an incarnate Cogito which can make the polar unity of subject and object intelligible and provide a basic continuity for the various aspects of inquiry into man s being in the world

The Penumbra Unbound Brook Ziporyn, 2012-02-01 *The Penumbra Unbound* is the first English language book length study of the Neo Taoist thinker Guo Xiang d 312 C E commentator on the classic Taoist text the *Zhuangzi* The author explores Guo s philosophy of freedom and spontaneity explains its coherence and importance and shows its influence on later Chinese philosophy particularly Chan Buddhism The implications of his thought on freedom versus determinism are also considered in comparison to several positions advanced in the history of Western philosophy notably those of Spinoza Kant Schopenhauer Fichte and Hegel Guo s thought reinterprets the classical pronouncements about the Tao so that it in no way signifies any kind of metaphysical absolute underlying appearances but rather means literally nothing This absence of anything beyond appearances is the first premise in Guo s development of a theory of radical freedom one in which all phenomenal things are self so creating and transforming themselves without depending on any justification beyond their own temporary being

Growth Poles of the Global Economy: Emergence, Changes and Future Perspectives Elena G.

Johan Ludvig Heiberg Jon Bartley Stewart, 2008 The polymath Johan Ludvig Heiberg 1791-1860 represented in many ways a kind of crossroads in the Danish Golden Age where many different figures and cultural institutions converged Although he has been studied for years in his native Denmark he has not enjoyed the same reception abroad Recently however his work has begun to catch the eye of international scholars and largely as a result of their efforts Heiberg has now become a familiar name among the most recent generation of Anglophone and international researchers working in fields such as Scandinavian literature Danish theater history and Kierkegaard studies However Heiberg was one of the most versatile figures of his age and the full scope of his activity and thought is still far from being adequately explored in the literature The present collection features articles from leading Danish and international experts that reflect the different dimensions of Heiberg's thought The volume is thus interdisciplinary in an attempt to cover as many different aspects of Heiberg's intellectual activity as possible It is divided into four rubrics I Philosophy II Literature and Criticism III Drama and Aesthetics and IV Politics and Social Criticism The hope is that this collection will encourage students and scholars to further explore the different dimensions of Heiberg's thought both on its own terms and in connection with other important figures such as Søren Kierkegaard and Hans Christian Andersen

Desire and Liberation A. Raghuramaraju, 2017-12-15 In *Desire and Liberation* Vaddera Chandidas creates a new metaphysical system He bases this new system on earlier Indian traditions of sutra literature The author rejects major convergences in philosophy from both India and the West especially on the ontological primacy of non-being that results in permanence which he posits as a mere project of the intellect He is especially opposed to the idea of permanence which renders unreliable anything that is not permanent but changing Thus desire which is not permanent is marginalized Chandidas points out that contradictoriness is the structural tinge of reality Therefore in his philosophy all that is claimed to be permanent is marginal and derivative of the intellect A Raghuramaraju has curated and edited this volume which proposes a major breakthrough in the field of philosophical studies The volume reproduces not only

Desire and Liberation and Kalidas Bhattacharyya's introduction to it but also the letters that Bhattacharyya wrote to Chandidas and Chandidas's own commentary on his text **Practical Identity and Narrative Agency** Kim Atkins, Catriona Mackenzie, 2013-05-13 The essays collected in this volume address a range of issues that arise when the focus of philosophical reflection on identity is shifted from metaphysical to practical and evaluative concerns They also explore the usefulness of the notion of narrative for articulating and responding to these issues The chapters written by an outstanding roster of international scholars address a range of complex philosophical issues concerning the relationship between practical and metaphysical identity the embodied dimensions of the first personal perspective the kind of reflexive agency involved in the self constitution of one's practical identity the relationship between practical identity and normativity and the temporal dimensions of identity and selfhood In addressing these issues contributors engage with debates in the literatures on personal identity phenomenology moral psychology action theory normative ethical theory and feminist philosophy

The Advent of Freedom John F. Hoffmeyer, 1994 These sections bring into play terms that have been widely used in Western philosophy but which in Hegel's discourse take on distinctive meanings actuality necessity freedom **Man—the Measure of Good and Evil** Leonid Goutsalenko, 2011-02-24 The reader's a Fellow of the National Academy of Sciences of Belarus PhD professor A N Danilov PhD professors Y A Gousev A N Elsukov P G Martysuk An eternally actual problem of Good and Evil is considered in the context of a great idea of an ancient Greek thinker Protagoras the author of the Constitution of one of the first world democracies a founder of social philosophy a contemporary of Socrates Unfortunately the sense of his doctrine enclosed in the formula man is the measure of all things has not yet investigated enough and estimated at its true worth in proportion to significance for the fate of man and the mankind In the suggested publication this idea is being uncovered as a measured principle of a social reality construction and internal antipathy of man's measure as the main source of self movement of individual and social forms of people's life the main reason of their achievements and failure The book is intended for researchers in the humanities and natural sciences teachers graduate students students everyone who is interested in what is happening in our extremely unsettled world and why **Marxist Aesthetics**

(Routledge Revivals) Pauline Johnson, 2013-05-13 Originally published in 1984 this study deals with a number of influential figures in the European tradition of Marxist theories of aesthetics ranging from Lukacs to Benjamin through the Frankfurt School to Brecht and the Althusserians Pauline Johnson shows that despite the great diversity in these theories about art they all formulate a common problem and she argues that an adequate response to this problem must be based on account of the practical foundations within the recipient's own experience for a changed consciousness **Genetic Theory of Reality**

James Mark Baldwin, Jaan Valsiner, 2017-07-12 James Mark Baldwin left a legacy that has yet to be fully examined one with profound implications for science and the humanities In some sense it paralleled that of his friend Charles Sanders Peirce whose semiotics became understood only a century later Baldwin was trying to make sense of complex biological and social

processes that only now have come into the limelight as biological sciences have re emerged in psychology Baldwin s focus on development based on the observation of his own children and extrapolated to his general theoretical scheme is fully in line with where contemporary biological sciences are heading This is exemplified by the bounded flexibility of the work of the genetic system The general principle of persistent exploration of the environment with the result of creating novelty which was the core of Baldwin s theoretical system has since the 1960s become the guiding idea in genetics Contemporary developmental science is rooted in Baldwin s thinking In his new introduction Jaan Valsiner shows that Baldwin s Genetic Theory of Reality demonstrates how human beings are in their nature social beings establishes an alternative conceptualization of evolutionary theory and formulates a system of developmental logic all of which serve as the foundation for developmental psychology as a whole This is a work of social science rediscovery long overdue The Open Court Paul Carus,1919 vols 46 47 have special title New Orient Society monograph *The Vocabulary of Philosophy, Mental, Moral, and Metaphysical* William Fleming,1876 *The Encyclopædia Britannica* Hugh Chisholm,1911 **Less Than Nothing** Slavoj Zizek,2013-09-10 For the last two centuries Western philosophy has developed in the shadow of Hegel an influence each new thinker struggles to escape As a consequence Hegel s absolute idealism has become the bogeyman of philosophy obscuring the fact that he is the defining philosopher of the historical transition to modernity a period with which our own times share startling similarities Today as global capitalism comes apart at the seams we are entering a new period of transition In *Less Than Nothing* the product of a career long focus on the part of its author Slavoj Zizek argues it is imperative we not simply return to Hegel but that we repeat and exceed his triumphs overcoming his limitations by being even more Hegelian than the master himself Such an approach not only enables Zizek to diagnose our present condition but also to engage in a critical dialogue with the key strands of contemporary thought Heidegger Badiou speculative realism quantum physics and cognitive sciences Modernity will begin and end with Hegel **Human Psychology** E. Janes,1885 The Doctrinal Theology of the Evangelical Lutheran Church Heinrich Schmid,1876
